cavities, and the size and thickness of the mold. Afterwards, each of the required sub-systems of the mold is designed, which sometimes requires the redesign of previously designed subsystems.Injection Mold Design Engineering | David Kazmer | downloadDecember 5, 2017. Injection Mold Design. When an injection mold designer is approached to build a mold for plastic components, there are many critical design considerations for different types of injection molds, regardless of the industry. Plastic injection molding is the manufacturing process of choice for engineers seeking plastic parts for their products ranging from toys and combs to high-precision molded parts required in several different industries.Injection Mold Design

Engineering Considerations  
Plastics engineer Jennifer Schmidt has seen these changes first-hand as a mold and hot runner designer, an application engineer, and now as a senior Autodesk Moldflow simulation instructor at the American Injection Molding Institute located in Erie, PA.  
Injection Mold Design: Why Simulation is Essential ...  
The primary objective of this course is to address the issues that are most often poorly understood and overlooked in the mold engineering process. This requires looking beyond just the classical mechanical design of a mold and focus more on the details that influence the formation of the plastic product, its quality, performance and productivity.  
Mold Design and Engineering - American Injection Molding

...The invention of an injection molding machine was achieved by John Wesley who injected hot celluloid into a mold which resulted in billiard balls which were used as a replacement for ivory which was based on the pressure die casting technique for metals.  
[7]Simulation and Design of a plastic injection Mold  
Even Simple Parts Can Require Complex Mold Design  
At its simplest, injection molding is about orienting cavities in three-dimensional space with a parting line that allows free ejection of the cooled, solid resin parts. Simply determining the location of the parting line can be nontrivial.
