Springer Nature
Ageing infrastructure and declining water resources are major concerns with a growing global population. Controlling water loss has therefore become a priority for water utilities around the world. In order to improve efficiencies, water utilities need to apply good practices in leak detection. Leak Detection: Technology and Implementation assists water utilities with the development

and implementation of leak detection programs. Leak detection and repair is one of the components of controlling water loss. In addition, techniques are discussed within this book and relevant case studies are presented. This book provides useful and practical information on leakage issues.

**Compendium of
Roman History**

Grand Central Publishing
* Huge scope - covers all aspects of tender writing for public sector, private sector and research funding * Expert guidance from a specialist who has written over 200 successful tenders and proposals * Highly practical approach - based on examples drawn from actual bids and tenders With more

and more corporations opting for "preferred supplier" lists, bids and tenders have become a fact of business life. For the small or medium sized corporation without a specialist bids-and-tenders team, the research unit, or the university team, bid preparation can take great amounts of senior management time. Here's where this book comes in: practical and written in an accessible style, it uses examples and checklists to explain how to create bids that are outstanding in both technical quality and value for money, bids that stand a good chance of being successful. Lewis provides "best-practice" advice on every step in the process, including:

Bidding for public sector contracts; tendering for the private sector and for research projects; analyzing client requirements; managing, resourcing and researching the bid; developing and writing the bid; defining outputs and deliverables; communicating added value; describing professional experience; producing and submitting tenders; stating the price; understanding tender evaluation; and making presentations. University of Chicago Press

The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

Stewart B. McKinney
Homeless Assistance Act Simon and Schuster

This open access book is a systematic update

of the philosophical and scientific foundations of the biopsychosocial model of health, disease and healthcare. First proposed by George Engel 40 years ago, the Biopsychosocial Model is much cited in healthcare settings worldwide, but has been increasingly criticised for being vague, lacking in content, and in need of reworking in the light of recent developments. The book confronts the rapid changes to psychological science, neuroscience, healthcare, and philosophy that have occurred since the model was first proposed and addresses key issues such as the model's scientific basis, clinical utility, and

philosophical coherence. The authors conceptualise biology and the psychosocial as in the same ontological space, interlinked by systems of communication-based regulatory control which constitute a new kind of causation. These are distinguished from physical and chemical laws, most clearly because they can break down, thus providing the basis for difference between health and disease. This work offers an urgent update to the model's scientific and philosophical foundations, providing a new and coherent account of causal interactions between the biological, the psychological and social.

The Memoirs of Billy

Shears Berrett-Koehler Publishers
 William Shepherd ("Billy Shears") took over The Beatles and the McCartney estate on 16 September 1966, going from "Billy Pepper" of Billy Pepper and the Pepper Pots, to The Beatles' new "Sgt. Pepper" of Sgt. Pepper's Lonely Hearts Club Band. Taking creative control of the band from John made William "the new boss," saving the band, but tormenting all involved. The Memoirs is the source of the "Paul is Dead" material reprinted in Billy's Back! and of the insights in Beatles Enlightenment, but also includes the darker aspects: Paulism, Satanism, and Biblical humor--calling The Beatles the four-headed 666 Beast. The

Memoirs is the first fully encoded full-length book. As part of that encoding, it contains the world's largest acrostic, and is the world's premier of word-stacking. By reading The Memoirs, you will learn the secret meanings of their songs, and will recognize Paul and William's distinct physical differences, personality differences, and vast differences in musical skills.

Practical Radiotherapy Planning Fourth Edition

Cover crops slow erosion, improve soil, smother weeds, enhance nutrient and moisture availability, help control many pests and bring a host of other benefits to your farm. At the same time, they can reduce

costs, increase profits and even create new sources of income. You'll reap dividends on your cover crop investments for years, since their benefits accumulate over the long term. This book will help you find which ones are right for you. Captures farmer and other research results from the past ten years. The authors verified the info. from the 2nd ed., added new results and updated farmer profiles and research data, and added 2 chap. Includes maps and charts, detailed narratives about individual cover crop species, and chap. about aspects of cover cropping.

Engaging the future

successfully will require the active participation of planners, community leaders, and many individuals, as well as the contributions of students and scholars of planning. To shape any number of possible futures, we must imagine them in advance and understand how they might emerge. Forecasts, scenarios, plans, and projects are four ways of representing, manipulating, and assessing ideas about the future. The chapters in this richly illustrated volume offer a variety of tools and examples to help planners advocate for a new kind of planning—one that allows communities to face uncertain and malleable futures with

continuous and deliberative planning activities.

Principles and Practice in Second Language

Acquisition Lincoln Inst of Land Policy
 Planning is a critical stage of radiotherapy. Careful consideration of the complex variables involved and critical assessment of the techniques available are fundamental to good and effective practice. First published in 1985, Practical Radiotherapy Planning has, over three editions, established itself as the popular choice for the trainee raditation oncologist and radiographer, providing the 'nuts and bolts' of planning in a practical and accessible manner. This fourth edition encompasses a

wealth of new material, reflecting the radical change in the practice of radiotherapy in recent years. The information contained within the introductory chapters has been expanded and brought up to date, and a new chapter on patient management has been added. CT stimulators, MLC shieldings and dose profiles, principles of IMRT, and use of MRI, PET and ultrasound are all included, amongst other new developments in this field. The aim of the book remains unchanged. Complexity of treatment planning has increased greatly, but the fourth edition continues to emphasise underlying principles of treatment that can be applied for conventional,

conformal and novel treatments, taking into account advances in imaging and treatment delivery.

Taking financial risks is an essential part of what banks do, but there's no clear sense of what constitutes responsible risk. Taking legal risks seems to have become part of what banks do as well. Since the financial crisis, Congress has passed copious amounts of legislation aimed at curbing banks' risky behavior. Lawsuits against large banks have cost them billions. Yet bad behavior continues to plague the industry. Why isn't there more change? In *Better Bankers, Better Banks*, Claire A. Hill and Richard W. Painter look

back at the history of banking and show how the current culture of bad behavior—dramatized by the corrupt, cocaine-snorting bankers of *The Wolf of Wall Street*—came to be. In the early 1980s, banks went from partnerships whose partners had personal liability to corporations whose managers had no such liability and could take risks with other people’s money. A major reason bankers remain resistant to change, Hill and Painter argue, is that while banks have been faced with large fines, penalties, and legal fees—which have exceeded one hundred billion dollars since the onset of the crisis—the banks (which really means the

banks’ shareholders) have paid them, not the bankers themselves. The problem also extends well beyond the pursuit of profit to the issue of how success is defined within the banking industry, where highly paid bankers clamor for status and clients may regard as inevitable bankers who prioritize their own self-interest. While many solutions have been proposed, Hill and Painter show that a successful transformation of banker behavior must begin with the bankers themselves. Bankers must be personally liable from their own assets for some portion of the bank’s losses from excessive risk-taking and illegal behavior. This would instill a culture that

discourages such behavior and in turn influence the sorts of behavior society celebrates or condemns. Despite many sensible proposals seeking to reign in excessive risk-taking, the continuing trajectory of scandals suggests that we're far from ready to avert the next crisis. Better Bankers, Better Banks is a refreshing call for bankers to return to the idea that theirs is a noble profession.

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on

diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and

community leaders, health advocates, educators and journalists.

The Antitrust

Paradox University of Chicago Press
NEWLY REVISED AND UPDATED The bestselling business playbook for turbocharging any organization, updated for modern audiences with new and never-before-seen material Every single day 3,076 businesses shut their doors. But what if you could create the finest, most profitable and best-run version of your business without wasting precious dollars on a thousand different strategies? When *The Ultimate Sales Machine* first published in 2007, legendary sales expert Chet Holmes gave us the key to do just that.

All you need is to focus on twelve key areas of improvement—and practice them over and over with pigheaded discipline. Now, a decade later, Chet’s daughter Amanda Holmes breathes new life into her father’s classic advice. With updated language to match our ever-changing times and over 50 new pages of content, *The Ultimate Sales Machine* will help any modern reader transform their organization into a high-performing, moneymaking force. With practical tools, real-life examples, and proven strategies, this book will show you how to:

- Teach your team to work smarter, not harder
- Get more bang from your marketing for less
- Perfect every sales

interaction by working on sales, not just in sales

- Land your dream clients

This revised edition expands on these proven concepts, with checklists to get faster ROIs, Core Story Frameworks to get your company to number one in your marketplace, and a bonus, never-before-revealed chapter from Chet, “How to Live a Rich and Full Life,” that will put you in the best possible mindset to own your career. For every CEO, manager, and business owner who wants to take their organization to the next level, *The Ultimate Sales Machine* will put you and your company on the path to success—and help you stay there!

Guide™ IWA**

Publishing

A timely investigation of the potential economic effects, both realized and unrealized, of artificial intelligence within the United States healthcare system. In sweeping conversations about the impact of artificial intelligence on many sectors of the economy, healthcare has received relatively little attention. Yet it seems unlikely that an industry that represents nearly one-fifth of the economy could escape the efficiency and cost-driven disruptions of AI. *The Economics of Artificial Intelligence: Health Care Challenges* brings together contributions from health economists, physicians, philosophers, and

scholars in law, public health, and machine learning to identify the primary barriers to entry of AI in the healthcare sector. Across original papers and in wide-ranging responses, the contributors analyze barriers of four types: incentives, management, data availability, and regulation. They also suggest that AI has the potential to improve outcomes and lower costs. Understanding both the benefits of and barriers to AI adoption is essential for designing policies that will affect the evolution of the healthcare system.

Family caregiving affects millions of Americans every day, in all walks of life. At

least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions

designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Model categories are used as a tool for inverting certain maps in a category in a controllable manner. They are useful in diverse areas of mathematics. This book offers a comprehensive study of the relationship between a model category and its homotopy category. It develops the theory of model categories, giving a development of the main examples.

The Biopsychosocial Model of Health and Disease DIANE

Publishing

This book enables readers to develop their own creative thinking and their teams' creative problem-solving skills to generate novel, useful and surprising ideas. The vast majority of companies believe that a culture of innovation and renewal impacts performance and ultimately business results. In contrast, many managers feel ill-equipped to promote a culture of creative endeavour for this type of work-environment and lack the know-how to put it into practice. This book covers theory, practice, and impact metrics of both convergent and divergent thinking

tools and provide managers with the ideas, tools and guidance to develop a corporate culture conducive to intrapreneurial thinking, idea creation and testing and moving inventions from ideas to viable business concepts, products and profitable innovations. This book includes numerous step-by-step tutorials to help the reader to learn concepts quickly.

An imperial historian and an emperor's history. Velleius Paterculus, who lived in the reigns of Augustus and Tiberius (30 BC-AD 37), served as a military tribune in Thrace, Macedonia, Greece, and Asia Minor, and later, from

AD 4 to 12 or 13, as a cavalry officer and legatus in Germany and Pannonia. He was quaestor in AD 7, praetor in 15. He wrote in two books "Roman Histories," a summary of Roman history from the fall of Troy to AD 29. As he approached his own times he becomes much fuller in his treatment, especially between the death of Caesar in 44 BC and that of Augustus in AD 14. His work has useful concise essays on Roman colonies and provinces and some effective compressed portrayals of characters. Res Gestae Divi Augusti. In his 76th year (AD 13-14) the emperor Augustus wrote a dignified account of his public

life and work of which the best preserved copy (with a Greek translation) was engraved by the Galatians on the walls of the temple of Augustus at Ancyra (Ankara). It is a unique document giving short details of his public offices and honors; his benefactions to the empire, to the people, and to the soldiers; and his services as a soldier and as an administrator.
