 This book is a follow-up to the comprehensive Managing Business Disputes in Today's China: Duelling with Dragons (2007) guide on foreign direct investment disputes that can arise in the course of initiating and operating a Chinese joint venture. Since its inauguration by the Chinese government in 2013, the 'Belt and Road Initiative' (BRI) has included projects in more than 70 countries spanning diverse economic and legal environments. The nature of the BRI coupled with the economic downturn as a result of the COVID-19 pandemic will inevitably generate more challenges than ever. Like its predecessor, this book poses a hypothetical scenario in order to explore the potential issues that may arise from Chinese-foreign business relationships in the BRI context. After setting the scene with the 'Afrina Government's' ill-fated infrastructure project involving Chinese and foreign parties, subsequent chapters provide comprehensive insight on and highlight the following issues that one must consider when dealing with BRI disputes: dispute settlement options; informal dispute settlement approaches; disputes involving Chinese State-Owned Enterprises; construction and project finance disputes; corruption and bribery; sanctions; environmental issues. This book will provide extensive guidance from seasoned practitioners on the legal and practical issues of disputes that arise from engaging with Chinese companies doing business outside China in the context of BRI projects.

With the New Deal came a dramatic expansion of the American regulatory state. Threatening to undermine many of the traditional roles of the legal system and its actors by establishing a system of administrative law, the new emphasis on federal legislation as a form of social and economic planning ushered in an era of "legal uncertainty." In this study Ronen Shamir explores how elite corporate lawyers and the American Bar Association clashed with academic legal realists over the constitutionality of the New Deal's legislative program. Applying the insights of Weber and Bourdieu to the sociology of the legal profession, Shamir shows that elite members of the bar had a keen self-interest in blocking the expansion of administrative law. He dismisses as oversimplified the view that elite lawyers were "hired guns" who argued that New Deal legislation was unconstitutional solely because of their duty to represent their capitalist clients. Instead, Shamir suggests, their alignment with the capitalist class was an incidental result of their attempt to articulate their vision of the law as scientific, apolitical, and judicially oriented--and thereby to defend their own position within the law profession. The academic legal realists on the other side of the constitutional debates criticized the rigidity of the traditional judicial process and insisted that flexibility of interpretation and the uncertainty of legal outcomes was at the heart of the legal system. The author argues that many legal realists, encouraged by the experimental nature of the New Deal, seized an opportunity to improve on their marginal status within the legal profession by moving their discussions from academic circles to the national policy agenda.
