This comparative study provides an overview of the textbook production chain, starting with its origins in the curriculum, and suggests ways in which policymakers can make improvements at every point in the chain. With evidence from a range of countries, mainly in Asia, the study is intended as a resource for policymakers and as a reference and benchmark for education systems. Although the study focuses on textbooks, which are the priority for governments and teachers and represent the greatest item of expenditure on teaching and learning materials, it also includes other teaching and learning materials including digital resources.

Drawing on an extensive review of the literature and statistical sources, The Business of Scholarly Publishing examines the changing environment of

scholarly publishing in the United States. Albert N. Greco analyzes the product, price, placement, promotion, and costs (including some P & L statements) of scholarly books and journals from 1945 to the present, with a primary emphasis on the period after 2010.

Fans and scholars have long regarded the 1980s as a significant turning point in the history of comics in the United States, but most critical discussions of the period still focus on books from prominent creators such as Frank Miller, Alan Moore, and Art Spiegelman, eclipsing the work of others who also played a key role in shaping comics as we know them today. *The Other 1980s* offers a more complicated and multivalent picture of this robust era of ambitious comics publishing. The twenty essays in *The Other 1980s* illuminate many works hailed as innovative in their day that have nonetheless fallen from critical view, partly because they challenge the contours of conventional comics studies scholarship: open-ended serials that eschew the graphic-novel format beloved by literature departments; sprawling superhero narratives with no connection to corporate universes; offbeat and abandoned experiments by major publishers, including Marvel and DC; idiosyncratic and experimental independent comics; unusual genre exercises filtered through deeply personal sensibilities; and oft-neglected offshoots of the classic “underground” comics movement of the 1960s and 1970s. The collection also offers original examinations of the ways in which the fans and critics of the day engaged with creators and publishers, establishing the groundwork for much of the contemporary critical and academic discourse on comics. By uncovering creators and works long ignored by scholars, *The Other 1980s* revises standard histories of this major period and offers a more nuanced understanding of the context from which the iconic comics of the 1980s emerged.

Christian Missionaries worked hard to convert immigrants. Their first order of business was to denigrate Hinduism, designate Hindus as heathen, and disparage their culture, food and even attire. Immigrants stubbornly resisted, led by the tiny educated elite, including Brhmaas whom we call Brahmins. Conversion was a failure at least up to the end of the 19th century but picked up a self-generating momentum thereafter. The result is that the share of Hindus in Guyana’s Indian population declined from 83.5 percent in 1880 to 62.8 percent in 2012. The largest portion of the contraction was lost to Christianity. The loss notwithstanding, even a casual observer would conclude that Guyanese Hindus, at home and in the Diaspora, are a very religious people. Many of us do a jhandi or havan once annually; others do the more elaborate and costlier yajña, where everyone is welcome, once or twice in their lifetime. Most of us do a short daily puja – prayers, offerings, reading the stras and listening to bhajan – in our homes. An important, but perhaps unintended, way immigrants countered conversion to Christianity was an unplanned movement towards a “synthesis” that brought Hindus, regardless of caste or sect, under a “unitary form of Hinduism.” The “synthesis” began around the 1870s and was completed by the 1930s to the 1950s. Guyanese Hindus call the unified corpus of religious beliefs and practices that emerged from the “synthesis” Sanatana Dharma. Ramesh Gampat labels it Plantation Hinduism in this path-breaking book. The book argues that the brand of Hinduism practiced is inconsistent with Sanatana Dharma, called Vednta by the more philosophically inclined. Plantation Hinduism features an extraordinary dependence upon purohiths (pandits), which has anaesthetized the Hindu mind and render him unable to think, question and inquire when it comes to Dharma. Rituals and bhakti have been degraded and turned into desire-motivated worship; devats have been misconstrued as Brahman rather than as limited manifestation of the one non-dual pure Consciousness; belief in the multiplicity of gods encourages image worship; and superstitions anchor Guyanese Hindus to tradition and mere belief. Plantation Hinduism is little more than desire-motivated actions, dogmas and superstitions. Absent is the idea that Sanatana Dharma is a spiritual science no less scientific than hard sciences, such as physics and astronomy. The central message of Vednta is the innate divinity of every person and the freedom to realize that divinity through anubhava, direct personal experience of Supreme Reality.

Portable Prose: The Novel and the Everyday examines the novel as a privileged site for representing the everyday, as well as a physical object that occupies public and private space. This collection interrogates the relationships between these differing aspects of the novel’s existence, negotiating the boundaries between the material world, subjective experience, and strategies of representation. This collection offers a wide array of innovative novelistic explorations—with a focus ranging from nineteenth-century fiction to contemporary literary theory—and explores the portability of novels as both physical things and virtual hermeneutic devices. While mimetic qualities of prose remain an integral consideration for literary interpretation, this collection argues for more diverse frameworks—ones that see aesthetic components of the novel in close connection with reading practices, shared structures of feeling, and the corporeal. In this capacity, this volume will argue for readings of texts that consider the capacity for literary culture to move through the world, but also to make it or re-make it new.

The Minor Fall is a modern interpretation of an Old Testament saga. Davy Jessie is a young, personal injury trial lawyer working as an associate in a top-drawer law firm in Houston, Texas in 2005. In addition to trying difficult (sometimes impossible to win) cases assigned to him by the firm, Davy also assists Tim Sullivan (one of the named partners in the firm) in prosecuting more serious cases. Sullivan is a flamboyant, fashionable, facile at formulating a memorable turn of phrase, philandering litigator with a long history of trial victories and the material rewards that a contingency fee practice can yield. Davy is enamored with Sullivan and attempts to emulate Sullivan’s professional (and personal) behavior. After Davy wins one of the cases he was not expected to win, Sullivan designates Davy to lead the firm’s efforts in representing a group of landowners in eastern Kentucky whose properties have been contaminated by oil field production. Beth Sheehan, a contract lawyer hired by the firm to help with discovery on the case, travels to Kentucky with Davy where they have a brief affair, Davy returns to find that his wife Michelle is pregnant. The fallout from the affair

and the stress of preparing the case send Davy spiraling into depression and emotional paralysis. Along the way down to his moral crisis, Davy contemplates existential questions about the nature of law, the importance of literature, the existence of God, and what (if anything other than single malt Scotch or cold chardonnay) gives meaning to life as he considers losing his wife, leaving the law firm, and abandoning the practice of law.

The national bestseller and New York Times Notable Book about a young single mother living in New York, her eccentric aunt, and the decisions they make that have unexpected implications for the world around them from one of America’s most gifted writers of fiction, “our own country’s Alice Munro” (The Washington Post). Reyna knows her relationship with Boyd isn’t perfect, yet as she visits him throughout his three-month stint at Rikers Island, their bond grows tighter. Kiki, now settled in the East Village after a journey that took her to Turkey and around the world, admires her niece’s spirit but worries that she always picks the wrong man. Little does she know that the otherwise honorable Boyd is pulling Reyna into a cigarette smuggling scheme, across state lines, where he could risk violating probation. When Reyna ultimately decides to remove herself for the sake of her four-year-old child, her small act of resistance sets into motion a tapestry of events that affect the lives of loved ones and strangers around them. A novel that examines conviction, connection, and the possibility of generosity in the face of loss, *Improvement* is as intricately woven together as Kiki’s beloved Turkish rugs, as colorful as the tattoos decorating Reyna’s body, with narrative twists and turns as surprising and unexpected as the lives all around us. The Boston Globe says of Joan Silber: “No other writer can make a few small decisions ripple across the globe, and across time, with more subtlety and power.” *Improvement* is Silber’s most shining achievement yet. “Without fuss or flourishes, Joan Silber weaves a remarkably patterned tapestry connecting strangers from around the world to a central tragic car accident. The writing here is funny and down-to-earth, the characters are recognizably fallible, and the message is quietly profound: We are not ever really alone, however lonely we feel.” —The Wall Street Journal

In most college and university libraries, materials published before 1800 have been moved into special collections, while the post-1923 books remain in general circulation. But books published between these dates are vulnerable to deaccessioning, as libraries increasingly reconfigure access to public-domain texts via digital repositories such as Google Books. Even libraries with strong commitments to their print collections are clearing out the duplicates, assuming that circulating copies of any given nineteenth-century edition are essentially identical to one another. When you look closely, however, you see that they are not. Many nineteenth-century books were donated by alumni or their families decades ago, and many of them bear traces left behind by the people who first owned and used them. In *Book Traces*, Andrew M. Stauffer adopts what he calls “guided serendipity” as a tactic in pursuit of two goals: first, to read nineteenth-century poetry through the clues and objects earlier readers left in their books and, second, to defend the value of keeping the physical volumes on the shelves. Finding in such books of poetry the inscriptions, annotations, and insertions made by their original owners, and using them as exemplary case studies, Stauffer shows how the physical, historical book enables a modern reader to encounter poetry through the eyes of someone for whom it was personal.

Innovation in public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy. To achieve that potential, both the promises and the perils of innovation must be investigated, including the risks and opportunities of joint procurement across borders in the European Union and the United States. This in-depth research investigates innovation in public procurement from three different perspectives. First, leading academics and practitioners assess the purchase of innovation, with a particular focus on urban public contracting in smart cities involving meta-infrastructure, public-private partnership arrangements and smart contracts. A second line of inquiry looks for ways to encourage innovative

suppliers. Here, the collected authors draw on emerging lessons from the US and Europe, to explore both the costs and the benefits of spurring innovation through procurement. A third perspective looks to various innovations in the procurement process itself, with a focus on the effects of joint and cross-border procurement in the EU and US landscapes. The chapters review new technologies and platforms, the increasingly automated means of selecting suppliers, and the related efficiencies that “big data” can bring to public procurement. Expanding on research in the editors' prior volume, *Integrity and Efficiency in Sustainable Public Contracts: Balancing Corruption Concerns in Public Procurement Internationally* (Bruylant 2014), this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic, institutional and practical perspectives, and to point the way to future research on the contractual models that are emerging from new procurement technologies.

Health Sciences Collection Management for the Twenty-First Century is intended for those with any level of experience in health sciences collection management. This book from the authoritative Medical Library Association starts with the context of health sciences publishing and covers the foundations of selection, budgeting, and management. It won't tell new librarians what to buy but will give them background and criteria that should go into their selections. However, the focus of this book is not only on best practices but also on the big picture and the deeper changes in the field that affect decision making. Subjects not always covered in many collection development textbooks such as marketing or accessibility are included because they are part of the larger collections landscape. Chapter contributors bring their own perspectives to the topics. Stories of different libraries' experiences bring interesting topics to the forefront in practical, specific, and timely detail. While whole books have been written that go into some of these topics more in depth on their own, the treatment of each topic here focuses on the unique perspective and concerns of the collection manager.

A housekeeper for the aristocratic Fitzherberts takes a fateful step above her station, while Lady Maud Fitzherbert herself crosses deep into forbidden territory when she falls in love with a German spy. . . .
