Construction of Cribs for Drying and Storage of Maize UNESCO Publishing
When analyzed in multilingual contexts, English is often treated as an entity that is separable from its linguistic environment. It is often the case, however, that multilinguals use English in hybrid and transcultural ways. This book explores how multilingual East Africans make use of English as a local resource in their everyday practices by examining a range of domains, including

workplace conversation, beauty pageants, hip hop and advertising. Drawing on the Bakhtinian concept of multivocality, the author uses discourse analysis and ethnographic approaches to demonstrate the range of linguistic and cultural hybridity found across these domains, and to consider the constraints on hybridity in each context. By focusing on the cultural and linguistic bricolage in which English is often found, the book illustrates how multilinguals respond to the tension between local identification and dominant conceptualizations of English as a language for global communication.

This very readable book by a distinguished economist, Wall Street Journal editor, and Assistant Secretary of the US Treasury is a major challenge both to economic theory and to media explanations of the ongoing 21st century economic crisis. The one percent have pulled off an economic and political revolution. By offshoring manufacturing and professional service jobs, US corporations destroyed the growth of consumer income, the basis of the US economy, leaving the bulk of the population mired in debt. Deregulation was used to concentrate income and wealth in fewer hands and financial firms in corporations “too big to fail,”

removing financial corporations from market discipline and forcing taxpayers in the US and Europe to cover bankster losses. Environmental destruction has accelerated as economists refuse to count the exhaustion of nature’s resources as a cost and as corporations impose the cost of their activities on the environment and on third parties who do not share in the profits. This is the book to read for those who want to understand the mistakes that are bringing the West to its knees.

Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most

seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it

developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

"The report, "'I Had a Dream to Finish School': Barriers to Secondary Education in Tanzania," examines obstacles, including some rooted in outmoded government policies, that prevent more than 1.5 million adolescents from attending secondary school and cause many students to drop out because of poor quality education. The problems include a lack of secondary schools in rural areas, an exam that limits access to secondary school, and a discriminatory government policy to expel pregnant or married girls"-- Publisher's description.

Professor Okpewho's authority as an expert in this important new field is unrivaled." —Gregory Nagy "Isidore Okpewho's African Oral Literature is a marvelous piece of scholarship and wide-ranging research. It presents the most comprehensive survey of the field of oral literature in Africa." —Emmanuel Obiechina " . . . a tour de force of scholarship in which Okpewho casts his net across the African continent, searching for its verbal forms through voluminous recent writings and presents African oral literature in a new voice, proclaiming the literariness of African

folklore." —Dan Ben-Amos "This is an outstanding book by a scholar whose work has already influenced how African literature should be conceived. . . . Professor Okpewho is a scholar with a special talent to nurture scholarship in others. After this work, African literature will never be the same." —Mazisi Kunene Isidore Okpewho, for many years Professor of English at the University of Ibadan, is one of the handful of African scholars who has facilitated the growth of African oral literature to its status today as a literary enterprise concerned with the artistic foundations of human culture. This comprehensive critical work firmly establishes oral literature as a landmark of high artistic achievement and situates it within the broader framework of contemporary African

culture.

The production and distribution of film and audiovisual works is one of the most dynamic growth sectors in the world.

Thanks to digital technologies, production has been growing rapidly in Africa in recent years. For the first time, a complete mapping of the film and audiovisual industry in 54 States of the African continent is available, including quantitative and qualitative data and an analysis of their strengths and weaknesses at the continental and regional levels. The report proposes strategic recommendations for the development of the film and audiovisual sectors in Africa and invites policymakers, professional organizations, firms, filmmakers and artists to

implement them in a concerted manner.

This massive authoritative Swahili dictionary, is the most definitive and comprehensive in existence. It has taken a team of lexicographers and academics fourteen years to prepare, with the support of the Institute of Kiswahili Research in Dar es Salaam. The last comparable edition was in 1939, and was primarily intended to help the user to comprehend English texts. The dictionary records new words and meanings of words which the language has acquired since 1939; and provides lexicographical information needed by current dictionary users. There are more than 50,000 entries, with an attempt to give every English word an equivalent in

Swahili, or otherwise a phrase; and the vocabulary covers both general and specialized language. Guidance is provided on use and connotation, word formation and syntax, and derivatives and compounds of a headword are explicitly shown in each entry. The full information and arrangement given for each entry is: headword, homographs, wordclass, alternative spelling of a headword, cross-reference, gloss, definition, subject label, usage label, regional label, senses separated by numbers, illustrative examples, compounds, derivatives, and adjectival complementation.

2015 will be a year of important negotiations and agreements on climate change and sustainable development-- two topics of great importance for indigenous peoples and to which indigenous peoples have a lot to contribute. Seven years after the adoption of the UN Declaration on the Rights of Indigenous Peoples and in light of the outcomes of the 2014 World

Conference on Indigenous Peoples, this edition of *The Indigenous World* looks at the most significant developments and/or setbacks for indigenous peoples' rights at the national and international level in the past year and at possible ways forward. In over seventy articles and country reports, *The Indigenous World 2015* provides a comprehensive update on the current situation of indigenous peoples and their human rights and reports on the most important developments in international processes of relevance to indigenous peoples during 2014. It is an indispensable tool about issues and developments that have impacted indigenous peoples worldwide. Indigenous and non-indigenous scholars or activists write the articles contained in *The Indigenous*

World 2015. It is edited and produced by the International Work Group for Indigenous Affairs.
