This book covers the heterogeneity of Chilean literary production from the times of the Spanish conquest to the present. It shifts critical focus from national identity and issues to a more multifaceted transnational, hemispheric, and global approach. Its emphasis is on the paradigm transition from the purportedly homogeneous to the heterogeneous.

A History of Chilean Literature

Cambridge University Press
Paul J. Vanderwood offers a fascinating look at the events, beliefs, and circumstances that have motivated popular devotion to Juan Soldado, a Mexican folk saint. In his mortal incarnation, Juan

Soldado was Juan Castillo Morales, a twenty-four-year-old soldier convicted of and quickly executed for the rape and murder of eight-year-old Olga Camacho in Tijuana in 1938. Immediately after Morales's death, many people began to doubt the evidence of his guilt, or at least the justice of his brutal execution. People reported seeing blood seeping from his grave and hearing his soul cry out protesting his innocence. Soon the "martyred" Morales was known as Juan Soldado, or John the Soldier. Believing that those who have died unjustly sit closest to God, people began visiting Morales's grave asking for favors. Within months of his death, the young soldier had become a popular saint. He is not recognized by the Catholic Church, yet thousands of people have made pilgrimages to his gravesite. While Juan Soldado is well known in Tijuana, southern California's Mexican American community, and beyond, this book is the first to situate his story within a broader exploration of how and why popular canonizations such as his take root and flourish. In addition to conducting

extensive archival research, Vanderwood interviewed central actors in the events of 1938, including Olga Camacho's mother, citizens who rioted to demand Morales's release to a lynch mob, those who witnessed his execution, and some of the earliest believers in his miraculous powers. Vanderwood also interviewed many present-day visitors to the shrine at Morales's grave. He describes them, their petitions—for favors such as health, a good marriage, or safe passage into the United States—and how they reconcile their belief in Juan Soldado with their Catholicism. Vanderwood puts the events of 1938 within the context of Depression-era Tijuana and he locates people's devotion, then and now, within the history of extra-institutional religious activity. In *Juan Soldado*, a gripping true-crime mystery opens up into a much larger and more elusive mystery of faith and belief.

THE STORY: Growing up in an impoverished family in the Bronx, Moss Hart dreamed of being part of the glamorous world of the theatre. Forced to drop out of school at age thirteen, Hart's famous memoir *Act One* is a classic Hortatio Alger story that plots Hart's unlikely collaboration with the legendary playwright George S. Kaufman. Tony Award-winning writer and director James Lapine has adapted *Act One* for the stage, creating a funny, heartbreaking, and suspenseful play that celebrates the making of a playwright and his play *Once in a Lifetime*. **ACT ONE** offers great fun to a director to utilize over fifty roles, which can be played by a cast as few as twelve, and in a production that can be done as simply or elaborately as desired. Blanquerna Harper Collins Superb general account.' *Times Literary Supplement* The story of the history of Western astrology begins with the philosophers of Greece in the 5th century BC. To the magic and stargazing of Egypt the Greeks added numerology, geometry and rational thought. The philosophy of Plato and later of the Stoics made astrology respectable,

and by the time Ptolemy wrote his textbook the *Tetrabiblos*, in the second century AD, the main lines of astrological practice as it is known today had already been laid down. In future centuries astrology shifted to Islam only to return to the West in medieval times where it flourished until the shift of ideas during the Renaissance.

In an era of brash, expensive, provocative new buildings, a prominent critic argues that emotions—such as hope, power, sex, and our changing relationship to the idea of home—are the most powerful force behind architecture, yesterday and (especially) today. We are living in the most dramatic period in architectural history in more than half a century: a time when cityscapes are being redrawn on a yearly basis, architects are testing the very idea of what a building is, and whole cities are being invented overnight in exotic locales or here in the United States. Now, in a bold and wide-ranging new work, Rowan Moore—former director of the Architecture Foundation, now the architecture critic for *The*

Observer—explores the reasons behind these changes in our built environment, and how they in turn are changing the way we live in the world. Taking as his starting point dramatic examples such as the High Line in New York City and the outrageous island experiment of Dubai, Moore then reaches far and wide: back in time to explore the Covent Garden brothels of eighteenth-century London and the fetishistic minimalism of Adolf Loos; across the world to assess a software magnate's grandiose mansion in Atlanta and Daniel Libeskind's failed design for the World Trade Center site; and finally to the deeply naturalistic work of Lina Bo Bardi, whom he celebrates as the most underrated architect of the modern era.

R. Andrew Chesnut offers a fascinating portrayal of Santa Muerte, a skeleton saint whose cult has attracted millions of devotees over the past decade. Although condemned by mainstream churches, this folk saint's supernatural powers appeal to millions of Latin Americans and immigrants in the U.S. Devotees believe the Bony Lady (as she is affectionately called) to be the fastest and most effective miracle worker, and as such, her statuettes and paraphernalia now outsell those of the Virgin of

Guadalupe and Saint Jude, two other giants of Mexican religiosity. In particular, Chesnut shows Santa Muerte has become the patron saint of drug traffickers, playing an important role as protector of peddlers of crystal meth and marijuana; DEA agents and Mexican police often find her altars in the safe houses of drug smugglers. Yet Saint Death plays other important roles: she is a supernatural healer, love doctor, money-maker, lawyer, and angel of death. She has become without doubt one of the most popular and powerful saints on both the Mexican and American religious landscapes.

The United States in decline? Its admirers and detractors alike claim the opposite: that America is now in a position of unprecedented global supremacy. But in fact, Immanuel Wallerstein argues, a more nuanced evaluation of recent history reveals that America has been fading as a global power since the end of the Vietnam War, and its response to the terrorist attacks of September 11 looks certain to hasten that decline. In this provocative collection, the visionary originator of world-systems analysis and the most innovative social scientist of his generation turns a practiced analytical eye to the turbulent beginnings of the 21st century. Touching on globalization, Islam, racism, democracy, intellectuals, and the state of the Left, Wallerstein upends conventional wisdom to

produce a clear-eyed--and troubling--assessment of the crumbling international order.

This volume presents an integrated epidemiologic, social, and economic analysis of the global epidemics of HIV among sex workers in low- and middle-income countries. The book provides a comprehensive review and synthesis of the available public health and social science data to characterize the nature, scope, and complexities of these epidemics. A community empowerment-based approach to HIV prevention, treatment, and care is outlined and demonstrated to be cost-effective across multiple settings, with a significant projected impact on HIV incidence among sex workers and transmission dynamics overall. The *Global HIV Epidemics among Sex Workers* seeks to assist governments, public health implementing agencies, donors, and sex worker communities to better understand and respond to the epidemics among a

population facing heightened social and structural vulnerabilities to HIV. The book combines a systematic review of the global epidemiology of HIV among sex workers and in-depth case studies of the epidemiology, policy and programmatic responses and surrounding social contexts for HIV prevention, care and treatment in eight countries. The authors employ mathematical modeling and cost-effectiveness analysis to assess the potential country-level impact of a community empowerment-based approach to HIV prevention, treatment, and care among sex workers when taken to scale in four countries representing diverse sociopolitical contexts and HIV epidemics: Brazil, Kenya, Thailand, and Ukraine. In each setting, greater investment in prevention, treatment, and care for sex workers is shown to significantly reduce HIV. Together these findings underline the urgency of further global investment in comprehensive, human rights-based responses to HIV among sex workers. [A History of Western](#)

Why we must reject the illusory consolations of technology and choose revolution over fascism. We are living in apocalyptic times. In *Capital Hates Everyone*, famed sociologist Maurice Lazzarato points to a stark choice emerging from the magma of today's world events: fascism or revolution. Fascism now drives the course of democracies as they grow less and less liberal and increasingly subject to the law of capital. Since the 1970s, Lazzarato writes, capital has entered a logic of war. It has become, by the power conferred on it by financialization, a political force intent on destruction. Lazzarato urges us to reject the illusory consolations of a technology-abetted "new" kind of capitalism and choose revolution over fascism.
