 Calculus 141, Section 6.5 Moments And Center Of Gravity ...
 Calculus 141, section 6.5 Moments and Center of Gravity notes by Tim Pilachowski Finding the center of gravity of an object or a system might be described as summing up differential weights and equating them to simpler system—sounds elegant doesn't it? But after all, isn't that what mathematics is all
 Calculus 141, section 6.5 Moments and Center of Gravity
 Calculus 141, section 6.5 Moments and Center of Gravity Let R be the region between the graphs of $f(x) = (x + 4)^2$ and $g(x) = (x - 4)^2$ on $[0, 1]$. Find the moments, M_x and M_y and the area A of the region R.
