Learn how you can boost your immune system and help prevent virtually every major medical condition—including cancer, heart disease, neurological disorders, GI issues, and obesity--by keeping your lymph system healthy. The lymphatic system serves as our body's maintenance department and has a direct effect on our cardiovascular, neurological, and immune systems. It has also been one of the most misunderstood systems--until now. At last, renowned cardiothoracic surgeon and pioneer in the study of lymph Gerald Lemole explains in straightforward language why the lymphatic system is the key factor in longevity and disease prevention, and how improving lymphatic flow can help our bodies eliminate the toxins and waste products that contribute to injury, inflammation, and disease. In ten short chapters featuring sidebars with charts and graphs that illustrate basic principles, *Lymph & Longevity* also includes flow-friendly menus, recipes, and information on supplements, as well as basic yoga and meditation guides. Illuminating, informative, and practical, this essential guide is more timely now than ever as we continue to work to protect ourselves and our communities against Covid-19 and other viruses.--adapted from Amazon.

*The Blood Sugar Solution Cookbook* Scribner

From one of the nation's preeminent experts on women and emotion, a breakthrough new book about how to stop negative thinking and become more productive It's no surprise that our fast-paced, overly self-analytical culture is pushing many people—especially women—to spend countless hours thinking about negative ideas, feelings, and experiences. Renowned psychologist Dr. Susan Nolen-Hoeksema calls this overthinking, and her groundbreaking research shows that an increasing number of women—more than half of those in her extensive study—are doing it too much and too often, hindering their ability to lead a satisfying life. Overthinking can be anything from fretting about the big questions such as "What am I doing with my life?" to losing sleep over a friend's innocent comment. It is causing many women to end up sad, anxious, or seriously depressed, and Nolen-Hoeksema challenges the assumption—heralded by so many pop-psychology pundits of the last several decades—that constantly expressing and analyzing our emotions is a good thing. In *Women Who Think Too Much*, Nolen-Hoeksema shows us what causes so many women to be overthinkers and provides concrete strategies that can be used to escape these negative thoughts,

move to higher ground, and live more productively. *Women Who Think Too Much* will change lives and is destined to become a self-help classic.

For decades, Dr. Jeffrey Bland has been on the cutting edge of Functional Medicine, which seeks to pinpoint and prevent the cause of illness, rather than treat its symptoms. Managing chronic diseases accounts for three quarters of our total healthcare costs, because we're masking these illnesses with pills and temporary treatments, rather than addressing their underlying causes, he argues. Worse, only treating symptoms leads us down the path of further illness. In *The Disease Delusion*, Dr. Bland explains what Functional Medicine is and what it can do for you. While advances in modern science have nearly doubled our lifespans in only four generations, our quality of life has not reached its full potential. Outlining the reasons why we suffer chronic diseases from asthma and diabetes to obesity, arthritis and cancer to a host of other ailments, Dr. Bland offers achievable, science-based solutions that can alleviate these common conditions and offers a roadmap for a lifetime of wellness.

**The Blood Sugar Solution** The Experiment

Twelve-time New York Times bestselling author Mark Hyman, MD, presents his unique Pegan diet—including meal plans, recipes, and shopping lists. For decades, the diet wars have pitted advocates for the low-carb, high-fat paleo diet against advocates of the exclusively plant-based vegan diet and dozens of other diets leaving most of us bewildered and confused. For those of us on the sidelines, trying to figure out which approach is best has been nearly impossible—both extreme diets have unique benefits and drawbacks. But how can it be, we've asked desperately, that our only options are bacon and butter three times a day or endless kale salads? How do we eat to reverse disease, optimal health, longevity and performance. How do we eat to reverse climate change? There must be a better way! Fortunately, there is. With *The Pegan Diet's* food-is-medicine approach, Mark Hyman explains how to take the best aspects of the paleo diet (good fats, limited refined carbs, limited sugar) and combine them with the vegan diet (lots and lots of fresh, healthy veggies) to create a delicious diet that is not only good for your brain and your body, but also good for the planet. Featuring thirty recipes and plenty of infographics illustrating the concepts, *The Pegan Diet* offers a balanced and easy-to-follow approach to eating that will help you get, and stay, fit, healthy, focused, and happy—for life.

*Food Fix* Little, Brown

A "New York Times"-bestselling author reveals that problems in the brain don't start there, and explains how detoxifying and fortifying the body can maximize brain function, alleviate depression, and improve memory--without drugs.

*The Divided Mind* is the crowning achievement of Dr. John E. Sarno's distinguished career as a groundbreaking medical pioneer, going beyond pain to address the entire spectrum of psychosomatic (mindbody) disorders. The interaction between the generally reasonable, rational, ethical, moral conscious mind and the repressed feelings of emotional pain, hurt, sadness, and anger characteristic of the unconscious mind appears to be the basis for mindbody disorders. *The Divided Mind* traces the history of psychosomatic medicine, including Freud's crucial role, and describes the psychology responsible for the broad range of psychosomatic illness. The failure of medicine's practitioners to recognize and appropriately treat mindbody disorders has produced public health and economic problems of major proportions in the United States. One of the most important aspects of psychosomatic phenomena is that knowledge and awareness of the process clearly have healing powers. Thousands of people have become pain-free simply by reading Dr. Sarno's previous books. How and why this happens is a fascinating story, and is revealed in *The Divided Mind*.

**Ultraprevention** HarperCollins

#1 New York Times bestselling author Dr. Mark Hyman sorts through the conflicting research on food to give us the skinny on what to eat. Did you know that eating oatmeal actually isn't a healthy way to start the day? That milk doesn't build bones, and eggs aren't the devil? Even the most health conscious among us have a hard time figuring out what to eat in order to lose weight, stay fit, and improve our health. And who can blame us? When it comes to diet, there's so much changing and conflicting information flying around that it's impossible to know where to look for sound advice. And decades of misguided "common sense," food-industry lobbying, bad science, and corrupt food polices and guidelines have only deepened our crisis of nutritional confusion, leaving us overwhelmed and anxious when we head to the grocery store. Thankfully, bestselling author Dr. Mark Hyman is here to set the record straight. In *Food: What the Heck Should I Eat?* -- his most comprehensive book yet -- he takes a close look at every food group and explains what we've gotten wrong, revealing which foods nurture our health and which pose a threat. From grains to legumes, meat to dairy, fats to artificial sweeteners, and beyond, Dr. Hyman debunks misconceptions and breaks down the fascinating science in his signature accessible style. He also explains food's role as powerful medicine capable of reversing chronic disease and shows how our food system and policies impact the environment, the economy, social justice, and personal health, painting a holistic picture of growing, cooking, and eating food in ways that nourish our bodies and the earth while creating a healthy society. With myth-busting insights, easy-to-understand science, and delicious, wholesome recipes, *Food: What the Heck Should I Eat?* is a no-nonsense guide to achieving optimal weight and lifelong health.

A revolutionary new diet program based on the latest science showing the importance of fat in weight loss and overall health, from New York Times #1 bestselling author For decades we've been told that the fat we eat turns to fat in the body, contributing to weight gain, heart disease, diabetes, and generally poor health. And yet, even with all our low-fat products, we're fatter and sicker than ever before. What's going on? Could it be that the most feared food group is actually...the most helpful? The Blood Sugar Solution 10-Day Detox Diet Cookbook Greenleaf Book Group

How many of us can honestly say we do not suffer from at least one of the following: Colds or viruses each year Allergies or hay fever Extra pounds that won't come off Restless nights Recurrent indigestion, constipation, or irritable bowel syndrome Itchy skin, acne, or any other troubling skin condition Depression, anxiety, or frequent fatigue If you were to seek medical advice for any of the above, you would likely be prescribed pills, topical lotions, injections, or even surgery. Such treatments are used to manage the symptoms and do not address the root of the problem. Too often, doctors treat these common ailments as inevitable costs of living a modern life. The result is a patchwork approach to health care that has become the norm. In Clean, a New York City cardiologist and a leader in the field of integrative medicine, Dr. Alejandro Junger offers a major medical breakthrough. Dr. Junger argues that the majority of these common ailments are the direct result of toxic buildup in our systems accumulated through the course of our daily lives. As the toxicity of modern life increases and disrupts our systems on a daily basis, bombarding us through our standard American diet and chemical-filled environments, our ability to handle the load hasn't

accelerated at the same rapid pace. The toxins are everywhere, but Clean offers a solution. Clean is an M.D.'s program that provides all the tools necessary to support and reactivate our detoxification system to its fullest capabilities, and can be easily incorporated into a busy schedule. The effect is transformative: nagging health problems will suddenly disappear, extra weight will drop away, and for the first time in our lives we will experience what it truly means to feel healthy. Every day spent on the Clean program is a major step in healing not just the symptom but the root of the problem, effectively and simply. Dr. Junger's life-changing program restores what rightfully belongs to you—your health, vitality, and peace of mind.
