"Territorial cohesion"
strives for a more
balanced spatial
development and seeks to
improve integration
throughout the EU. The
scientific articles in this
volume examine the
interpretations of this
term, the challenges of
European spatial
development policy, and
the problems and
concepts involved in
achieving territorial
cohesion. Two short
reports illustrate the
implementation of
territorial cohesion on the
basis of two research
projects.

The Companion to
Medieval Palermo offers a
panorama of the history
of Medieval Palermo from
the sixth to the fifteenth
century. Often described
by contrast with the
communal reality of
Medieval Italy as
submitted to a royal
(external) authority, the
city is here given back its
density and creativity.
Important themes such as
artistic and literary
productions, religious
changes or political
autonomy are thus
explored anew. Some
fields recently
investigated are the
object of particular
scrutiny: the history of the
Jews, Byzantine or Islamic
Palermo are among them.

Over the last three
decades, archaeologists
have progressively
embarked on field-walking
projects all around the
Mediterranean basin. The
aim of most of these
projects is to investigate
the ancient settlement
and landscape dynamics
of specific Mediterranean
regions. They greatly
contribute to the new
liveliness which
characterizes present-day
classical archaeology, not
only by introducing new
research methods but
also, and in particular, by
widening its subject
matter to include the
history of societies in the
margins of the Graeco-
Roman urban world. It is
within this recent tradition
that the present book has
been written; the author
aims to examine the
ancient settlement and
societal dynamics of the
Brindisi region, in the
north-east of the Salento

peninsula. The field surveys indicate that during the pre-Roman period the regional society was characterized by processes of centralization and urbanization.

Subsequently, from the 3rd century BC onwards, it gradually integrated into the Roman orbit. Burgers emphasizes an active indigenous role in the successive colonial situations in southern Italy. He focuses on the internal dynamics of the local communities and investigates how social strategies manifested themselves, especially in external contacts and in the organization of settlement and landscape.

In this latest collection of his articles, of which seven are written especially for this volume, Ian Hodder captures and continues the lively controversy of the 1980s over symbolic and structural approaches to archaeology. The book acts as an overview of the

developments in the discipline over the last decade; yet Hodder's brief is far wider. His aim is to break down the division between the intellectual and the "dirt" archaeologist to demonstrate that in this discipline more than any other, theory must be related to practice to save effectively our rapidly diminishing heritage.

BRILL

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely

copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Giustizia civile BRILL

This book studies the converted Jews in sicily following the 1492 expulsion, using contemporary sources to examine their legal, economic and cultural circumstances. It also sheds new light on Spanish Royal policies and the establishment of the Inquisition in Sicily.

Le Imposte dirette

Over the past decade, a new set of interactive, open, participatory and networked spatial media have become widespread. These include mapping platforms, virtual globes, user-generated spatial databases, geodesign and architectural and planning

tools, urban dashboards and citizen reporting geo-systems, augmented reality media, and locative media.

Collectively these produce and mediate spatial big data and are re-shaping spatial knowledge, spatial behaviour, and spatial politics. *Understanding Spatial Media* brings together leading scholars from around the globe to examine these new spatial media, their attendant technologies, spatial data, and their social, economic and political effects. The 22 chapters are divided into

the following sections:
 Spatial media technologies
 Spatial data and spatial media
 The consequences of spatial media
Understanding Spatial Media is the perfect introduction to this fast emerging phenomena for students and practitioners of geography, urban studies, data science, and media and communications.
