What This Cruel War Was Over Princeton Review

"We've got some difficult days ahead," civil rights activist Martin Luther King, Jr., told a crowd gathered at Memphis's Clayborn Temple on April 3, 1968. "But it really doesn't matter to me now because I've been to the mountaintop. . . . And I've seen the promised land. I may not get there with you. But I want you to know tonight that we as a people will get to the promised land." These prophetic words, uttered the day before his assassination, challenged those he left behind to see that his "promised land" of racial equality became a reality; a reality to which King devoted the last twelve years of his life. These words and other are commemorated here in the only major one-volume collection of this seminal twentieth-century American prophet's writings, speeches, interviews, and autobiographical reflections. A Testament of Hope contains Martin Luther King, Jr.'s essential thoughts on nonviolence, social policy, integration, black nationalism, the ethics of love and hope, and more.

The question "Do black landscapes matter?" cuts deep to the core of

American history. From the plantations of slavery to contemporary segregated cities, from freedman villages to northern migrations for freedom, the nation's landscape bears the detritus of diverse origins. Black landscapes matter because they tell the truth. In this vital new collection, acclaimed landscape designer and public artist Walter Hood assembles a group of notable landscape architecture and planning professionals and scholars to probe how race, memory, and meaning intersect in the American landscape. Essayists examine a variety of U.S. places—ranging from New Orleans and Charlotte to Milwaukee and Detroit—exposing racism endemic in the built environment and acknowledging the widespread erasure of black geographies and cultural landscapes. Through a combination of case studies, critiques, and calls to action, contributors reveal the deficient, normative portrayals of landscape that affect communities of color and question how public design and preservation efforts can support people in these places. In a culture in which historical omissions and specious narratives routinely provoke disinvestment in minority communities, creative solutions by designers, planners, artists, and residents are necessary to activate them in novel ways. Black people have built and shaped the American landscape in ways that can never be fully known. Black Landscapes Matter is a timely and necessary reminder that without recognizing and reconciling these histories and spaces, America's past and future cannot be understood.

Why Reconstruction Failed Westholme Publishing

Stampp's classic work offers a revisionist explanation for the radical failure to achieve equality for blacks, and of the effect that Conservative rule had on the subsequent development of the South. Refuting former schools of thought, Stampp challenges the notions that slavery was somehow just a benign aspect of Southern culture, and how the failures during the reconstruction period created a ripple effect that is still seen today. Praise for *The Era of*

*Reconstruction*: “. . . This “brief political history of reconstruction” by a well-known Civil War authority is a thoughtful and detailed study of the reconstruction era and the distorted legends still clinging to it.”—Kirkus Reviews “It is to be hoped that this work reaches a large audience, especially among people of influence, and will thus help to dispel

some of the myths about Reconstructions that hamper efforts in the civil rights field to this day.”—Albert Castel, Western Michigan University

In this unprecedented account, Chandra Manning With stunning poise and narrative verve, Manning explores how the Union and Confederate soldiers came to identify slavery as the central issue of the war and what that meant for a tumultuous nation. **The 1960s** Basic Books

This volume serves as an invaluable study guide covering all of the key political, social, and cultural concepts of the turbulent 1960s. The 1960s were a polarizing decade, beginning brightly and with hope but ending in disappointment and disarray. By the end, traditional values had been subverted, political institutions had been

overturned, and marginalized groups had battled their own government to win equal rights and freedoms. The clear-cut foreign policies of the postwar era brought mixed results, and the world's mightiest nation became mired in a war it could not win. This overview of the 1960s covers all of the key political, social, and cultural concepts of the decade through topical and biographical entries, primary documents, a sample document-based essay question and top tips, and period-specific learning objectives. The book contains an Introduction that presents the historical themes of the period. Alphabetical encyclopedic entries relating to the period specific themes comprise the core reference material in the book. The book also contains a range of primary documents with their own introductions and a sample document-based essay question. Other features include a list of "Top Tips," a thematically tagged chronology, and a list of specific learning objectives readers can use to gauge their working knowledge and understanding of the period.

**The Dred Scott Case** Greenwood  
Most observers have assumed that school segregation in the United States was exclusively a southern phenomenon. In fact, many northern communities, until recently, engaged in explicit "southern style" school segregation whereby black children were assigned to "colored" schools and white children to white schools. Davison Douglas examines why so many northern communities did engage in school segregation (in violation of state laws that prohibited such segregation) and how northern blacks challenged this illegal activity. He analyzes the competing visions of black empowerment in the northern black

community as reflected in the debate over school integration.

Life During the Black Death Social Studies

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. *Black Reconstruction in America* tells and interprets the story of the twenty years of Reconstruction from the point of view of newly liberated African Americans. Though lambasted by critics at the time of its publication in 1935, *Black Reconstruction* has only grown in historical and literary importance. In the 1960s it joined the canon of the most influential revisionist historical works. Its greatest achievement is weaving a credible, lyrical historical narrative of the hostile and politically fraught years of 1860-1880 with a powerful critical analysis of the harmful effects of democracy, including Jim Crow laws and other injustices. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by David Levering Lewis, this edition is essential for anyone interested in African American history.

The Civil Rights Act of 1964 Harper Collins

In the middle of the fourteenth century a devastating epidemic of plague, commonly known in European history as the "Black Death," swept over the Eurasian continent. This book, based principally on Arabic sources, establishes the means of transmission and the chronology of the plague pandemic's advance through the Middle East. The prolonged reduction of population that began with the Black Death was of fundamental significance to the social

and economic history of Egypt and Syria in the later Middle Ages. The epidemic's spread suggests a remarkable destruction of human life in the fourteenth century, and a series of plague recurrences appreciably slowed population growth in the following century and a half, impoverishing Middle Eastern society. Social reactions illustrate the strength of traditional Muslim values and practices, social organization, and cohesiveness. The sudden demographic decline brought about long-term as well as immediate economic adjustments in land values, salaries, and commerce. Michael W.
