Don't miss the JOE PICKETT series—now streaming on Paramount+ Joe Pickett's friend's past comes back to haunt everyone he cares about in this "violent, bloody, and quite satisfying thriller"\* from #1 New York Times bestselling author C. J. Box. In 1995, Nate Romanowski was in a Special Forces unit abroad when his commander, John Nemecek, did something

terrible. Now the high-ranking government official and cold-blooded sociopath is determined to eliminate anyone who knows about it—like Nate, who's hidden himself away in Wyoming's Bighorn Mountains. And he knows exactly how Nemecek will do it—by targeting Nate's friends to draw him out. That includes his friend, game warden Joe Pickett, and Pickett's entire family. The only way to fight back is outside the law. Nate knows he can do it, but he isn't sure about his straight-arrow friend. And all their lives could depend on it. ONE OF LIBRARY

Offering an in-depth look into the private life behind one of the most important athletes of the 20th century, this comprehensive biography of Johnny Unitas explores the man who made the quarterback position the crux of a football team's offense and was an icon to millions of fans across the country. From his upbringing near the Monongahela River and becoming the Golden Arm to his retirement and battle with numerous physical ailments, this book reveals how he was affected by his boss's bets that were as much as \$1 million per game and his livid anger at Colts management over his trade to Chargers. It also includes more than 15,000 words of never-before-published commentary directly from Unitas himself about his career, fame, moments of great personal pride, and others he'd rather forget."

Want to know where Chuck Palahniuk's tonsils currently reside? Been looking for a naked mannequin to hide in your kitchen cabinets? What goes on at the Scum Center? How do you get to the Apocalypse Cafe? In the closest thing he may ever write to an autobiography, Chuck Palahniuk provides answers to all these questions and more as he takes you through the streets, sewers, and local haunts of Portland, Oregon. According to Katherine Dunn, author of the cult classic *Geek Love*, Portland is the home of America's "fugitives and refugees." Get to know these folks, the "most cracked of the

crackpots," as Palahniuk calls them, and come along with him on an adventure through the parts of Portland you might not otherwise believe actually exist. Here are strange personal museums, weird annual events, and ghost stories. Tour the tunnels under downtown Portland. Visit swingers' sex clubs, gay and straight. See Frances Gabe's famous 1940s Self-Cleaning House. Look into strange local customs like the I-Tit-a-Rod Race and the Santa Rampage. Learn how to talk like a local in a quick vocabulary lesson. Get to know, I mean really get to know, the animals at the Portland zoo. Oh, the list goes on and on.

It's estimated that 50 to 60 million Americans count birding among their hobbies. Some hang feeders in their backyards and accumulate yard lists; others participate in annual "Christmas Counts"; a select few travel to the ends of the earth in an effort to see every bird in the world. With *Fifty Places to Go Birding Before You Die*, Chris Santella takes the best-selling "Fifty Places" recipe and applies it to this most popular pastime.

Santella presents some of the greatest bird-watching venues in the United States and abroad through interviews with prominent birders, from tour leaders and conservationists to ornithologists and academics. Interviewees include ornithologist Kenn Kaufman; David Allen Sibley, author and illustrator of *The Sibley Guide to Birds*; Rose Ann Rowlett, the "mother of modern birding"; John Fitzpatrick, director of the Cornell Lab of Ornithology; and Steve McCormick, president and CEO of The Nature Conservancy. The places vary from the urban (New York City's Central Park) to the mystical (the cloud forests of Triunfo in Chiapas, Mexico) to the extremely remote (the sub-Arctic islands of New Zealand). The book includes 40 gorgeous photographs that capture the vibrancy of our feathered friends, and the beautiful places they call home.

Don't just make a toy, create an heirloom! Toymaker Brad Anderson's motto is "Wood toy plans for all ages. Designed to be built tough, to be passed down, and to last." Join him as he shares decades of woodworking wisdom so you can make durable, kid-safe vehicle toys that youngsters will enjoy. Starting with sections on wood selections, tool guides, design basics, and toy safety, he then jumps into 15 projects with high-quality illustrated step-by-step instructions for a racecar, fighter jet, helicopter, tugboat, golf cart, skip loader and more, all include moving parts that swing, open, shut, roll, and spin! The projects range from beginner to advanced so there is a project for everyone to tackle. Delight children everywhere with their own homemade toy.

[The Story of Edgar Sawtelle](#) Springer  
A Treasury of Wooden Toys, Volume 4 offers home craftsmen detailed how-to construction information for building a selection of fine wooden toys. The seven full-color, illustrated chapters contain step-by-step instructions for building a classic sport plane, a storybook toy car, an old French army tank, and two designs of pull toys. A Mack dump truck and an antique

steamroller complete the book. Several of the projects utilize a wood lathe, or alternate construction of component parts. Each chapter includes full-size, dimensioned scale plans drawn by the author. The pull toys, a mechanical turtle and a mechanical lady bug, have moving legs which oscillate realistically to delight a young child. The Mack dump truck rolls on commercially-available turned wooden wheels. Its dump bed can be manually raised to empty the contents. Mack trucks have a mystique all their own, and this near-scale model won't disappoint. The toys in this volume are intended for children old enough to be taught how to operate them and care for them. The old Aveling and Porter 1898 vintage road machine is included as the last chapter to appeal to the experienced craftsman with a well-equipped woodworking shop. It includes large, spoked wooden drive wheels with carefully-detailed instructions for making them in a home workshop. The boiler, the drive wheels, the front roller and the smokestack are all made on the lathe. The steamroller is functional and, in appearance, is near scale. As the big drive wheels roll, the flywheel is driven through

a simple hairband, and rotates in the opposite direction, turning a wire crankshaft that drives an oscillating piston. The movement of these components is a major attraction of the model. It features a canopy which doubles as a handhold to drive the toy. Although an intricate project, it is designed to be sturdy, and tough enough for child's play after an adult explains the care required to use it with it without damaging it.

Originally devised as a guide for converting from imperial to metric measurements, 'The Metric Handbook' has since been totally transformed into a major international handbook of planning and design data. The second edition has been completely updated, with most chapters being totally rewritten, to meet the needs of the modern designer. The book contains nearly 50 chapters dealing with all the principal building types from airports, factories and warehouses, offices shops and hospitals, to schools, religious buildings and libraries. For each building type 'The Metric Handbook' gives the basic design requirements and all the principal dimensional data. Several chapters deal with general aspects of building such as materials, lighting, acoustics and tropical design. There are also sections on general design data, including details of human dimensions and space requirements. It is a unique authoritative reference for solving everyday planning problems. In its various editions it has sold over 100,000 copies

worldwide, and continues to be a reference work belonging on every design office desk or drawing board.

Generations of Americans have developed an image of violence in the "Wild West" through books and films. But what conditions really resulted in violence on

the American frontier between the 1880s and 1910s? How frequently did violence occur, and what forms did it take? Johnson explores these questions through the lens of the mining and range wars that plagued the region during this period. The author opens with an introductory essay that situates violence within social, political, and economic circumstances of the time, considering smaller cases of interpersonal violence and larger conflicts. Documents are then presented to illuminate two case studies of collective violence—the Johnson County range war in northern Wyoming and the 1913–1914 coal strike in southern Colorado resulting in the Ludlow Massacre. The closing epilogue examines the role both incidents played in shaping the collective memory and cultural history of the American West. The book's format provides readers with both a general understanding of the history of western violence and the context of specific historical cases that allow for more in-depth study and comparison.
