 Marine Gyro-Compasses and Automatic Pilots: A Handbook for Merchant Navy Officers, Volume One: Gyro Compasses is manual for the various types of compass utilized in naval navigation. The text details the apparent motion of fixed objects, and then proceeds to discussing the principles of free gyroscopes. Next, the selection tackles controlled gyroscopes and gyroscopic compasses. The text also covers errors and corrections, along with the comparison of gyroscopic and

magnetic compasses. The subsequent chapters talk about the different types of gyro compasses, such as Sperry Gyro-Compass Mark E. XIV, The Brown Gyro-Compass Types A and B, Arma-Brown Compass, and The Marine Gyrosyn Compass. The book will be of great use to student and professional maritime navigators.

In-depth coverage of instrumentation and measurement from the Wiley Encyclopedia of Electrical and Electronics Engineering The Wiley Survey of Instrumentation and Measurement features 97 articles selected from the Wiley Encyclopedia of Electrical and Electronics Engineering, the one truly indispensable reference for electrical engineers. Together, these articles provide authoritative coverage of the important topic of instrumentation and measurement. This collection also, for the first time, makes this information available to those who do not have access to the full 24-volume encyclopedia. The entire

encyclopedia is available online-visit www.interscience.wiley.com/EEEE for more details. Articles are grouped under sections devoted to the major topics in instrumentation and measurement, including: * Sensors and transducers * Signal conditioning * General-purpose instrumentation and measurement * Electrical variables * Electromagnetic variables * Mechanical variables * Time, frequency, and phase * Noise and distortion * Power and energy * Instrumentation for chemistry and physics * Interferometers and spectrometers * Microscopy * Data acquisition and recording * Testing methods The articles collected here provide broad coverage of this important subject and make the Wiley Survey of Instrumentation and

Measurement a vital resource for researchers and practitioners alike
