Origins of the English Gentleman Hal Leonard Corporation

In this work, Maurice Keen explores why a host of men were accepted as entitled to coat armour because they were 'gentlemen', not because they were knights or of knightly ancestry.

How to Win a Marginal Seat BRILL

"This is the first published English translation of Francesco Alfieri's fencing treatise: "La Scherma", first published in Padua in 1640. Alfieri was the Master at Arms at the Accademia Delia in Padua, Italy from 1632. The Delia was a school attached to the University of Padua teaching young gentlemen military skills, mathematics and the martial arts of self

defence. It is not widely appreciated that Europe has martial arts traditions that are centuries old. Contained within this book is a description of one of these European combat systems ~ the art of fighting with the Rapier ~ a long, slender, civilian sword designed for self defence and dueling. The ability to wield such a weapon with skill was a matter of vital importance in an age when the defence of honour and, by definition, the immortal soul, could be more important than life itself. Alfieri's concise system is a very practical and effective way to address this need. It is an excellent resource for all students of historical swordplay and anyone interested in the martial arts of Renaissance Europe." -- Amazon.com

 Eric Walberg's POSTMODERN

IMPERIALISM: Geopolitics and the Great Game is a riveting and radically new analysis of the imperialist onslaught which first engulfed the world in successive waves in the 19th–20th centuries and is today hurtling into its endgame. The term “Great Game” was coined in the nineteenth century, reflecting the flippancy of statesmen (and historians) personally untouched by the havoc that they wreaked. What it purported to describe was the rivalry between Russia and Britain over interests in India. But Britain was playing its deadly game across all of Eurasia, from the Balkans and Palestine to China and southeast Asia, alternately undermining and carving up “premodern” states, disrupting the lives of hundreds of millions, with

consequences that endure today. With roots in the European enlightenment, shaped by Christian and Jewish cultures, and given economic rationale by industrial capitalism, the inter-imperialist competition turned the entire world into a conflict zone, leaving no territory neutral. The first “game” was brought to a close by the cataclysm of World War I. But that did not mark the end of it. Walberg resurrects the forbidden “i” word to scrutinize an imperialism now in denial, but following the same logic and with equally horrendous human costs. What he terms Great Game II then began, with America eventually uniting its former imperial rivals in an even more deadly game to destroy their common revolutionary antagonist and potential nemesis-communism. Having

“won” this game, America and the new player Israel-offspring of the early games-have sought to entrench what Walberg terms “empire and a half” on a now global playing field-using a neoliberal agenda backed by shock and awe. With swift, sure strokes, Walberg paints the struggle between domination and resistance on a global canvas, as imperialism engages its two great challengers-communism and Islam, its secular and religious antidotes. Paul Atwood (War and Empire: The American Way of Life) calls it an “epic corrective”. It is a “carefully argued-and most of all, cliché-smashing-road map” according to Pepe Escobar (journalist Asia Times). Rigorously documented, it is “a valuable resource for all those interested in how imperialism works, and sure to spark

discussion about the theory of imperialism”, according to John Bell (Capitalism and the Dialectic).

This book provides a unique and succinct account of the history of health and fitness, responding to the growing recognition of physicians, policy makers and the general public that exercise is the most potent form of medicine available to humankind. Individual chapters present information extending from the earliest reaches of human history to the present day, arranged in the form of 30 thematic essays covering topics from the supposed idyll of the hunter-gatherer lifestyle and its posited health benefits to the evolution of health professionals and the possible contribution of the Olympic movement to health and fitness in our current society. Learning objectives are set for each

topic, and although technical language is avoided as far as possible, a thorough glossary explains any specialized terms that are introduced in each chapter. The critical thinking of the reader is stimulated by a range of questions arising from the text context, and each chapter concludes with a brief discussion of some of the more important implications for public policies on health and fitness today and into the future. The material will be of particular interest to graduate and undergraduate students in public health, health promotion, health policy, kinesiology, physical education, but will be of interest also to many studying medicine, history and sociology.

The Romans created the most successful and longest-lasting empire in history. They conquered and civilised a territory that stretched from Scotland to Libya, from Portugal to Iraq - and then ran it for more than 400 years. The dream of Rome has lived on in the memory of European leaders ever since, and one after the other they have tried to imitate the Roman achievement. Charlemagne tried it. Napoleon tried it. And now the European Union can be seen as the latest attempt to rediscover the unity of the Roman empire. So how did the Romans pull it off? Boris Johnson has long been fascinated by the Roman

achievement - how they managed to weld the peoples of Europe together, and how they created a cultural and political identity that is proving so elusive to us in Europe today. Here he presents an account of how they financed and organised the state. He explains the miraculous process by which people wanted to become Roman citizens and, for the first time, to share a common European identity. With minimal regulation, and a tiny bureaucracy, the Romans created the first single European market, complete with single currency - and all with an army that represented a very small percentage of the population. What was their magic? This is the first book to examine the Roman system in detail, as a way of casting light on the challenges we face

today. It is full of the wonderful scenes and extraordinary characters who made our civilisation, and who still inspire the dream of Rome.

The extraordinary life of Australia's first international racehorse, from creating new records in Australia to his life in California, where he won the Hollywood Gold Cup In wartime Sydney, a small and weedy racehorse kicked his way through the top tier of Australian racing. He was Shannon, one of the fastest horses the nation had ever seen. Between 1943 and 1947, Shannon broke record after record with his garrulous jockey Darby Munro. When they sensationally lost the Epsom Handicap by six inches, they forever were stamped by the race they didn't win. Sold in August 1947 for the highest price ever paid at auction for an

Australian thoroughbred, Shannon ended up in America. Through headline-snatching pedigree flaws, acclimatization, and countless hardships, he blitzed across the ritzy, glitzy racetracks of 1948 California. Smashing track records, world records, and records set by Seabiscuit, the Australian bolted into world fame with speed and courage that defied all odds. Long before Black Caviar, So You Think, and Takeover Target, Shannon was Australia's first international racehorse. Starring Hall of Fame trainers and jockeys, Hollywood lawyers, and legends Bernborough and Citation, this is his tremendous story.

During the 2015 general election, the contest in Gavin Barwell's constituency of Croydon Central was by any measure - the amount of money spent, the frequency of visits by ministers, the volume of literature delivered or the number of political activists pounding the streets - one of the most intensive constituency campaigns this country has ever seen. At the end of it, after an experience both physically and psychologically gruelling, Gavin had clung on by the skin of his teeth, and had a story well worth telling. Journalists

produce a great deal of commentary on the leaders of our political parties, their campaign strategies and key messages. Elections, however, are won and lost on the pavements of only about 100 so-called marginal constituencies - places like Croydon Central. This book gives an unparalleled insight into what it's like to be an MP defending an ultra-marginal seat. It answers questions such as: Why do activists knock on your door - do they really think a quick conversation is going to change your mind? What is it like to find yourself splashed across the front page of a national newspaper? How do you cope with the very real possibility that you might be out of a job tomorrow? *How to Win a Marginal Seat* is a fascinating behind-the-scenes look at how campaigning is conducted at the

coalface of British politics.

David Cameron has emerged as the first Tory leader in years to come across as a man of the people, an ordinary bloke in a reviled political position. But, spin-doctoring aside, not a great deal is known about his background, his family life or his gradual rise through the ranks of the party. This book tells his story.

"The Cloak" tells the story of the life and death of Akaky Akakievich Bashmachkin, an unremarkable and indeed pathetic middle-aged titular councillor and copying clerk serving in an unnamed department of the Russian civil service. Though Akaky has very little and is

cruelly picked on by his coworkers, Akaky displays no discontentment with his plight, in fact even openly relishing his copying work, in which he appears to find some interesting world of his own. His life is thrown into disarray, however, when he finds that he must buy a new overcoat, a great expense for which he is unprepared. Though he is initially upset by the need for the new overcoat, he soon finds in the quest to save up for and design the new overcoat a higher

purpose. The thought of the new overcoat becomes a deep comfort to him, like having a steady companion. The day he receives the coat is the happiest day of his life. However, a turn of events leads to the sudden loss of his coat, and shortly thereafter, of his own life. After his death, Akaky returns as a ghost to haunt St. Petersburg for a time, stealing coats, and in particular the coat of a general who had refused to help Akaky.
