MARSHALL JENNINGS

Knack Magic Tricks Running Press Kids

This giant-sized collection explains how to perform over 600 professional card tricks, devised by the world's greatest magicians. The finest single compendium available, the book features a clear style that makes the instructions easy to follow.

Magic Tricks Courier Corporation

An extraordinary memoir about finding wonder in everyday life, from magician Nate Staniforth. Nate Staniforth has spent most of his life and all of his professional career trying to understand wonder--what it is, where to find it, and how to share it with others. He became a magician because he learned at a young

age that magic tricks don't have to be frivolous. Magic doesn't have to be about sequins and smoke machines--rather, it can create a moment of genuine astonishment. But after years on the road as a professional magician, crisscrossing the country and performing four or five nights a week, every week, Nate was disillusioned, burned out, and ready to quit. Instead, he went to India in search of magic. *Here Is Real Magic* follows Nate Staniforth's evolution from an obsessed young magician to a broken wanderer and back again. It tells the story of his rediscovery of astonishment--and the importance of wonder in everyday life--during his trip to the slums of India, where he infiltrated a three-thousand-year-old clan of street magicians. *Here Is Real Magic* is a call to all of us--to welcome awe back into our lives, to marvel in the everyday, and to seek magic all around

us.

Scarne's Magic Tricks OOSYM Publications

In this book Learn to perform so many unbelievable magic tricks that will impress and astonish any audience! This delightful book reveals some of magic's best-kept secrets, showing you step-by-step exactly how the tricks are done from multiple angles. Learn easy-yet-mystifying card tricks, awe-inspiring coin tricks, mentalism tricks for reading someone's mind, deceptive bets, and amazing visual tricks that you can do with everyday objects, including how to: UNTEARED HANDKERCHIEF VANISHING THE COIN PHYSIOLOGICAL PREDICTION OF THE CITY COUNTED DISCOVERY MAGIC MATCHSTICK BOX THE SELF ROLLING BALL INVISIBLE COIN CONVERTING A FRUIT INTO ANOTHER FRUIT And more! Ultimately, by the end of this book not only will you know so many mind-blowing magic tricks, but you will also know exactly how to perform them confidently. The book is the perfect gift for aspiring magicians or anyone who wants to impress their family and friends!

Self-Working Close-Up Card Magic Courier Corporation

DIVSimple-to-use book gives versatile repertoire of first rate card tricks. The authors, both expert magicians, present clear explanations of basic techniques and over 100 complete tricks. 121 figures. /div

Algebra Magic Tricks Courier Corporation

Marvelous treasury of card magic presents exact details of 155 professional card tricks that anyone can learn. Card wizard John Scarne reworked these tricks to eliminate the need for sleight-of-hand. Simple instructions and clear diagrams illustrate Houdini's "Card on the Ceiling," Blackstone's "Card Trick Without Cards,"

Milton Berle's "Quickie Card Deal," more.

World's Greatest Magic Tricks Clb

Packed with over 40 magical science tricks for kids using simple experiments! Join comedian and author Steve Mould, #1 bestselling author of *How to be a Scientist*, and learn the secrets behind some of the most famous magic tricks and illusions (and learn some of your own). Learn how to bend water with a balloon, turn water into juice, make a glass beaker disappear in oil, and wow your friends with levitating tinsel! Packed with optical illusions, pranks, and fun facts, this ebook is a must-have for any aspiring scientist or magician (the two aren't as different as you might think)! Each trick is explained using step-by-step photographs, and the science behind each one is showcased clearly and simply. Sprinkled throughout the ebook are profiles of famous magicians and illusionists, such as Harry Houdini and David Blaine, and stories of how they used science to create their most famous tricks. Science is Magic is the perfect addition to any family bookshelf or classroom, putting a fresh spin on science for kids. What's fantastic about this kids' activity ebook is that many of the magic tricks or experiments are something you learn to perform on a friend and require practice. Thus, (the genius bit) it's not something kids will just do once and then turn the page. Think Magic Is Just An Illusion? Think again! Discover science - REAL magic at your fingertips. Learn some amazing experiments to wow your friends, find out how magicians use science in their most famous tricks, and discover the magic of the world around you. Packed with activities for kids from magic tricks to optical illusions, and peppered with fascinating facts, this educational ebook is a must-have for scientists and magicians alike. Added

bonus, each 'trick' or experiment in the ebook uses simple items that can be grabbed from home or a hardware store. Get ready to wow your friends with some cool science-backed magic like: - Magnetic fingers - Reading minds - Color changing potion - Guess the coin - Floating ping pong ball and much more! Add other fun-filled Steve Mould titles in the DK collection to your bookshelves, like *How To Be A Scientist* and *The Bacteria Book*.

The Amazing Book of Magic & Card Tricks Hachette Children's Books Australia

"Magical Mathematics reveals the secrets of amazing, fun-to-perform card tricks--and the profound mathematical ideas behind them--that will astound even the most accomplished magician. Persi Diaconis and Ron Graham provide easy, step-by-step instructions for each trick, explaining how to set up the effect and offering tips on what to say and do while performing it. Each card trick introduces a new mathematical idea, and varying the tricks in turn takes readers to the very threshold of today's mathematical knowledge. For example, the Gilbreath principle--a fantastic effect where the cards remain in control despite being shuffled--is found to share an intimate connection with the Mandelbrot set. Other card tricks link to the mathematical secrets of combinatorics, graph theory, number theory, topology, the Riemann hypothesis, and even Fermat's last theorem. Diaconis and Graham are mathematicians as well as skilled performers with decades of professional experience between them. In this book they share a wealth of conjuring lore, including some closely guarded secrets of legendary magicians. *Magical Mathematics* covers the mathematics of juggling and shows how the I Ching connects to the history of probability and magic tricks both old

and new. It tells the stories--and reveals the best tricks--of the eccentric and brilliant inventors of mathematical magic. *Magical Mathematics* exposes old gambling secrets through the mathematics of shuffling cards, explains the classic street-gambling scam of three-card monte, traces the history of mathematical magic back to the thirteenth century and the oldest mathematical trick--and much more"--

Magic Tricks and Card Tricks American Mathematical Soc.

This resource book contains 20 magic tricks based on the properties of whole numbers that are intended to spark the interest and imagination of students. Following each activity, students are asked to write about their discoveries and to create their own magic tricks. A matrix of skills for all the activities and lists of the materials required for each activity are included. Each of the activities has three sections: unraveling the trick, questions to ponder, and further investigations. The emphases of these activities are on student discovery, critical thinking, verbal and written communications, and creativity. The tricks work well in whole class or small group situations. (DDR)

[Amazing Magic Tricks](#) Courier Corporation

Learn card tricks, coin puzzlers, mental magic and rope and ring tricks.

The Amateur Magician's Handbook Penguin

This simple step-by-step guide makes magic easy no matter what your age. Use 'Brain power' tricks that use mathematics and exercise your memory skills to perform mind-reading stunts. Inventive tricks using mobile phones will delight more experienced magicians looking for something new.

[The Complete Idiot's Guide to Magic Tricks](#) Rowman & Littlefield

Two books, bound together in a single volume, ground novices in fundamentals and lead them to mastery of 80 different tricks involving cards, coins, matches, and other articles. 89 illustrations.

Self-Working Card Tricks Lulu.com

The one essential guidebook to attaining the highest level of card mastery, from false shuffling and card palming to dealing from the bottom and three-card monte, plus 14 dazzling card tricks. /div

101 Cool Magic Tricks Scarborough House

Large step-by-step illustrations of tricks along with suggestions for props.

Scarne on Card Tricks Courier Corporation

Easy-to-master crowd-pleasing tricks, require a deck of cards and offer beginners experience in handling an audience. Instructions. *Mind-Blowing Magic Tricks for Everyone* Bloomsbury Publishing USA

From simple to advanced, and using household and inexpensive props, Knack Magic Tricks includes tricks using cards, coins, handkerchiefs, and fruit, as well as mental tricks, anytime tricks, standup tricks, and tricks especially for kids (to be performed both for them and by them).

Mark Wilson's Complete Course in Magic Booksales

Learn to do astounding tricks with cards, coins, rope; also, comedy magic, mental dexterity, more. Abundantly illustrated directions. 247 illustrations.

Learn magic tricks to fool people Courier Corporation

How to make magic props from readily available materials and how to perform tricks that will obfuscate your friends, with step by

step photographic illustrations (in colour, with speech balloons) and large print, careful instructions. Ages 7 - 12.

The Royal Road to Card Magic Frontiers Media SA

Outstanding collection of nearly 200 crowd-pleasing mental magic feats requiring no special equipment. Author offers insider's tips and expert advice on techniques, presentation, diversions, patter, staging, more.

The Dai Vernon Book of Magic Penguin

Written by the master magician himself, this fascinating work reveals the secrets behind how Houdini escaped numerous death-defying stunts and exposed a variety of fake spiritualists. He also gives instructions for 44 eye-catching stage tricks, as well as other fascinating material. 155 illustrations.

Joshua Jay's Amazing Book of Cards Sterling Publishing Company, Inc.

Magicians have dazzled audiences for many centuries; however, few researchers have studied how, let alone why, most tricks work. The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena, including sensory illusions, misdirection of attention, and the appearance of mind-control and nuanced persuasion. Most studies to date have focused on either the psychological principles involved in watching and performing magic or "neuromagic" - the neural correlates of such phenomena. Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts, the history of magic reveals that scientific discovery often charts new territories for magicians. In this research topic we sketch out the symbiotic relationship between

psychological science and the art of magic. On the one hand, magic can inform psychology, with particular benefits for the cognitive, social, developmental, and transcultural components of behavioural science. Magicians have a large and robust set of effects that most researchers rarely exploit. Incorporating these effects into existing experimental, even clinical, paradigms paves the road to innovative trajectories in the study of human behaviour. For example, magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make. Moreover, magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab-based settings. Examining how magicians consistently influence spectators, for example, can elucidate important aspects in the study of persuasion, trust, decision-making, and even processes spanning authorship and agency. Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician. On the other hand, psychological science can advance the art of magic. The psychology of deception, a relatively understudied field, explores the intentional creation of false beliefs and how people often go wrong. Understanding how to methodically exploit the tenuous

twilight zone of human vulnerabilities – perceptual, logical, emotional, and temporal – becomes all the more revealing when top-down influences, including expectation, symbolic thinking, and framing, join the fray. Over the years, science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences. Furthermore, on occasion science leads to the creation of novel effects, or the refinement of existing ones, based on systematic methods. For example, by simulating a specific card routine using a series of computer stimuli, researchers have decomposed the effect and reconstructed it into a more effective routine. Other magic effects depend on meaningful psychological knowledge, such as which type of information is difficult to retain or what changes capture attention. Behavioural scientists measure and study these factors. By combining analytical findings with performer intuitions, psychological science begets effective magic. Whereas science strives on parsimony and independent replication of results, magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection. This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception.
