[ACSM's Resources for the Personal Trainer](#) Simon and Schuster

Legacy of Ash is an unmissable fantasy debut--an epic tale of intrigue and revolution, soldiers and assassins, ancient magic and the eternal clash of empires. A shadow has fallen over the Tressian Republic. Ruling families -- once protectors of justice and democracy -- now plot against one another with sharp words and sharper knives. Blinded by ambition, they remain heedless of the threat posed by the invading armies of the Hadari Empire. Yet as Tressia falls, heroes rise. Viktor Akadra is the Republic's champion. A warrior without equal, he hides a secret that would see him burned as a heretic. Josiri Trelanis Viktor's sworn enemy. A political prisoner, he dreams of reigniting his mother's failed rebellion. And yet Calenne Trelan, Josiri's sister, seeks only to break free of their tarnished legacy; to escape the expectation and prejudice that haunts the family name. As war spreads across the Republic, these three must set aside their differences in order to save their home. Yet decades of bad blood are not easily set aside. And victory -- if it comes at all -- will demand a darker price than any of them could have imagined.

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that

served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

This volume presents a comprehensive account of the COVID-19 pandemic, also known as the novel coronavirus pandemic, as it happened. Originating in China in late 2019, the COVID-19 outbreak spread across the entire world in a matter of three to four months. This volume examines the first responses to the pandemic, the contexts of earlier epidemics and the epidemiological basics of infectious diseases. Further, it discusses patterns in the spread of the disease; the management and containment of infections at the personal, national and global level; effects on trade and commerce; the social and psychological impact on people; the disruption and postponement of international events; the role of various international organizations like the WHO in the search for solutions; and the race for a vaccine or a cure. Authored by a medical professional and an economist working on the frontlines, this book gives a nuanced, verified and fact-checked analysis of the COVID-19 pandemic and its global response. A one-stop resource on the COVID-19 outbreak, it is indispensable for every reader and a holistic work for scholars and researchers of medical sociology, public health, political economy, public policy and governance, sociology of health and medicine, and paramedical and medical practitioners. It will also be a great resource for policymakers, government departments and civil society organizations working in the area.

This volume offers an introduction to all questions of teaching Religious Education as a school subject and as an academic discipline related to this subject. The chapters cover most of the aspects that religion teachers have to face in their work, as well as the theoretical background necessary for this task. The volume is a textbook for students and teachers of religious education, be it in school or in an academic context, who are looking for reliable information on this field. The book has proven its usefulness in German speaking countries. This volume is the English translation of the German Compendium of Religious Education (edited by Gottfried Adam and Rainer Lachmann). The present English version is based on the 2012

edition which aims for a most current representation of the field. The background of the book is Protestant but its outlook is clearly ecumenical, and questions of interreligious education are considered in many of the chapters. The compendium continues to be widely used in Germany, Austria and Switzerland - as an introduction to the field and as a handbook for students who are preparing for their final exams. The English edition makes this compendium available to students and colleagues in other countries.

Forceful and detailed account of the struggle for "freedom" after the American Civil War How did America recover after its years of civil war? How did freed men and women, former slaves, respond to their newly won freedom? David Roediger's radical new history redefines the idea of freedom after the jubilee, using fresh sources and texts to build on the leading historical accounts of Emancipation and Reconstruction. Reinstating ex-slaves' own "freedom dreams" in constructing these histories, Roediger creates a masterful account of the emancipation and its ramifications on a whole host of day-to-day concerns for Whites and Blacks alike, such as property relations, gender roles, and labor.

"In the early 1990s, a small group of "AIDS denialists," including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission"--*Puzzlesnacks* Springer Nature

In *Internet for the People*, leading tech writer Ben Tarnoff offers an answer. The internet is broken, he argues, because it is owned by private firms and run for profit. Google annihilates your privacy and Facebook amplifies right-wing propaganda because it is profitable to do so. But the internet wasn't always like this—it had to be remade for the purposes of profit maximization, through a years-long process of privatization that turned a small research network into a powerhouse of global capitalism. Tarnoff tells the story of the privatization that made the modern internet, and which set in motion the crises that consume it today. The solution to those crises is straightforward: deprivatize the internet. Deprivatization aims at creating an internet where people, and not profit, rule. It calls for shrinking the space of the market and diminishing the power of the profit motive. It calls for abolishing the walled gardens of Google, Facebook, and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives that encode real democratic control. To build a better internet, we need to change how it is owned and organized. Not with an eye towards making markets work better, but towards making them less dominant. Not in order to create a more competitive or more rule-bound version of privatization, but to overturn it. Otherwise, a small number of executives and investors will continue to make choices on everyone's behalf, and these choices will remain tightly bound by the demands of the market. It's time to demand an internet by, and for, the people now.

Cannabis products are the most widely trafficked drugs worldwide, and it also remains the most widely used drug worldwide. At the same time, production methods have become increasingly sophisticated, resulting in the availability in illicit markets of a wide range of cannabis products. This updated and significantly revised manual has been prepared taking into account both developments in analytical technology and advances in the science of cannabis. It is aimed at the harmonization and establishment of recommended methods of analysis for national drug analysis laboratories. The manual suggests approaches that may assist drug analysts in the selection of methods appropriate to the sample under examination and provide data suitable for the purpose at hand, leaving room also for adaptation to the level of sophistication of different laboratories and the various legal needs.

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the

threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

The use of human in vitro fertilization in the management of infertility is the outgrowth of years of laboratory observations on in vitro sperm-egg interaction. "The editors of this work have themselves contributed significantly to basic knowledge of the mammalian fertilization process. The observations of Don Wolf on sperm penetration, the block to polyspermy and, most recently, sperm hyperactivation in the monkey and human, Gregory Kopf's elucidation of the mechanisms of sperm activation during penetration and the reciprocal dialogue between sperm and egg, and Barry Bavister's definition of culture conditions and requirements necessary for in vitro oocyte maturation, fertilization and development in model mammalian systems including nonhuman primates have contributed greatly to our understanding of the mammalian fertilization process. Wolf, Kopf and Gerrity have enjoyed substantial interaction with clinicians in Departments of Obstetrics and Gynecology and have been directly involved with successful IVF programs. Both Wolf and Kopf have served as research scientists in the Division of Reproductive Biology at the University of Pennsylvania, which, for more than 22 years, has fostered co-mingling of clinically oriented and basic science faculty. It is through such interaction, which clearly exists at many institutions including the University of Wisconsin, that the process of technology transfer is best served. Without an exquisitely coordinated laboratory, there can be no consistent success in human in vitro fertilization. Quality control is pivotal, but close collaboration between the laboratory and the clinic is also essential as information is shared and correlated.

Since the 1979 Islamic Revolution, Iran has implemented Sharia-compliant banking and finance which makes it one of the few countries that has

adopted Islamic banking. The post-war liberalization and privatization of the economy and subsequent deregulation had paved the ground for emergence of private banks and financial institutions which had been subject to strict government control and ownership of banks. Further reform of the banking sector included authorization for the establishment and operations of foreign-owned banks in Iran and ratification of international treaties for the reciprocal protection and promotion of capital investments. The most recent government reform plan concerning adoption of a comprehensive banking law aims to create a single regulator for the prudential regulation and supervision of banks and financial institutions. The implementation of the aforesaid banking reform will be instrumental for achieving a sound and safe banking system and restoring investor confidence in the Iranian banking and money markets.

"War, border closures, violence, and unemployment have hampered the Palestinian economy for over a decade. Despite these obstacles and setbacks, the future outlook is optimistic." Based on the research of the Palestine Economic Policy Research Institute (MAS), the World Bank, and other organizations, 'Development Under Adversity' reviews the development of the Palestinian economy since the 1993 Declaration of Principles. The Palestinian economy has enormous potential. Its general development indicators, including life expectancy, literacy, and child mortality rates, are among the best in the Middle East and North Africa. The book identifies the conditions under which the Palestinian economy can grow. They include trade channels that reduce the economy's reliance on Israel; the creation of a more efficient civil service; more investment-oriented public expenditure; and more resourceful support from NGOs in the delivery of health, education, welfare, and infrastructure services. 'Development Under Adversity' provides historical background, an objective examination of recent economic and political developments, and a comprehensive analysis of the contribution that the donor community can make toward alleviating poverty. Throughout its analysis, the book focuses on the human consequences of economic uncertainty. It studies the social and household costs of border closures, and includes complete chapters about the education and health sectors. The result is a book that will be relevant to a wide range of institutional and private lenders, as well as to anyone with a general interest in the well-being and future of the Palestinian economy.
