and beloved novels. Includes exclusive bonus content! Esperanza thought she'd always live a privileged life on her family's ranch in Mexico. She'd always have fancy dresses, a beautiful home filled with servants, and Mama, Papa, and Abuelita to care for her. But a sudden tragedy forces Esperanza and Mama to flee to California and settle in a Mexican farm labor camp. Esperanza isn't ready for the hard work, financial struggles brought on by the Great Depression, or lack of

acceptance she now faces. When Mama gets sick and a strike for better working conditions threatens to uproot their new life, Esperanza must find a way to rise above her difficult circumstances-because Mama's life, and her own, depend on it.

From the legendary author of *Things Fall Apart*—a long-awaited memoir of coming of age in a fragile new nation, and its destruction in a tragic civil war For more than forty years, Chinua Achebe maintained a considered silence on the events of the Nigerian civil war, also known as the Biafran War, of 1967–1970, addressing them only obliquely through his poetry. Decades in the making, *There Was a Country* is a

towering account of one of modern Africa's most disastrous events, from a writer whose words and courage left an enduring stamp on world literature. A marriage of history and memoir, vivid firsthand observation and decades of research and reflection, *There Was a Country* is a work whose wisdom and compassion remind us of Chinua Achebe's place as one of the great literary and moral voices of our age.

*Economics for a Changing World* OXFORD  
Madame et Alice is written

by a high school teacher of French along with one of her students who studied five years of French. Dr. Soper, the teacher-author, opens the book by describing her responsibilities along with different teaching techniques for promoting and enhancing student learning. At the end of each chapter Alice, the student co-author, adds a student's perspective to Dr. Soper's teaching techniques. The book concludes with two chapters that depict Dr. Soper's educational and

personal philosophies. As a 32-year educator, Dr. Soper incorporates change into her teaching by being the same person.

Designed to meet the needs of wide-ability classes, the Camarades French course is divided into four units and fulfils the criteria of the National Curriculum/5-14 Guidelines, fully preparing all pupils for GCSE/Standard Grade

examinations. The Teacher's Book contains an overview of each unit; offers clear, concise teaching notes; provides notes for the four assessment sections and the answers to all Pupil's Book exercises; and comprises tapescripts in sequence that are highlighted for ease of reference. The book has been revised for the National Curriculum 2000. Houghton Mifflin College Division  
The World as Will and Representation is the central work of the

German philosopher Arthur Schopenhauer. One of the most important philosophical works of the nineteenth century, the basic statement of one important stream of post-Kantian thought. It is without question Schopenhauer's greatest work. Conceived and published before the philosopher was 30 and expanded 25 years later, it is the summation of a lifetime of thought. "...This book will be of interest to general readers, undergraduates, graduates, and scholars in

the field." --George Lăzăroiu, PhD, Institute of Interdisciplinary Studies in Humanities and Social Sciences, New York, Analysis and Metaphysics *Level 3* Cambridge University Press  
In addition to being an essential component of program evaluation, student evaluation of a systematic nature is considered to be an integral part of language teaching methodology. The purpose of this document is to provide a brief review of some options in student

evaluation, and to consider their relevance for monitoring student learning and perceptions in the context of a multidimensional curriculum for core French programs. It examines some important basic concepts in evaluation and considers evaluation methods in three general categories: language tests, observation and record-keeping, and self-report evaluation techniques.

Following the organization of the main text, this essential resource provides additional out-of-class practice, with four parts to each unit. Français écrit and Français parle contain written and listening activities, respectively, for all three lessons in a unit. Vie pratique offers both written and listening activities based on the practical language section, and Images du monde Francophone provides written and

listening activities based on the cultural magazine sections. Revision tests appear after Unites 3, 6, 9, and 11. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This volume appears now

finally in English, sixty years after the death of its author, Lucien Tesnière. It has been translated from the French original into German, Spanish, Italian, and Russian, and now at long last into English as well. The volume contains a comprehensive approach to the syntax of natural languages, an approach that is foundational for an entire stream in the modern study of syntax and grammar. This stream is known today as dependency grammar

(DG). Drawing examples from dozens of languages, many of which he was proficient in, Tesnière presents insightful analyses of numerous phenomena of syntax. Among the highlights are the concepts of valency and head-initial vs. head-final languages. These concepts are now taken for granted by most modern theories of syntax, even by phrase structure grammars, which represent, in a sense, the opposite sort of approach to syntax from what Tesnière was

advocating. Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection. *With Graphic Portion of the Lectures on Architecture* Cambridge University Press Jean-Nicolas-Louis Durand (1760–1834) regarded the *Précis of the Lectures on Architecture* (1802–5) and its companion volume, the *Graphic Portion* (1821), as both a basic course for future civil engineers and a treatise. Focusing the practice of architecture on utilitarian and economic values, he assailed the

rationale behind classical architectural training: beauty, proportionality, and symbolism. His formal systematization of plans, elevations, and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed. His emphasis on pragmatic values, to the exclusion of metaphysical concerns, represented architecture as a closed system that subjected its own formal language to logical processes. Now published

in English for the first time, the *Précis* and the *Graphic Portion* are classics of architectural education. *The World as Will and Representation* iUniverse This second edition updates a course which has proven to be a perfect fit for classes the world over. Engaging content and a strong focus on grammar and vocabulary combine to make this course a hit with both teachers and students. Popular course features have been refreshed with new content, including the

imaginative reading and listening topics, 'Culture in Mind', and 'Everyday English' sections. New for the second edition is a DVD-ROM with the Level 1 Student's Book containing games, extra exercises and videos featuring the photostories' characters as well as a 'Videoke' record-yourself function. There is a full 'Vocabulary bank' at the back of the book which expands upon lexical sets learned in the units.

*Précis of the Lectures on Architecture* Nelson Thornes

The only introductory economics text to equip students to address today's pressing problems by mastering the conceptual and quantitative tools of contemporary economics. OUP has partnered with

the international collaborative project of CORE researchers and teachers to bring students a book and learning system that complements and enhances CORE's open-access online e-book. *The Economy* is a new approach that integrates recent developments in economics including contract theory, strategic interaction, behavioural economics and financial instability. It challenges students to address inequality, climate change, economic

instability, wealth creation and innovation and other problems. It has been adopted as the standard principles course at University College London, Sciences Po Paris and the Toulouse School of Economics. A new economics for the principles course *The Economy* begins with social interactions using elementary game theory and institutions modelled as rules of the game. This provides the basis for a modern treatment of markets including price-making as well as price-

taking, the exercise of power, and the importance of social norms and adjustment to disequilibria. Introducing labour and credit markets with incomplete contracts allows a consistent treatment of aggregate employment and fluctuations without the need for ad hoc sticky price and wage assumptions. Banks create money by extending credit and a central bank seeks to implement a target

inflation rate. Growth and instability are illustrated from the Great Depression, through the post-war golden age of capitalism through to the financial crisis and ensuing uncertainties. Students acquire an understanding of the past and current evolution of the economy in its social and environmental context, equipping them to marshal evidence and articulate positions about contemporary policy issues.
