ALEXANDER BARKER

Parent-child Relations

Routledge

This book presents innovations in teaching and learning science, novel approaches to science curriculum, cultural and contextual factors in promoting science education and improving the standard and achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development and research in science education in the context of international benchmarking tests to measure the knowledge of mathematics and science such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science, mathematics and reading like Programme for

International Student Assessment (PISA). Among the high achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea, Japan, Hong Kong and China (Shanghai) are notable. This book investigates the reasons why students from East Asian countries consistently claim the top places in each and every cycle of those study. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection and vision on emerging trends, pedagogical innovations and research-informed practices in science education in the region. It provides insights into effective educational strategies and development of science education to international readers.

Christianity and Developmental Psychopathology SAGE
Family Policy and the American Safety Net shows how families adapt to economic and demographic change. Government programs

provide a safety net against the new risks of modern life. Family policy includes any public program that helps families perform their four universal obligations of caregiving, income provision, shelter, and transmission of citizenship. In America, this means that child care, health care, Social Security, unemployment insurance, housing, the quality of neighborhood schools, and anti-discrimination and immigration measures are all key elements of a de facto family policy. Yet many students and citizens are unaware of the history and importance of these programs. This book argues that family policy is as important as economic and defense policy to the future of the nation, a message that is relevant to students in the social sciences, social policy, and social work as well as to the public at large. .

Parent-Child Relations

Springer Science & Business Media

This easy-to-read, comprehensive guide contains what you need to know on how to parent with confidence. Packed with advice and powerful tips, using the latest research on child development and parenting techniques, it offers a mine of information on how to let children flourish, take the frustration out of parenting and develop happy family relations. Authors provide guidance on developing character, knowledge, values, and skills, as well as a faith-based outlook in children, benefitting parents with kids of all ages. The many strategies and techniques offered include: teaching children how to problem-solve, make decisions, and develop self-esteem. Raising God conscious, moral, successful children, with a sense of civic responsibility in today's world is not easy. It is also not impossible. Effective parenting is the key.

History, Theory, Research, and Context, Instructor's Manual

W/Test Bank Psychology Press

The study of parent-child relationships has long

been of interest to behavioral scientists, both for its theoretical importance and for its practice and policy implications. There are, however, certain limitations to the knowledge in this area.

First, research on parents and children is spread throughout a number of disciplines and as a consequence is not well integrated. Further, there has been little dialogue among researchers concerned with parents of young children and those interested in middle-aged and elderly parents and their offspring. The present volume predicates the notion that there is considerable similarity in the issues explored by researchers on different points of the life course. Contributions by leading scholars in psychology, sociology, and anthropology are organized into four sections, each of which contains a treatment of at least two stages in the life course. The sections cover attachment in early childhood and in later life, life course transitions, relationships within families, and the influence of social structural factors on parent-child relations. Although the chapters make important

contributions to basic research and theory, many also deal with issues of public concern, such as day care, maternal employment, gay and lesbian relationships, and care of the elderly.

Parent-Child Relations
SAGE

Now in the Ninth Edition, Jerry Bigner's "Parent-Child Relations," the classic resource for child development professionals and parents themselves, has undergone a thorough revision anchored by the vision of the late Dr. Bigner and executed by new co-author, Clara Gerhardt. Maintaining its fundamental structure and unique approach, the text uses family systems and systemic family development theory as a framework to explore how parent-child relations change in tandem with developmental changes occurring with children, adults, and the wider family system. Thoughtful updates and revisions were done to increase the effectiveness and currency of the text. The text continues to provide strong emphasis on various theoretical and practical models pertaining to parenting. For decades now, this

classic text has prepared countless teachers and practitioners by its proven and practical approach, utilizing family systems and systemic family development theory to explore how parent-child relations change in tandem with developmental changes occurring with children, adults, and the wider family system. The most comprehensive and current resource available to students as they prepare for working with parents and families, and for their roles as parents themselves, this best-selling resource carries on the essential message of its originator, Dr. Jerry Bigner, and will continue to nurture future family scholars and practitioners for years to come.

Creating Compassionate Kids: Essential Conversations to Have with Young Children SAGE Publications

This book is the first of its kind to focus specifically on children's attachment to fathers, and explores the connections among fathering, family dynamics, and attachment relationships. It includes theoretical, methodological and research reports written by an interdisciplinary group of researchers from

around the globe. The purpose of this book is to familiarize the reader with the conceptualization, measurement and provisions of the attachment bond between children and their fathers, from infancy through young adulthood and across diverse individual, family, community, and cultural systems. Recent empirical findings suggest that new methods of measuring child-father attachment are warranted, and that attachment to fathers may be unique from, but complementary to attachment to mothers. These findings also suggest that attachment to fathers uniquely predicts children's healthy developmental outcomes, and these findings are robust across various contexts, but these predictive relationships are best understood within context. This book provides a summary of current scholarly knowledge of fathering and attachment, and describes future directions to be explored by professionals, policy makers and practitioners within family services, education, and social work settings. It is also of interest to the general public. This book was

published as a special issue of *Early Child Development and Care*.
Parent-Child Relations
Pearson New International Edition Springer

In the 3rd edition of *Methods of Family Research*, authors Theodore N. Greenstein and Shannon N. Davis continue to help students better understand the research results they encounter in doing family research. Using real-life examples to illustrate important concepts that family researchers encounter regularly, the text covers traditional quantitative methods, qualitative methods, and the mixed-method approach. Written in a clear, concise style, this book differs from other research methods texts, which focus on teaching students how to produce research, by teaching them how to consume research in a sophisticated, effective manner. The book introduces the basic concepts of social science research methods without excessive technical details.

Parents, Poverty and the State Policy Press
Young children can surprise us with tough questions. Tominey's essential guide teaches us

how to answer them and foster compassion along the way. If you had to choose one word to describe the world you want children to grow up in, what would it be? Safe? Understanding? Resilient? Compassionate? As parents and caregivers of young children, we know what we want for our children, but not always how to get there. Many children today are stressed by academic demands, anxious about relationships at school, confused by messages they hear in the media, and overwhelmed by challenges at home. Young children look to the adults in their lives for everything. Sometimes we're prepared... sometimes we're not. In this book, Shauna Tominey guides parents and caregivers through how to have conversations with young children about a range of topics—from what makes us who we are (e.g., race, gender) to tackling challenges (e.g., peer pressure, divorce, stress) to showing compassion (e.g., making friends, recognizing privilege, being a helper). Talking through these topics in an age-appropriate manner—rather than

telling children they are too young to understand—helps children recognize how they feel and how they fit in with the world around them. This book provides sample conversations, discussion prompts, storybook recommendations, and family activities. Dr. Tominey's research-based strategies and practical advice creates dialogues that teach self-esteem, resilience, and empathy: the building blocks for a more compassionate world.

A Content-Based Approach Psychology Press

The third edition of *Infancy* is a comprehensive and accessible core text for courses in infant development and early childhood development. Gross's sensitive and engaging teaching voice seamlessly weaves together research and theory with current issues of diversity and culture. *Handbook of Family Theories* Routledge This handbook provides an interdisciplinary perspective on theory, research and methodology on dynamic processes in parent-child relations. It focuses on cognitive, behavioural and

relational processes that govern immediate parent-child interactions and long-term relationships. Parenting Beliefs, Behaviors, and Parent-Child Relations Prentice Hall

Research on parenting through the life course has developed around two separate approaches. Evolutionary biology provides fresh perspectives from life history theory using behavioral ecology and parental investment theory. At the same time, the social and behavioral sciences integrates research from long-term studies of individual development and from the collection of life histories. This path-breaking book advances evolutionary, life history research by integrating perspectives of these two approaches into a biosocial science of the life course. It examines parenthood as a commitment extending throughout life and focuses on the impact on parental and child behavior of changes in the timing, distribution, and intensity of parental investment. This perspective is particularly appropriate for research on parenting since the family is the universal

human institution within which the bearing and rearing of children has been based and which transmits traditions, beliefs, and values to the young.

History, Theory, Research, and Context Routledge

The third edition of *Handbook of Marriage and the Family* describes, analyzes, synthesizes, and critiques the current research and theory about family relationships, family structural variations, and the role of families in society. This updated Handbook provides the most comprehensive state-of-the-art assessment of the existing knowledge of family life, with particular attention to variations due to gender, socioeconomic, race, ethnic, cultural, and life-style diversity. The Handbook also aims to provide the best synthesis of our existing scholarship on families that will be a primary source for scholars and professionals but also serve as the primary graduate text for graduate courses on family relationships and the roles of families in society. In addition, the involvement of chapter authors from a variety of fields including family psychology, family sociology, child

development, family studies, public health, and family therapy, gives the Handbook a multidisciplinary and interdisciplinary framework.

Infancy Psychology Press
Naomi Eisenstadt and Carey Oppenheim explore the radical changes in public attitudes and public policy concerning parents and parenting. Drawing on research and their extensive experience of working at senior levels of government, the authors challenge expectations about what parenting policy on its own can deliver. They argue convincingly that a more joined-up approach is needed to improve outcomes for children: both reducing child poverty and improving parental capacity by providing better support systems. This is vital reading for policy makers at central and local government level as well as those campaigning for the rights of children.

Parenting across the Life Span Routledge

The purpose of this book, is to present a rather simple argument. Parents' thoughts about childrearing and the ways in which they interact with children to achieve particular parenting or

developmental goals, are culturally determined.

Within any culture, children are shaped by the physical and social settings within which they live, culturally regulated customs and childrearing practices, and culturally based belief systems. The psychological "meaning" attributed to any given social behavior is, in large part, a function of the ecological niche within which it is produced.

Clearly, it is the case that there are some cultural universals. All parents want their children to be healthy and to feel secure. However, "healthy" and "unhealthy," at least in the psychological sense of the term, can have different meanings from culture to culture.

Empowering Parents

InterVarsity Press
These companion volumes bring together research and theoretical work that addresses the relations between social context and the development of children. They allow for the in-depth discussion of a number of vital metatheoretical, theoretical, and methodological issues that have emerged as a result of increased investigation in these

areas. For example: Which methodological and statistical procedures are appropriate and applicable to studies of social context and processes of development? Should the nature of social context be reconceptualized as something more than different levels of some social independent variable? Are theories of development that do not consider social context incomplete? Will the increasingly finer definitions of social context lead to extreme situationism and contextualism? As developmental theory and investigation continues to address relationships between social and cognitive development, it becomes increasingly important that issues concerning social context be elaborated and discussed.

Foundations and

Approaches OUP USA

This book argues that a theory of crime specific to the African American experience is justified by qualitative and quantitative data, not just because of the disproportionately higher percentage of African Americans (in the U.S. population) who are offenders, but also

because of the vastly higher percentage of Black Americans who are non-offenders. *Development from Birth to Age 3* Psychology Press NOTE: Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for the Enhanced Pearson eText may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. This package includes the Enhanced Pearson eText and the print bound version. This life-span approach to parent-child relations gives readers a comprehensive, contemporary look at parent theory, research, and applications, as well as numerous historical and cultural contexts that affect parent-child relations. It covers every stage of development, including older parents and their adult children, and uses an inclusive approach that looks at a variety of differing family contexts, such as foster families, military families, and families with an LGBT member, as well as the influence of culture and ethnicity on family beliefs

and behaviors. The history of theoretical and research influences of childrearing is presented early to help students understand why parents today hold certain beliefs regarding how to raise children. Then, theory and research are interwoven through the book. Another early chapter on strategies and techniques sets the stage for ongoing discussions of parent-child relations throughout the lifespan. Written with the student in mind, Phyllis Heath's *Parent-Child Relations* presents numerous examples, discussions of the influence of technology on the lives of parents and children, pop-up videos (in the Pearson Enhanced video only) to add clarity to the material, critical thinking questions to encourage students to consider their views regarding the material, and SPOTLIGHT features presenting the influence of technology, diversity, and poverty on families. Also included in the Pearson Enhanced eText are pop-up Test Your Knowledge questions with feedback for formative assessment and pop-up definitions of key terms. Improve mastery and retention with the Enhanced Pearson eText*

The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content. The Enhanced Pearson eText is: Engaging. The new interactive, multimedia learning features were developed by the authors and other subject-matter experts to deepen and enrich the learning experience. Convenient. Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad(r) and Android(r) tablet.* Affordable. Experience the advantages of the Enhanced Pearson eText along with all the benefits of print for 40% to 50% less than a print bound book. * The Enhanced eText features are only available in the Pearson eText format. They are not available in third-party eTexts or downloads. *The Pearson eText App is available on Google Play and in the App Store. It requires Android OS 3.1-4, a 7 or 10 tablet, or iPad iOS 5.0 or later. 0134290054 / 9780134290058 Parent-Child Relations: Context, Research, and Application, 3/e Package consists of: 0134520068 /

9780134520063 Parent-Child Relations: Context, Research, and Application, 3/e, Enhanced Pearson eText - Access Card 0134461142 / 9780134461144 Parent-Child Relations: Context, Research, and Application, 3/e, Print Bound Version " Parent-Child Play Pearson Educacion Organized by content areas rather than by theory, this comprehensive, accessible handbook helps readers gain greater insight into how key theories have impacted today's family research. Most competing books, organized by theory, do not provide a strong sense of the links between theory and research. Using the 2000 and 2010 decade-in-review issues of the Journal of Marriage and Family as a resource, the book addresses the most important topics impacting family studies research today. The introductory chapter, written by the editors, provides an overview of the role family theories have had on the field. This chapter is followed by 23 others on family-related content areas written by renowned scholars in the

field. The book is organized around the most important domains in the field: parenting and parent-child relationships, romantic relationships, conflict and aggression, structural variation and transitions, demographic variations, and families and extra-familial institutions. Each of the contributors describes how theory has been used to generate new knowledge in the field and suggests future directions for how theory may be used to extend our knowledge base. The book helps readers acquire a working knowledge of the key family science theories, findings, and issues and understand how researchers make use of these theories in their empirical efforts. To maximize accessibility, each of the renowned contributors addresses a common set of issues in their chapter: • Introduction to the content area • Review of the key topics, issues, and findings • A description of each of the major theories used to study that particular content area • Limitations of the theories • Suggestions for better use of the theories and/or new theoretical advances • Conclusions about

future theoretical developments. An ideal text for graduate and/or advanced undergraduate family theories courses, this book's unique organization also lends itself to use in content-based family studies/science courses taught in family studies, human development, psychology, sociology, communication, education, and nursing. Due to its comprehensive and current approach, the book also appeals to scholars and researchers in these areas.

Parent-Child Relations across the Life Course

Routledge

"Harriet Churchill powerfully juxtaposes British policies around parenting with the experiences and

perspectives of parents. This encounter is both a painful and productive one, enabling her to suggest ways in which parental rights and responsibilities might be re-thought." John Clarke, Professor of Social Policy, The Open University
 "Harriet Churchill's new book is a comprehensive, well-written and extremely useful review of recent family policy and research. Recommended reading." Val Gillies, Families & Social Capital Research Group, London South Bank University
 This timely book examines parental rights to 'welfare state support' and parental responsibilities for child welfare in relation to recent social policy agendas pursued in the UK. The analysis of

parental rights and responsibilities is informed by child well-being research, state welfare analysis and sociological research about parental perspectives and the multiple contexts of parenting and childhood. The book critically examines several major developments in parental rights and responsibilities in recent years. It calls for social policies to better recognise the diversity of parental perspectives, parenting contexts and family support needs as part of the broader agenda to promote social well-being. The book is valuable reading for students, researchers and practitioners in social policy and child and family services.
