**Text Book of  
Engineering Drawing**  
New Age International  
This book is primarily  
designed to serve as a  
textbook for  
undergraduate  
students of electrical,  
electronics, and  
computer engineering,  
but can also be used  
for primer courses  
across other disciplines  
of engineering and  
related sciences. The  
book covers all the  
basic aspects of  
electronics  
engineering, from  
electronic materials to  
devices, and then to  
basic electronic  
circuits. The book can  
be used for freshman  
(first year) and  
sophomore (second  
year) courses in  
undergraduate  
engineering. It can also

be used as a  
supplement or primer  
for more advanced  
courses in electronic  
circuit design. The  
book uses a simple  
narrative style, thus  
simplifying both  
classroom use and self  
study. Numerical  
values of dimensions of  
the devices, as well as  
of data in figures and  
graphs have been  
provided to give a real  
world feel to the device  
parameters. It includes  
a large number of  
numerical problems  
and solved examples,  
to enable students to  
practice. A laboratory  
manual is included as a  
supplement with the  
textbook material for  
practicals related to  
the coursework. The  
contents of this book  
will be useful also for  
students and  
enthusiasts interested  
in learning about basic

electronics without the benefit of formal coursework.

The Story of My  
Experiments with Truth  
recounts Gandhiji's  
journey from being  
Mohandas to becoming  
the Mahatma and also  
recollects the various  
incidents that lead him  
to develop the ideology  
of Ahimsa. Starting  
with his days as a boy,  
Gandhi takes one  
through his trials and  
turmoils and situations  
that moulded his  
philosophy of life;  
going through child  
marriage, his studies in  
England, practicing  
Law in South Africa;  
and his Satyagraha  
there; to the early

beginnings of the Independence movement in India. The book is divided into 5 parts covering his childhood, his adolescent experiments at drinking, smoking, stealing and eating meat; his early marriage at the age of 13 years; and his education and career which took him to Africa.
