In the first two of these thought-provoking lectures, Peter Cane examines the political and economic significance of personal injury law. In his final lecture, he explores the possible future role of tort law as a way of dealing with the social problem of personal injury. He questions whether tort law should provide compensation for non-monetary harm resulting from personal injury, while acknowledging that it would continue to feature as one element of a mixed regime for dealing with personal injuries comprising a range of diverse regulatory and compensatory arrangements.

This collection of essays, based on the papers delivered at a conference on Damages and Compensation Culture: Comparative Tort Law Reform in the 21st Century, hosted by the International Commercial and Economic Law Group at the School of Law, University of Limerick, analyses the relationships between compensation culture, social values and tort damages for personal injuries. injuries and the social values that the law seeks to reflect and to balance. They critically assess a range of actual and proposed tort reforms in light of how they advance or hinder those values. This version is newly streamlined for professors who teach a four-unit course or who want to cover fewer pages per day yet retain complete coverage. This edition tracks the standard edition but cuts an additional 300 pages by removing some cases and notes and occasionally trimming a case to a shorter format. This edition also omits chapters concerning defamation, fraud, and other economic and

dignitary torts, as well as some material concerning alternatives to Tort law. The result is a substantially shorter casebook that nevertheless provides the coverage most teachers want.

Cross-border claims for personal injuries are becoming more common. Furthermore, European nationals increasingly join class actions in the USA. These tendencies have created a need to know more about the law of damages in Europe and America. Despite the

growing importance of this subject, there is a dearth of material available to practitioners to assist them in advising their clients as to the heads of damage recoverable in other countries. This book aims to fill that gap by looking at the law in England, Germany and Italy. It sets out the raw data in the wider context of tort law, then provides a closer synthesis, largely concerned with methodological issues, and draws some comparative conclusions.
