A clear, engaging look at the most critical issues of diversity in the 21st century, focusing on the interactions and intersections between culture, the individual, and institutions Understanding Human Differences employs a stimulating inquiry approach to engage students in discussing and debating the most critical issues of diversity in America. Grounded in research from the behavioral and social sciences - including education, psychology, sociology, history, biology, anthropology, women's studies, and ethnic studies - this book uses a question-and-answer format to bring the topics and

issues to life. The conceptual framework for the book examines issues from cultural, individual, and institutional perspectives. The last section of the book focuses on changes already achieved or that need to be implemented in schools and other areas of society to create a more just society. The 6th Edition is thoroughly updated to keep readers aware of new factors impacting ongoing issues of diversity as well as emerging new issues. New content and coverage includes: updated information on the consequences of racial profiling (Ch. 8); new content on current immigration issues including the need for K-12 schools to prepare immigrant youth for college, the increased fears of deportation, and immigrant contributions to the urban economy (Ch. 4); and updated and expanded information on LGBT civil rights (Ch. 11.) With embedded audio-visual components, this open textbook is designed to enhance the quality of the reader's experience with each chapter posing key understandings underpinning inclusion and diversity. Readers are encouraged to answer questions on culture, special learning needs, varied educational contexts, gender diversity and more. This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This well-written, accessible, widely popular resource uses a stimulating inquiry approach to engage readers in discussion and debate around the most critical issues of diversity in America. Grounded in research from behavioral and social sciences—including education, psychology, history, sociology, biology, anthropology, women's studies, and ethnic studies—the book uses the question and answer format to bring real meaning and understanding to the topics. The book's conceptual framework focuses on culture, the individual, and institutions. The first section examines individual concerns, the second section describes the cultural/historical context, and the third section explores racism, classism, sexism, heterosexism, and ableism by addressing all three areas such as historical biases based on cultural norms, individual prejudices based on myths, misconceptions, and stereotypes about diverse groups, and how institutional discrimination advantages dominant group members and disadvantages oppressed groups. The last section focuses on changes already achieved or that need to be implemented in schools and other areas of society to create a more just society.

**Rethinking Multicultural Education** Pearson

Through a step-by-step format for entering into and developing cultural competence, Hogan's text helps students acquire the skills necessary to become culturally competent practitioners. Drawing strongly on the author's cultural diversity work, the book emphasizes the fundamental premise that cultural competence is an ongoing and multilayered process involving personal, interpersonal, and organization-wide levels. The book's four skills approach addresses two key themes: the first two skills increase cultural awareness and understanding, while the third and fourth skills foster effective interpersonal techniques and organization change strategies. For this edition, Hogan includes recent research on ethnic identity and acculturation, as well as material on issues related to national culture and immigration. Within each chapter, Hogan combines both cognitive and experiential learning, thus ensuring that students have the knowledge and ability to apply the core concepts they are learning.
