The Education of Henry Adams is an autobiography that records the struggle of Bostonian Henry Adams (1838-1918), in his later years, to come to terms with the dawning 20th century, so different from the world of his youth. It is also a sharp critique of 19th-century educational theory and practice. In 1907, Adams began privately circulating copies of a limited edition printed at his own expense. Commercial publication of the book had to await its author's 1918 death, whereupon it won the 1919 Pulitzer Prize. The Modern Library placed it first in a list of the top 100 English-language nonfiction books of the 20th century.

"General McChrystal is a legendary warrior with a fine eye for enduring lessons about leadership, courage, and consequence." —Tom Brokaw General Stanley McChrystal is widely admired for his hunger to know the truth, his courage to find it, and his humility to listen to those around him. Even as the commanding officer of all U.S. and coalition forces in Afghanistan, he stationed himself forward and frequently went on patrols with his troops to experience their challenges firsthand. In this illuminating New York Times bestseller, McChrystal frankly explores the major episodes and controversies of his career. He describes the many outstanding leaders he served with and the handful of bad leaders he learned not to emulate. And he paints a vivid portrait of how the military establishment turned itself, in one generation, into the adaptive, resilient force that would soon be tested in Iraq, Afghanistan, and the wider War on Terror. "A compelling account of his impressive career." -The Wall Street Journal "This is a brilliant book about leadership wrapped inside a fascinating personal narrative." -Walter Isaacson, author of *Steve Jobs* Stanley McChrystal retired in July 2010 as a four-star general in the U.S. Army. His last assignment was as the commander of

the International Security Assistance Force and as the commander of U.S. forces in Afghanistan. He is currently a senior fellow at Yale University's Jackson Institute for Global Affairs and cofounder of the McChrystal Group, a leadership consulting firm. He and his wife, Annie, live in Virginia.

The Comedy of Errors New York : C. Scribner

A NATIONAL BOOK CRITICS CIRCLE AWARD WINNER THE POSTHUMOUS MASTERWORK FROM "ONE OF THE GREATEST AND MOST INFLUENTIAL MODERN WRITERS" (JAMES WOOD, THE NEW YORK TIMES BOOK REVIEW) Composed in the last years of Roberto Bolaño's life, 2666 was greeted across Europe and Latin America as his highest achievement, surpassing even his previous work in its strangeness, beauty, and scope. Its throng of unforgettable characters includes academics and convicts, an American sportswriter, an elusive German novelist, and a teenage student and her widowed, mentally unstable father. Their lives intersect in the urban sprawl of SantaTeresa—a fictional Juárez—on the U.S.-Mexico border, where hundreds of young factory workers, in the novel as in life, have disappeared.

Rules and Regulations Implementing the Local Government Code of 1991 United Nations Publications

Insurgent, Raiders and Bandits explores the history of irregular warfare over the past 250 years through the lives and campaigns ofFrom w the greatest masters of this mode of conflict. The book not only tells their stories, but shapes an alternate history of the world as seen through the eyes of those who made up for their small numbers with clever, unorthodox methods that often brought them victory. Their lesson for military affairs in our time must not be ignored.

Transformational Politics Strelbytskyy Multimedia Publishing

A leader is: someone people follow. But why do people follow? Books abound on leaders, but much less is known about followers. In *The Leaders We Need*, Maccoby steps into this yawning gap in the literature. This insightful book shows that followers have their own powerful motivations to follow. Many relate to their leader as to some important person from the past—a parent, a sibling, a close friend. With major shifts in family structure and other social changes (especially transformations in technology and work life), these “transferences” have grown complex—making leaders’ work more challenging. The key for modern-day leaders? Being sensitive to how a group’s collective psychology and social context shape its leadership needs. For example, factory workers in a large city during a period of relative calm would need very different leaders than people working in a star management consultancy during a time of stiffening competition. The author outlines the profound shift from a more bureaucratic society and leadership model to an interactive, collaborative one—and provides crucial advice on how to become a “leader we need.” Offering provocative psychological insight and thoughtful analysis of social and cultural changes, this book

examines leadership through an entirely new lens.

Islamic State has replaced Al Qaeda as the great global threat of the twenty-first century, the bogeyman we have all come to fear. But Daesh started as a local movement, rooted in the resentment of the Sunni Arabs of Iraq and Syria. It is they who have lost most in the geo-strategic shift in the balance of power in the region over the last thirty years, as Iranian-backed Shias have mobilised politically and advanced on the social and economic fronts. How has Islamic State been able to muster support far beyond its initial constituency in the Arab world and to attract tens of thousands of foreign volunteers, including converts to Islam, and seemingly countless supporters online? In this compelling intervention into the debate about Islamic State's origins and future prospects, the renowned French sociologist of religion, Olivier Roy, argues that the group mobilised a highly sophisticated narrative, reviving the myth of the Caliphate and recasting it into a modern story of heroism, death and nihilism, using a very contemporary aesthetic of violence, well entrenched amid a youth culture that has turned global and violent.

In the last tow decades governments have invested a great deal of time, money, and political capital in reforms to make the public sector more efficient. They have, however, invested little in evaluating the effectiveness of their efforts, accepting many of the reforms because of a belief in a particular approach to governing or an ideological commitment on the part of politicians. This collection of essays "takes stock" of these reform measures and their impact on public administration.

In economic development, theory and practice exist as two seemingly separate realities. Academics strive to develop or refine theory by drawing on abstract concepts about the way people behave and institutions work, while practitioners draw from a stock of experiences. By bringing together leading theorists and practitioners such as Blakely, Blair, McCann, Luger, Gunder, Stough and Stimson, this book provides the first comprehensive overview of local economic development theories for over fifteen years. It explores the theory behind the key concepts that every economic practitioner must understand and in doing so, ties together the various theories from across the disciplines to practice.

Literary critics such as C. T. Hsia called Pai Hsienyung a "rare talent" who according to another

critic, "has absorbed the diverse techniques of contemporary Western literature to temper and modernize his writing; however, the characters he writes about remain Chinese people and the stories he tells remain Chinese tales." Widely acclaimed as a classic of contemporary fiction, Taipei People has been frequently compared to James Joyce's Dubliners. Henry Miller considers Pai Hsienyung "a master of portraiture." The collection of fourteen stories from this reprint edition has already been translated to great acclaim into French, German, Italian, Dutch, Hebrew, Japanese, and Korean.

This book contains a probing and comprehensive theoretical analysis of the emerging notion of national security in light of the dramatic post-Cold War transformation of the international system. It begins with a discussion of the nature of this change, emphasizing declining national sovereignty, escalating international interdependence, and proliferating anarchic conflict. After developing a framework of the conceptual components of national security, this study focuses on analyzing change--both in priorities and tradeoffs--in military security, economic security, resource/environmental security, and political/cultural security. Brief case studies of the 1991 Gulf War, the 1991 Maastricht Treaty, the 1992 Earth Summit, and the ongoing Yugoslavia conflict illustrate the theoretical contentions. Finally, a set of crucial, fundamental security policy challenges and responses conclude the book.
