Symbaroum Advanced art education is in the process of developing research programs

throughout Europe. What does the term research actually means in the practice of art? What is the relation to the scientific methods of alpha, beta or gamma sciences, directed toward knowledge production and the development of a certain scientific domaine?

What will be the influence of scientific research on the art forms?

This book offers multidisciplinary perspectives on the changing relationships between states, indigenous peoples and industries in the Arctic and beyond. It offers insights from Nordic countries, Canada, Australia, New Zealand and Russia to present different systems of resource governance

and practices of managing industry-indigenous peoples' relations in the mining industry, renewable resource development and aquaculture. Chapters cover growing international interest on Arctic natural resources, globalization of extractive industries and increasing land use conflicts. It considers issues such as equity, use of knowledge, development of company practices,

conflict-solving measures and the role of indigenous institutions. Focus on Indigenous peoples and Governance triangle  
 Multidisciplinary: political science, legal studies, sociology, administrative studies, Indigenous studies  
 Global approach: Nordic countries, Canada, Russia, Australia, New Zealand and Canada  
 Thorough case studies, rich material and analysis The

book will be of great interest to legal scholars, political scientists, experts in administrative sciences, authorities at different levels (local, regional and nations), experts in human rights and natural resources governance, experts in corporate social governance.

 Shallow lakes differ from deep ones in many aspects

of nutrient dynamics, biotic structure and interactions of various trophic levels. Though very common in European lowlands, shallow lakes attract inadequate attention from research teams. This book aims at filling gaps in our knowledge of the processes which take place in non-stratified lakes. It contains proceedings from the international conference 'Shallow

Lakes \*95' held in Mikolajki, Poland, on 20-26 August 1995. In more than 50 original papers up-to-date views on eutrophication, degradation and recovery of shallow lakes are presented. The first four sections of the book (Nutrient fluxes, Biotic structure, Trophic interactions and Whole lake studies) deal with theoretical aspects of lake functioning while the fifth (Biomaniplati

on, restoration and management) is devoted to practical measures undertaken to improve water quality in shallow lakes. The book is therefore addressed to university biologists and ecologists and PhD students, as well as to managers involved in restoration of shallow lakes. *Perspective for Interior Designers* Springer Scandinavia is often regarded as a laboratory for gender equality, and

in no other region of the world have women been politically prominent for so long. It therefore offers a unique context for analyzing women's and men's political discourse. This volume examines the ways Danish, Finnish, Norwegian and Swedish politicians present themselves and their messages in televised election debates. An ideal debate would provide political actors

with an equal opportunity to air their positions. However, this rudimentary standard of fairness is rarely satisfied in practice. Rather than granting all participants equality, debates often become events in which prior inequalities, such as gender, age, class and status, are re-enacted. Instead of the Ideal Debate seeks to discover how these inequalities, especially that of gender,

manifest themselves. How are discursive similarities and differences created? How do male and female politicians employ, bend and violate debate rules to portray themselves as competent and trustworthy? The authors of individual chapters adopt a comparative approach, analyzing indicators such as the relationship between argumentative and symbolic

discourse, the strategic deployment of the word *oweo* and the use of ethos argumentation . In a cogent introduction and conclusion, the editors succeed in situating the empirical findings within a broader theoretical framework. Instead of the Ideal Debate will be of great interest to students of anthropology, communications, gender studies and political science. *Plasmonics: Fundamentals*

*and Applications* BIS Publishers Following the global success of *Sketching*, which has sold over 50,000 copies in two years, authors Koos Eissen and Roselien Steur will in 2011 be bringing out the sequel entitled *Sketching: The Basics*. In fact, prequel would be a better word for this new book, since it is aimed towards the novice designer. The *Basics* explains the rudiments of learning to

draw both clearly and comprehensively using step by step illustrations, examples and strategies. You will learn to use and master the different techniques and also how to apply sketches in the design process. it is the perfect book for those just starting out in sketching, For the first years of art and design courses, and for those who wish to revise the basics of good sketching; it is

a simple and efficient way of learning all you've ever wanted to know but have never had explained to you.

Unpacking the complexities of Nordic consumer culture, this edited collection responds to the growing interest in regionalism within consumer research and marketing. By taking a closer look at the interaction between the state and the market in Nordic countries, the authors examine how consumer behaviour is impacted by the region's unique context. Important

elements of Nordic culture are explored, such as its underlying element of mythology and the concept of 'hygge,' an object of global consumption. Those studying consumer behaviour, branding, and marketing more generally, will find this book a fascinating contribution to research.

"Career brings

together individuals' paths through life, learning and work. It describes how people interface with social institutions including the education system, employers, civil society and the state. Because our careers are socially and culturally embedded it matters where they are enacted. Career and Career Guidance in the Nordic Countries explores what kind of context the

Nordic region offers for the pursuit of career, how the development of careers are supported in welfare societies, and how career guidance is enacted in this context. The Nordic region encompasses an area in Northern Europe and the Northern Atlantic comprising Denmark, Sweden, Norway as well as Finland to the east and Iceland in the Atlantic. It includes also the self-governing

areas of Åland, Greenland and the Faroe Islands. This region has long been seen as a source of progressive policy innovation in education and employment and this book focuses and explores the place, the enactment and the theories of career guidance in these Nordic countries"--

 If you want to get ahead in this new era of interaction design, this is the reference you need. Nintendo's Wii and Apple's iPhone and iPod Touch have made gestural interfaces popular, but until now there's been no complete source of information about the technology. Designing

Gestural Interfaces provides you with essential information about kinesiology, sensors, ergonomics, physical computing, touchscreen technology, and new interface patterns -- all you need to know to augment your existing skills in "traditional" web design, software, or product development. Packed with informative illustrations and photos, this book helps you: Get an overview of

technologies surrounding touchscreens and interactive environments. Learn the process of designing gestural interfaces, from documentation to prototyping to communicating to the audience what the product does. Examine current patterns and trends in touchscreen and gestural design. Learn about the techniques used by practicing designers and developers.

today. See how other designers have solved interface challenges in the past. Look at future trends in this rapidly evolving field. Only six years ago, the gestural interfaces introduced in the film *Minority Report* were science fiction. Now, because of technological, social, and market forces, we see similar interfaces deployed everywhere. Designing Gestural Interfaces will

help you enter this new world of possibilities. Composed Theatre Career Development. This book clarifies and explains perineal anatomy and the pathophysiology of anal incontinence as well as applied pharmacology. It also institutes the new recommended classification of perineal tears, and describes anal sphincter repair techniques. The emphasis is on correct

post-operative management, management of pregnancy following previous anal sphincter injury, and prevention of anal sphincter tears. The book will interest students, colorectal surgeons, physiotherapists, midwives, continence advisors, labour wards and lawyers.

Perspective for Interior Designers offers an easily accessible and quickly learned method that will serve every interior designer's drawing needs. Beginning with a section on the fundamental technique of two-point perspective, which is presented through 14 sequential steps, the author moves on to cover special situations (including one-point

perspective, circular forms, reflective images, views from above, light effects and furniture); freehand perspective; camera techniques; case studies; analysis of finished perspectives; and a review of computer-aided techniques. Step-by-step demonstration s, analysis of constructed layouts, and illustrations of completed works make this volume a complete and accurate guidebook.

Sound

the

and transcultural trends towards the post-apocalyptic, a wide sensorial spectrum of sonic imaginaries as well as the decolonization and deinstitutionalization around the making of sound. Within the areas of musicology, art history, and, later, sound studies, Sound Art has evolved at least since the 1980s into a turbulent field of academic critique and aesthetic analysis. Summoning

artists, researchers, curators, and critics, this volume takes note of and reflects the most recent shifts and drifts in Sound Art--rooted in sonic histories and implying future trajectories. **Cybernetics and Automation Control Theory Methods in Intelligent Algorithms** Hachette UK In this age of increased fundamental and applied research on biodiversity, no single volume was as

yet devoted to the various temporal and spatial aspects of aquatic biodiversity. The present book is published in honour of Professor Henri Dumont (Ghent, Belgium) at the occasion of his retirement as Editor-in-Chief of *Hydrobiologia*. The volume presents a selection of contributions on aquatic biodiversity, written by colleagues from the editorial board, fellow

editors of aquatic journals and former students and collaborators. Contributions deal with a wide spectrum of topics related to aquatic biodiversity and cover fields such as actual- and palaeolimnology, taxonomy, and fundamental and applied limnology. Even reconnaissance chapters on management and cultural impact of water bodies are included. The book combines

state-of-the-art contributions in aquatic sciences. *Ambiguous Artefacts* Springer This book is open access under a CC BY 4.0 license.
