YOUNG KEENAN

Najdorf x Najdorf John Wiley & Sons

"Poesía, filosofía, teología: he aquí tres campos hermanados en la persona y en la pluma de Fernando Rielo. Hermanados también en este libro, en una sucesión de ponencias en las que se codean el análisis filosófico con el semántico; el iris temático del Quijote con su aristocrática melancolía y el popular ingenio de Sancho; la disquisición dialéctica frente al comentario textual; el discurrir de lo eterno junto al transcurrir de lo temporal". Esta publicación es una antología de un Simposio celebrado en la Universidad de Georgetown el día 28 de octubre de 1989, que analiza la obra, variada y polivalente, de Fernando Rielo.

The Billiard Encyclopedia Billiard Atlas Publication

A Companion to Media Studies is a comprehensive collection that brings together new writings by an international team to provide an overview of the theories and methodologies that have produced this most interdisciplinary of fields. Tackles a variety of central concepts and controversies, organized into six areas of study: foundations, production, media content, media audiences, effects, and futures Provides an accessible point of entry into this expansive and interdisciplinary field Includes the writings of renowned media scholars, including McQuail, Schiller, Gallagher, Wartella, and Bryant Now available in paperback for the course market.

Unequal Opportunities HarperCollins

Basil of Caesarea is considered one of the architects of the Pro-Nicene Trinitarian doctrine adopted at the Council of Constantinople in 381, which eastern and western Christians to this day profess as "orthodox." Nowhere is his Trinitarian theology more clearly expressed than in his first major doctrinal work, *Against Eunomius*, finished in 364 or 365 CE. Responding to Eunomius, whose Apology gave renewed impetus to a tradition of starkly subordinationist Trinitarian theology that would survive for decades, Basil's *Against Eunomius* reflects the intense controversy raging at that time among Christians across the Mediterranean world over who God is. In this treatise, Basil attempts to articulate a theology both of God's unitary essence and of the distinctive features that characterize the Father, Son, and Holy Spirit--a distinction that some hail as the cornerstone of "Cappadocian" theology. In *Against Eunomius*, we see the clash not simply of two dogmatic positions on the doctrine of the Trinity, but of two fundamentally opposed theological methods. Basil's treatise is as much about how theology ought to be done and what human beings can and cannot know about God as it is about the exposition of Trinitarian doctrine. Thus *Against Eunomius* marks a turning point in the Trinitarian debates of the fourth century, for the first time addressing the methodological and epistemological differences that gave rise to theological differences. Amidst the polemical vitriol of *Against Eunomius* is a call to epistemological humility on the part of the theologian, a call to recognize the limitations of even the best theology. While Basil refined his theology through the course of his career, *Against Eunomius* remains a testament to his early

theological development and a privileged window into the Trinitarian controversies of the mid-fourth century.

Antiparasitic Treatment Recommendations Catholic University of America Press

This book primarily aims to provide a practical approach to diagnosing and treating parasitic diseases, highlighting major pitfalls in clinical management, referencing the current evidence regarding diagnosis and treatment, summarizing the pharmacological data of antiparasitic drugs, and offering an overview of differential diagnoses of certain clinical syndromes related to parasitic diseases.

Organic Reaction Mechanisms 1996 Springer

A Burglar of the Better Sort offers, in the English translation of Charles S. Kraszewski, the entirety of Czyżewski's surviving literary output, from surrealistic plays like *Donkey and Sun in Metamorphosis* and his inimitable 'formistic poems' through the playful Christmas 'pastorals' -- which so delighted Czeslaw Milosz -- to his theoretical writings, which form the basis for his radically individual, shamanistic approach to literary creation. A truly global talent, Czyżewski belongs to the world, a world which, beyond Poland, finally has the opportunity to get to know him.

Genderqueer and Non-Binary Genders Djoef Publishing

Countries emerging from civil war or protracted violence often face the daunting challenge of rebuilding their economy while simultaneously creating the political and social conditions for a stable peace. The implicit assumption in the international community that rapid political democratisation along with economic liberalisation holds the key to sustainable peace is belied by the experiences of countries such as Iraq and Afghanistan. Often, the challenges of post-conflict reconstruction revolve around the timing and sequencing of different reform that may have contradictory implications. Drawing on a range of thematic studies and empirical cases, this book examines how post-conflict reconstruction policies can be better sequenced in order to promote sustainable peace. The book provides evidence that many reforms that are often thought to be imperative in post-conflict societies may be better considered as long-term objectives, and that the immediate imperative for such societies should be 'people-centred' policies.

Crossing Borders John Wiley & Sons

The only book series to summarize the latest progress on organic reaction mechanisms, *Organic Reaction Mechanisms*, 1983 surveys the development in understanding of the main classes of organic reaction mechanisms reported in the primary scientific literature in 1983. The 19th annual volume in this highly successful series highlights mechanisms of stereo-specific reactions. Reviews are compiled by a team of experienced editors and authors, allowing advanced undergraduates, graduate students, postdocs, and chemists to rely on the volume's continuing quality of selection and presentation.

Hospital Planning Indiana University Press

The Eye: Basic Sciences in Practice provides highly accessible, concise coverage of all the essential basic science required by today's ophthalmologists and optometrists in training. It is also essential

reading for those embarking on a career in visual and ophthalmic science, as well as an invaluable, current refresher for the range of practitioners working in this area. This new fourth edition has now been fully revised and updated in line with current curricula, key research developments and clinical best practice. It succinctly incorporates the massive strides being made by genetics and functional genomics based on the Human Genome Project, the new understanding of how the microbiome affects all aspects of immunology, the remarkable progress in imaging technology now applied to anatomy and neurophysiology, as well as exciting new molecular and other diagnostic methodologies now being used in microbiology and pathology. All this and more collectively brings a wealth of new knowledge to students and practitioners in the fields of ophthalmology and visual science. For the first time, this (print) edition also now comes with bonus access to the complete, fully searchable electronic text - including carefully selected additional information and new video content to further explain and expand on key concepts - making *The Eye* a more flexible, comprehensive and engaging learning package than ever before. The only all-embracing textbook of basic science suitable for trainee ophthalmologists, optometrists and vision scientists - other books concentrate on the individual areas such as anatomy. Attractive page design with clear, colour diagrams and text boxes make this a much more accessible book to learn from than many postgraduate textbooks. Presents in a readable form an account of all the basic sciences necessary for an understanding of the eye - anatomy, embryology, genetics, biochemistry, physiology, pharmacology, immunology, microbiology and infection and pathology. More on molecular pathology. Thorough updating of the sections on pathology, immunology, pharmacology and immunology. Revision of all other chapters. More colour illustrations Comes with complete electronic version

Women & Music SCB Distributors

This volume in the acclaimed *Mastery Series* delivers clear, how-to guidance on the most commonly performed procedures in adult and pediatric thoracic surgery. As with other volumes in the series, *Mastery of Cardiothoracic Surgery* delivers expert commentary from master surgeons following each chapter. Invaluable for cardiothoracic fellows, as well as thoracic and cardiac surgeons.

Governance and Sustainable Development Springer

The book provides illuminating insights into fundamental chemistry and also practical value for students who will go on to teach, research or be involved in other scientific roles.

The Maritime World of Early Modern Britain Elsevier Health Sciences

UNESCO pub. Monograph on unequal opportunities for women regarding their portrayal and participation in mass media - examines image, employment, working conditions, vocational training, etc. Of women in such media as radio, television, film and newspapers, the use of media in female development projects, widening of opportunities for women, etc., and includes a format (questionnaire) for media analysis. Bibliography pp. 207 to 221.

Billiards Without a Master Wiley

Britain's emergence as one of Europe's major maritime powers has all too frequently been subsumed by nationalistic narratives that focus on operations and technology. This volume, by contrast, offers a daring new take on Britain's maritime past. It brings together scholars from a range of disciplines to explore the manifold ways in which the sea shaped British history,

demonstrating the number of approaches that now have a stake in defining the discipline of maritime history. The chapters analyse the economic, social, and cultural contexts in which English maritime endeavour existed, as well as discussing representations of the sea. The contributors show how people from across the British Isles increasingly engaged with the maritime world, whether through their own lived experiences or through material culture. The volume also includes essays that investigate encounters between English voyagers and indigenous peoples in Africa, and the intellectual foundations of imperial ambition.

Mastery of Cardiothoracic Surgery 5Continents

Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—*The Wall Street Journal* "A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—*Scientific American* "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

Greek Scripture and the Rabbis Glagoslav Publications B.V.

In this volume, Chungman Lee offers a concise yet thorough evaluation of the contemporary discussion on the filioque and the remaining issues still at stake. Lee examines the trinitarian theologies of Gregory of Nyssa and Augustine of Hippo, as representative of, respectively, the eastern and western patristic traditions. He demonstrates that they share similar ideas on the monarchy of the Father and on the role of the Son in the procession of the Holy Spirit, notwithstanding their slightly different expressions and perspectives. As such, the present study seeks to work towards a common patristic foundation for reconciliation between East and West on the problem of the filioque.

Diagnostic Imaging for Thoracic Surgery Penguin

Greek was widely used by Jews in the eastern Mediterranean, from Alexander the Great until the Holocaust. However, its role in the translation of Hebrew Scripture for Jewish communities has not received sustained attention. The European Seminar in Advanced Jewish Studies, held at the Oxford Centre for Hebrew and Jewish Studies in 2009 provided an international scholarly forum on the subject. The papers in this volume represent the fruits of the residential workshop. They cover biblical textual criticism, the later Jewish Greek revisions, rabbinic attitudes towards Scripture in Greek, early Christian views of Jewish Greek versions, imperial legislation on Jews and the public reading of Scripture, Greek loanwords in rabbinic literature, and medieval Greek biblical glosses in

Jewish manuscripts.

A Burglar of the Better Sort John Wiley & Sons

This compendium (4 vols.) studies the continuity, flexibility, and variation of structural elements in epic narratives. It provides an overview of the structural patterns of epic poetry by means of a standardized, stringent terminology. Both diachronic developments and changes within individual epics are scrutinized in order to provide a comprehensive structural approach and a key to intra- and intertextual characteristics of ancient epic poetry.

100 Dutch-language Poems De Gruyter Saur

"Chess, easy game!" – Miguel el Grande Among major chess figures of the 20th century, few stand out more than Miguel Najdorf. One of the world's best players for decades, he was also one of the most active and colorful. And his life, both at the chessboard and away from it, was rich in experience, both joyful and deeply painful. In this biography, Najdorf's daughter Liliana paints an intimate portrait of her larger-than life father. She writes about him, warts and all, showing us her father as a man both greatly talented and deeply flawed, a man at once loving and rage-prone, noble and petty, generous and selfish, jovial but despotic, earthy but vain, exuberant yet deeply sad. A genius who could conduct 40 blindfold games simultaneously and memorize long strings of random numbers, yet forgot where he parked his car. For the English-language edition, Dutch grandmaster Jan Timman has prepared a selection of annotated games and an in-depth foreword.

These are complemented nicely by several historical essays, while many photographs round out this engrossing biography of one of the world's most fascinating chessplayers of the 20th century.

The Treatment of Epilepsy BRILL

Country-by-country, this a complete and updated list of directories and guides which deal with an entire country, regional, local or repository. Subject guides, arranged under headings such as genealogy, history and audio-visual materials are also included.

How Emotions Are Made Tredition GmbH

Includes such mechanisms as addition and elimination reactions, nucleophilic and electrophilic aromatic substitutions, and molecular rearrangements. Each chapter deals with specific reaction types, reviewing the previous year's developments in the area. Extensively referenced to previous volumes and primary journals.

Building Sustainable Peace Amsterdam University Press

The only book series to summarize the latest progress on organic reaction mechanisms, *Organic Reaction Mechanisms*, 1986 surveys the development in understanding of the main classes of organic reaction mechanisms reported in the primary scientific literature in 1986. The 22nd annual volume in this highly successful series highlights mechanisms of stereo-specific reactions. Reviews are compiled by a team of experienced editors and authors, allowing advanced undergraduates, graduate students, postdocs, and chemists to rely on the volume's continuing quality of selection and presentation.
