Chapter 12 Eye 10th edChapter 12 The Lymphatic SystemThe lymphatic system consists of the lymphatic vessels, lymph nodes, and certain other lymphoid organs in the body (Figure 12.1).

Extremely porous blind-ended lymphatic capillaries pick up excess tissue fluid leaked from the blood capillaries (Figure 12.2). The fluid (lymph) flows into the larger lymphatics and finally into the blood vascular system through the right lymphatic duct and the left thoracic duct.Chapter 12: Lymphatic SystemChapter 12: The Lymphatic System. STUDY. PLAY. vessels,fluids. lymphatic system consists of 2 semi-independent parts: 1)lymphatic ____ and 2)lymphatic tissues & organs. Lymphatic system functions: transports escaped ____ back to blood, plays essential roles in body defense and disease resistance.Chapter 12: The Lymphatic System Flashcards | QuizletLymphatic System Organ system that consists of two semi-independent parts; lymphatic vessels and lymphoid tissues and organs.Chapter 12 --> The Lymphatic System Flashcards | QuizletChapter 12 Lymphatic System Notes Consists of two semi-independent parts: o Lymphatic vessels o Lymphoid tissues and organ Lymphatic system functions o Transports escaped fluids from the cardiovascular system back to the blood- vessels o Plays essential roles in body defenses and resistance to disease- tissues and organs Lymphatic vessels: o Lymph consists of excess tissue fluid and plasma proteins carried by lymphatic vessels o If fluids are not picked up edema occurs as fluid accumulates ...Chapter 12 Lymphatic System Notes.docx - Chapter 12 ...[ANATOMY] CHAPTER 12 — LYMPHATIC SYSTEM.ppt - Free download as Powerpoint Presentation (.ppt), PDF File (.pdf), Text File (.txt) or view presentation slides online. Quickly memorize the terms, ...Chapter 12: The Lymphatic System Flashcards - Cram.comThe lymphatic system, for

most people, is associated with the immune system to such a degree that the two systems are virtually indistinguishable. The lymphatic system is the system of vessels, cells, and organs that carries excess fluids to the bloodstream and filters pathogens from the blood. The swelling of lymph nodes during an infection and the transport of lymphocytes via the lymphatic vessels are but two examples of the many connections between these critical organ systems.

21.1 Anatomy of the Lymphatic and Immune Systems

10. Name the various types of lymphatic cells and discuss their basic functions

11. Explain the difference between red and white pulp of the spleen

12. Define MALT and name the organs apart of MALT

Learning Objectives: Chapter 21: The Immune System: Innate and Adaptive Body Defenses

13. What does immunity mean?

14. Distinguish and explain the difference between innate and adaptive defenses
