This collection investigates intermarriage and related relationships around the world since the eighteenth century. The contributors explore how romantic relationships challenged boundary crossings of various kinds – social, geographic, religious, ethnic. To this end, the volume considers a range of related issues: Who participated in these unions? How common were they, and in which circumstances were they practised (or banned)? Taking a global view, the book also questions some of the categories behind these relationships. For example, how did geographical boundaries – across national lines,

distinctions between colonies and metropolises or metaphors of the ‘East’ and the ‘West’ – shape the treatment of intermarriage? What role have social and symbolic boundaries, such as presumed racial, religious or socio-economic divides, played? To what extent and how were those boundaries blurred in the eyes of contemporaries? Not least, how have bureaucracies and law contributed to the creation of boundaries preventing romantic unions? Romantic relationships, the contributors suggest, brought into sharp relief assumptions not only about community and culture, but also about the sanctity of the intimate sphere of love and family. The chapters in this book were originally published as a special issue of *The History of the Family*. Marriages, Families, Intimate Relationships Oxford University Press, USA

The Marriage and Family Experience: Intimate Relationships in a Changing Society
Cengage Learning

Drawing on interviews conducted with Black couples in the US, this book explores relational resilience and identifies unique adaptation strategies that enable couples to overcome the multigenerational effects of violence and sexual mass trauma from slavery and activates compassionate love in flourishing relationships. By applying Appreciative Inquiry (AI) methodology and family systems theory, the book captures the spiritual, emotional, and sexual dimensions in black couple systems that gives meaning to their resilient relationships in the context of contemporary America. Within the framework of compassionate love, the book highlights the need

for researchers and clinicians to include the broader cultural contexts in their sexual trauma-informed studies and interventions. Using genetic studies and empirical evidence, the volume contributes significantly to discussion around Black relationships and historical trauma, and to the broader challenges within race relations in the United States. This book will benefit researchers, academicians, and clinicians with an interest in sexual trauma, marriage and family therapy, and couples counseling more broadly. Readers will also find this book useful when designing research in Black studies, intergenerational issues, or sexual intimacy.

chapters on power and family violence, stress, interpersonal lifestyles, single-parent families and a new appendix on managing a financial partnership. Bird's expertise in the areas of dual career families and stress is evident in the exceptionally strong coverage of these critical topics. Also available with this new edition is an Assessment Manual designed to help students evaluate their own interpersonal relationships.
