In an exhibition shown from 20 January to 27 May 1996, the Kunsthalle Tübingen presented a thoughtfully prepared selection of many of Renoir's most important paintings from his more than five decades of creative life. The first comprehensive, scholarly retrospective ever devoted to the artist in Germany and presented only in Tübingen, the exhibition offered a view of a significant cross-section of the painter's complete oeuvre. Each of the works exhibited is illustrated in this volume in a full-page plate. Paintings representing the full spectrum of Renoir's themes and including some of the most noteworthy works in major international collections and museums in such cities as Washington, D.C., New York, Philadelphia, Sao Paulo, Stockholm, Madrid, London, Paris, St. Petersburg, Zurich, Tokyo, Hiroshima and Berlin - all were provided on loan for the exhibition - provide enlightening insights into the work of this artistic genius.

Primary experience, gained through the senses, is our most basic way of understanding reality and learning for ourselves. Our culture, however, favors the indirect knowledge gained from secondary experience, in which information is selected, modified, packaged, and presented to us by others. In this controversial book, Edward S. Reed warns that secondhand experience has become so dominant in our technological workplaces, schools, and even homes that primary experience is endangered. Reed calls for a better balance between firsthand and secondhand experience, particularly in our social institutions. He contends that without opportunities to learn directly, we become less likely to think and feel for ourselves. Since the scientific revolution of the seventeenth century, Western epistemological tradition has rejected primary experience in favor of the abstractions of secondhand experience. Building on James Gibson's concept of ecological psychology, Reed offers a spirited defense of the reality and significance of ordinary experience against both modernist and postmodernist critics. He expands on the radical critiques of work, education, and art begun by William Morris and John Dewey, offering an alternative vision of meaningful learning that places greater emphasis on unmediated experience, and he outlines the psychological, cultural, and intellectual conditions that will be needed to foster that crucial change.
