Revisit the thrilling Sam Owens series, with book two in the series from New York Times bestselling author J.T. Ellison. Dr. Samantha Owens is starting over: new city, new job, new man, new life. But before she's even unpacked her office at Georgetown University's forensic pathology department, she's called to consult on a case that's rocked the capital and the country. An unknown pathogen released into the Washington Metro has caused nationwide panic. Three people died—just three. Amid the media frenzy and Homeland Security alarm bells, Sam painstakingly dissects the lives of those three victims and makes an unsettling conclusion. This is no textbook terrorist, but an assassin whose motive is deeply personal and far from understandable. Xander Whitfield, a former army ranger and Sam's new boyfriend, knows about seeing the world in shades of gray. About feeling compelled to do the wrong thing for the right reasons. Only his disturbing kinship with a killer can lead Sam to the truth...and once more into the line of fire. Originally published in 2012
 "Shocking suspense, compelling characters and fascinating forensic details." —Lisa Gardner, # 1 New York Times bestselling author "A terrific thriller...fans of forensic mysteries, such as those by Patricia Cornwell, should immediately add this series to their A-lists." —Booklist

The Invention of Telepathy explores one of the enduring concepts to emerge from the late nineteenth century. Telepathy was coined by Frederic Myers in 1882. He defined it as 'the communication of any kind from one mind to another, independently of the recognised channels of sense'. By 1901 it had become a disputed phenomenon amongst physical scientists yet was the 'royal road' to the unconscious mind. Telepathy was discussed by eminent men and women of the day, including Sigmund Freud, Thomas Huxley, Henry and William James, Mary Kingsley, Andrew Lang, Vernon Lee, W.T. Stead, and Oscar Wilde. Did telepathy signal evolutionary advance or possible decline? Could it be a means of binding the Empire closer together, or was it used by natives to subvert imperial communications? Were women more sensitive than men, and if so why? Roger Luckhurst investigates these questions in a study that mixes history of science with cultural history and literary analysis.

In Hector Umbra, Oesterle skilfully employs the stylistic devices of the detective novel and science fiction. He also enriches his abstruse and mysterious adventure by taking critical sideswipes at the widespread dissemination of conspiracy theories, the sensationalism of the media and the fashion fixation of club culture. The focal point of his stories is Hector Umbra, a painter, who goes in search of his friend DJ Osaka, who has suddenly disappeared. Readers will be entranced by this wild and colourful world packed with freaks, villains and aliens.

"Daemon in the Sanctuary" explores the uncanny contradiction between the phenomenological experience of home as a site of nurture and security and the empirical reality that people are far more likely to be hurt and even killed in their own homes by their intimates, rather than at the hands of strangers. Moving from the syrupy tributes of the god of love in Plato's "Symposium" to the subject of domestic violence appears to be a giant leap, but the author shows that embroidered romantic ideas about love prepare the initiate poorly for the reality of intimate connection. Poets

and philosophers who lead us to believe that love is heaven sent can leave us craving an extreme experience. We crave an earth-shaking, life-altering intrusion on our tranquility as evidence that love is real. Thus the naive initiate can easily mistake the flutter of the pulse, the quickening of the heart rate, the flush, the confused emotions, and the painful longing as signs of the god's gift. But these are also the signs of fear! Wendy C. Hamblet, a philosopher in the phenomenological lineage, examines the truth value of phenomenological experience, through the lens of the problem of intimate violence. If Husserl is right and phenomenological method provides the ground of all empirical truth, then what is to be made of the fundamental contradiction between the lived experience of home as a site of nurture and security and of intimates as guardians and caretakers, and the empirical fact, evident in every human society, that people are far more likely to be harmed, and even killed, in their homes or in the homes of their intimates and at the hands of those charged with their care? Hamblet carefully choreographs a dance between the two opposing 'truths' to expose how the lived sense of home, colored by ideals, can tint people's expectations about intimate connection and cloud their ability to recognize the signs of intimate abuse. This book illuminates the dangers and pitfalls of unhealthy intimacy and offers a regimen for loosening the grip of a sickened love's pathological hold.

Collecting, analyzing, and extracting valuable information from a large amount of data requires easily accessible, robust, computational and analytical tools. Data Mining and Business Analytics with R utilizes the open source software R for the analysis, exploration, and simplification of large high-dimensional data sets. As a result, readers are provided with the needed guidance to model and interpret complicated data and become adept at building powerful models for prediction and classification. Highlighting both underlying concepts and practical computational skills, Data Mining and Business Analytics with R begins with coverage of standard linear regression and the importance of parsimony in statistical modeling. The book includes important topics such as penalty-based variable selection (LASSO); logistic regression; regression and classification trees; clustering; principal components and partial least squares; and the analysis of text and network data. In addition, the book presents:

- A thorough discussion and extensive demonstration of the theory behind the most useful data mining tools
- Illustrations of how to use the outlined concepts in real-world situations
- Readily available additional data sets and related R code allowing readers to apply their own analyses to the discussed materials
- Numerous exercises to help readers with computing skills and deepen their understanding of the material

Data Mining and Business Analytics with R is an excellent graduate-level textbook for courses on data mining and business analytics. The book is also a valuable reference for practitioners who collect and analyze data in the fields of finance, operations management, marketing, and the information sciences.

Move beyond Coping and Surviving to a Rejuvenating Place of Soul Rest How many of us find ourselves exhausted, running on empty with no time for rest, no time for ourselves, no time for God?

Bonnie Gray knows exactly what that's like. On the brink of fulfilling a lifelong dream, Bonnie's plans suddenly went off script. Her life shattered into a debilitating journey through anxiety, panic attacks, and insomnia. But as she struggled to make sense of it all, she made an important discovery: we all need spiritual whitespace. Spiritual whitespace makes room—room in one's heart for a deep

relationship with God, room in one's life for rest, room in one's soul for rejuvenation. With soul-stirring vulnerability and heartbreaking honesty, Bonnie takes readers on a personal journey to feed their souls and uncover the deeper story of rest. Lyrical writing draws readers into Gray's intimate journey through overwhelming stress to find God in a broken story and celebrate the beauty of faith.

Guided by biblical encouragement and thought-provoking prompts, Gray shows readers how to create space in the everyday for God, refreshment, and faith. She also offers practical steps and insights for making spiritual whitespace a reality, right in the midst of the stress-frayed stories in every season of life. "We live in a culture that brags and boasts about being busy. Into that reality

steps Bonnie with a new idea. Whitespace is an important concept and Bonnie has captured it perfectly. If you're exhausted with being exhausted, read this book. If you feel too busy to read this book, then that's probably the best sign of all that you need it."—from the foreword by Jon Acuff, New York Times bestselling author of *Stuff Christians Like*

It was five degrees below zero, and Roger Morneau was out of gas. If his toes froze, they would have to be amputated. The man bowed his head in prayer. "It was almost as if something hit the back of my automobile and it shot forward," he says. "Then the motor started to accelerate and hummed like never before." He drove the 27 miles to safety without a drop of gas!
