Drugs (medicines) are considered either the primary therapy or an adjunct to another modality. Physicians of all specialties prescribe drugs on a daily basis, and therefore they need to understand the mode and action by which drugs exert their therapeutic effects. Written records of the use of natural

products as medicinal agents date back thousands of years. However, it was not until the early 1800s that the active principles from plants were isolated. Since then thousands of drugs have been introduced to the drugs market. With advances in drug design, molecular biology and genetics, the rate of developing new potent drugs is accelerated. Due to the vast progress in drug development and discovery, medical and pharmacy students, doctors, nurses and pharmacists in training need to learn the principles of therapeutics in order to follow up with the frequent changes in the therapeutics and adapt to them. With contributions from some of my colleagues, this book provides a clear and concise overview of the most important commonly used drugs with emphasis on the pharmacology aspects necessary for a basic understanding of the subject. It reviews the concepts, clinical applications, dosage forms, bioavailability, pharmacokinetics and side effects of a large number of drugs used to alleviate pain, lower cholesterol levels, and treat bacterial infections, diabetes, osteoporosis, bleeding, psoriasis and multiple Sclerosis. This book, with over 750 references, is an excellent pharmacology text for the student who is looking to broaden his/her strengths prior to the exam. The beauty of this text is that it includes essential pharmacology concepts in a compact book that can be quickly referenced and read multiple times during the course of a student's studies. In addition, this guide assists scientists trained in molecular biology, medicinal chemistry and related fields who need to know the basic theories, principles and practical applications of pharmacology. With the addition of pharmacokinetics coverage, ways to improve the bioavailability of commonly used drugs and sections on therapeutics that will help readers identify with diseases and drug treatments, this book provides better preparation of researchers in the basics of pharmacology.

Famous for the inspiring slogan, 'Jai Jawan, Jai Kisan', Lal Bahadur Shastri's prime ministership saw India ensuring respect for the farmer and the soldier. In his brief yet eventful tenure of nineteen months, he resolved some of the most contentious problems facing the country, by taking all segments of society along. The book takes a closer look at his pioneering efforts at ensuring self-sufficiency in foodgrains by ushering in the Green Revolution. As the inspiration behind the original 'surgical strikes', it also highlights the laudatory manner in which Shastri motivated the soldiers to effectively respond to Pakistan's military adventurism, by giving the green signal to the military to enter Pakistani soil. Insightful, thought-provoking, and written in a lucid style by one of India's most respected political commentators, Lal Bahadur Shastri focuses on the leader's greatest strengths- integrity, humility, simplicity and a self-effacing nature.

An army addicted to power, a soldier prepared for the ultimate sacrifice, and a spy who will go to any length to stop him - Operation 'Fox-Hunt' is a tale of sacrifice, camaraderie and betrayal. The Pakistani army, mauled by the Abbottabad raid, decides to create and execute an operation that will get the Pakistani public opinion firmly behind them. Major Shezad Khan, a much decorated officer from the Pakistani army's elite Special Service Group (SSG) embarks on a mission to attack a strategic target in India. His comrades-in-arms are five ferocious Lashkar-e-Taiba militants. Though he crosses into India through Kashmir, there is one man who has been tasked with the job of ensuring that they don't reach their target. RAW's Senior Field Agent Sanjay Khanna teams up with Military Intelligence and NSG to thwart the attack. The narrative sweeps across the vast expanses of Tajikistan, the malarial jungles of Bengal, through conflict zones in Baluchistan, and the Vale of Kashmir as the two men and their teams race against time. A thrilling finale awaits in the maximum city - Mumbai. Will the 'Fox-Hunt' succeed?
