NICHOLSON BOND

Jasmonates and Brassinosteroids in Plants Macho Men in South African Gyms

The aim of the book is to present original and thought-provoking essays in human paleontology and prehistory, which are at the forefront of human evolutionary research, in honor of Professor Yoel Rak (a leading scholar in paleoanthropology). The volume presents a collection of original papers contributed by many of Yoel's friends and colleagues from all over the globe. Contributions from experts around the globe fall roughly into three broad categories: Reflections on some of the broad theoretical questions of evolution, and especially about human evolution; the early hominins, with special emphasis on *Australopithecus afarensis* and *Paranthropus*; and the Neanderthals, that contentious group of our closest extinct relatives. Within and across these categories, nearly every paper addresses combinations of methodological, analytical and theoretical questions that are pertinent to the whole human evolutionary time span. This book will appeal most to scholars and advanced students in paleoanthropology, human paleontology and prehistoric archaeology.

Macho! Springer

Advances in Botanical Research publishes in-depth and up-to-date reviews on a wide range of topics in plant sciences. Currently in its 75th volume, the series features several reviews by recognized experts on all aspects of plant genetics, biochemistry, cell biology, molecular biology, physiology, and ecology. Publishes in-depth and up-to-date reviews on a wide range of topics in plant sciences Contains commentary by recognized experts on all aspects of plant genetics, biochemistry, cell biology, molecular biology, physiology, and ecology This volume features reviews of the fast moving field of plant microbe interactions

Environmental Crime and its Victims Oxford University Press

Britain's best-loved wine writer brings you more information, more recommendations, more facts, passion and opinion than any other comparable guide to wine. Organised in an easy-to-use A-Z format, the entries cover wines, producers, grapes, countries and wine regions from all over the world. For optimum browsing, the guide includes a handy country by country index as well as a full producer index to help you find over 4000 of the world's top wine producers and their wines. Detailed vintage charts, with information on which of the world's top wines are ready for drinking

now, can be found on the inside front and back covers.

Muy Macho CUA Press

'Queer Dance' challenges social norms and enacts queer coalition across the LGBTQ community. The text joins forces with feminist, anti-racist, and anti-colonial work to consider how bodies are forces of social change.

Boys, Masculinities and Reading Taylor & Francis

This book explores the experiences of self-identified heterosexual and gay men in contemporary South African gym contexts, particularly as it relates to how the intersection of spornosexual and inclusive masculinities inform their views and enactment of their masculine and sexual identities. Chapters engage with findings from an in-depth qualitative sociological exploration on issues surrounding these masculinities among men living in South Africa who engage in gym work. The author demonstrates that men, when given the opportunity to reflect on their own and the masculinity of others, acknowledge how they promote softer, kinder, disciplined, playful, and sexually agentic masculinities through their look and touch.

Nature

"I started working on this book in spring 2019 while recovering from minor surgery that at the time felt like the biggest health scare to me. The writing of the first few theoretical chapters helped to distract me from my health issue. I planned to continue my work on the book in the summer of 2020, which at that time I anticipated would be another quiet summer at home after my return from a planned trip to Europe. I did not know yet about the biggest world health scare that would coincide with the continuation of my work on the book: the COVID-19 pandemic. It slowly entered every corner of the world, made people socially distance from one another per national and state orders, forced us to stay home, cancel all travel plans, wear masks, and get used to what "the new normal" might be while hoping for the miraculous return of the "old normal." For the second time in two years I turned to the writing of my book as an escape: this time - for a much-needed respite from the global madness and a rising death toll. It also made me think about all those petty ideological and political differences that separated countries in pre-pandemic times, like Russia and the U.S. having grown so far apart in the last few years that they almost have reached the point of no return. I started wondering if a global health scare, such as the ongoing pandemic, could bring states and nations together in tackling the disease. I also wondered if the overused and therefore clichéd phrase "We are all in this together" could go beyond national borders and erase some of the differences that have prevented this"--

The Poverty of Television Anthem Press

The phenomenon of global organizations reminds us that cross-cultural management is more prevalent than ever. While it may not be possible to develop in-depth knowledge of all cultures, a person can develop a way of thinking where they integrate culture in all of their deliberations, decisions, and behaviors. Such an approach is transformative and involves adopting a cultural mindset, understanding culture's power as a frame of reference, and developing a new way of thinking. The book *The Cultural Mindset* is based on Dr. Nahavandi's years of teaching, researching, and consulting with many businesses on cross-cultural issues. Built around a think-know-do model, the text enables readers to adopt a cultural mindset that will effectively guide their thinking and behavior as future managers. Through case studies and self-assessments, the book allows students to develop a broader view of culture that is beyond learning skills and competencies. Additionally, by focusing on culture in general, the book allows readers to address both national cultural issues, such as how to work in another country or manage a multi-national team, and diversity issues, such as the glass ceiling or discrimination in the workplace. The key underlying theme for both topics is how culture, national or group-related, impacts our perspective - what we value, how we think, how we behave, and how we manage people effectively. Each chapter will include a focus on both informational and transformational learning through: Cases and examples that will question assumptions and emphasize applicability Self-assessments to make the concepts personal and relevant, and encourage self-reflection Examples to help students understand those concepts Specific exercises and/or reflections to help students apply information to their own personal and professional life

Queer Dance McFarland

From a prominent young historian, the untold story of the rich variety of gay life in America in the 1970s Despite the tremendous gains of the LGBT movement in recent years, the history of gay life in this country remains poorly understood. According to conventional wisdom, gay liberation started with the Stonewall Riots in Greenwich Village in 1969. The 1970s represented a moment of triumph -- both political and sexual -- before the AIDS crisis in the subsequent decade, which, in the view of many, exposed the problems inherent in the so-called "gay lifestyle". In *Stand by Me*, the acclaimed historian Jim Downs rewrites the history of gay life in the 1970s, arguing that the decade was about much more than sex and marching in the streets. Drawing on a vast trove of untapped records at LGBT community centers in Los Angeles, New York, and Philadelphia, Downs tells moving, revelatory stories of gay people who stood together -- as friends, fellow believers, and colleagues -- to create a sense of community among people who felt alienated from mainstream American life. As Downs shows, gay people found one another in the Metropolitan Community Church, a nationwide gay religious group; in the pages of the *Body Politic*, a newspaper that encouraged its readers to think of their sexuality as a political identity; at the Oscar Wilde Memorial Bookstore, the hub of gay literary life in New York City; and at theaters putting on "Gay American History," a play that brought to the surface the enduring problem of gay oppression. These and many other achievements would be largely forgotten after the arrival in the early 1980s of HIV/AIDS, which allowed critics to claim that sex was the defining feature of gay

liberation. This reductive narrative set back the cause of gay rights and has shaped the identities of gay people for decades. An essential act of historical recovery, *Stand by Me* shines a bright light on a triumphant moment, and will transform how we think about gay life in America from the 1970s into the present day.

Race and Gender in Electronic Media Routledge

The Forest in Medieval German Literature analyzes the topic of the "forest" through some of the best and lesser known examples of medieval German literature, approaching them through modern ecocritical issues that are paired with premodern perspectives.

The Forest in Medieval German Literature Frontiers Media SA

Stomata, the tiny pores on leaf surface, are the gateways for CO₂ uptake during photosynthesis as well as water loss in transpiration. Further, plants use stomatal closure as a defensive response, often triggered by elicitors, to prevent the entry of pathogens. The guard cells are popular model systems to study the signalling mechanism in plant cells. The messengers that mediate closure upon perception of elicitors or microbe associated molecular patterns (MAMPs) are quite similar to those during ABA effects. These components include reactive oxygen species (ROS), nitric oxide (NO), cytosolic pH and intracellular Ca²⁺. The main components are ROS, NO and cytosolic free Ca²⁺. The list extends to others, such as G-proteins, protein phosphatases, protein kinases, phospholipids and ion channels. The sequence of these signalling components and their interaction during stomatal signalling are complex and quite interesting. The present e-Book provides a set of authoritative articles from 'Special Research Topic' on selected areas of stomatal guard cells. In the first set of two articles, an overview of ABA and MAMPs as signals is presented. The next set of 4 articles, emphasize the role of ROS, NO, Ca²⁺ as well as pH, as secondary messengers. The next group of 3 articles highlight the recent advances on post-translational modification of guard cell proteins, with emphasis on 14-3-3 proteins and MAPK cascades. The last article described the method to isolate epidermis of grass species and monitor stomatal responses to different signals. Our e-Book is a valuable and excellent source of information for all those interested in guard cell function as well as signal transduction in plant cells.

Women's Entrepreneurship in Global and Local Contexts Lippincott Williams & Wilkins

Praise for the first edition: "Gutmann has done the hithertofore seemingly unthinkable. [A] wholly other vision of Mexican gender relations emerges."—José Limón, *American Anthropologist* "This book does for the study of men what two generations of feminist anthropologists have done for the study of women."—Lynn Stephen, author of *Zapotec Women*

The Ugandan Morality Crusade Springer

Marine management requires approaches which bring together the best research from the natural and social sciences. It requires stakeholders to be well-informed by science and to work across administrative and geographical boundaries, a feature especially important in the inter-connected marine environment. Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services. Once those marine ecosystem services have been created, they deliver societal goods as long as society inputs its skills, time, money and energy to gather those benefits. However, if societal goods and benefits are to be limitless, society requires appropriate administrative, legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality, but instead support its sustainable use.

Cuba's Gay Revolution Routledge

In 1999, General Museveni, Uganda's autocratic leader, ordered police to arrest homosexuals for engaging in behavior that he characterized as "un-African" and against Biblical teaching. A state-sanctioned campaign of harassment of LGBT people followed. With the approval of sections of Uganda's clergy (and with the support of U.S. evangelicals) harsh morality laws were passed against pornography and homosexual acts. The former law disproportionately affected urban women, curtailing their freedoms. The latter—known as the "kill the gays bill"—called for life imprisonment or capital punishment for homosexuals. The author weaves together a series of vignettes that trace the development of Uganda's morality laws amidst Machiavellian politics, religious fundamentalism and the human rights struggle of LGBT Ugandans.

Macho Men in South African Gyms BoD - Books on Demand

This volume examines the consequences, implications, and opportunities associated with issues of diversity in the electronic media. With a focus on race and gender, the chapters represent diverse approaches, including social scientific, humanistic, critical, and rhetorical. The contributors consider race and gender issues in both historical and contemporary electronic media, and their

work is presented in three sections: content, context (audiences, effects, and reception), and culture (media industries, policy, and production). In this book, the authors investigate, problematize, and theorize a variety of concerns which at their core relate to issues of difference. How do we use media to construct and understand different social groups? How do the media represent and affect our engagement with and responses to different social groups? How can we understand these processes and the environment within which they occur? Although this book focuses on the differences associated with race and gender, the questions raised by and the theoretical perspectives presented in the chapters are applicable to other forms of socially-constructed difference.

Macho Camacho's Beat Anchor

This book is a collection of contributions by selected active researchers in the optical fiber fields highlighting the design, fabrication, and application of optical fibers and fiber systems and covering various topics such as microstructured optical fibers, polymer fibers, nonlinear effects, optical tweezers, and gyroscopic systems. The goal of the book is to provide an updated overview of the current research trends in the optical fiber fields, serving as a general reference for the recent development in optical fiber technologies, though inevitably many topics are not covered. [Selected Topics on Optical Fiber Technologies and Applications](#) Oxford University Press From the Homeboy to the Latin Lover, America cherishes a host of images about Latino men, yet all are based on the belief in macho men, virile and brash, full of violence and testosterone. With the gender correctness of the 90s challenging all men to embrace a new masculinity, how do Latino men of today--grounded in the "macho" tradition -- define this new identity? From today's best-known, as well as emerging, Latino writers, poet and editor Ray Gonzalez has gathered personal essays written especially for *Muy Macho* on machismo and masculinity. The result is a rich and exciting collection of men talking about themselves, about other men, about their wives and lovers, about their fathers and their sons. In "Me Macho, You Jane," Dagoberto Gilb contrasts how he perceives himself with how others, particularly women, interpret his behavior, while in "Whores," Luis Alberto Urrea chronicles a rite of passage for many Latino men. Most insightful and moving are essays like "The Puerto Rican Dummy and the Merciful Son" by poet Martin Espada, which portray the fragile love between fathers and sons and the process by which men learn from and teach each other how to be men. *Muy Macho* contains photographs of all contributors, while Gonzalez illuminates the cultural context of Latino masculinity in his introduction. Emotionally honest and powerfully written, the voices of *Muy Macho* break the "cult of silence" between Latino men which prevents our culture from understanding the true nature of machismo.

Ultrasound for Primary Care CRC Press

From the author of the Agatha Raisin television series...DEATH OF A MACHO MAN: A Hamish Macbeth Mystery When Hamish Macbeth, local constable of the Scottish village of Lochdubh, tries to break up one of the many fights involving Randy Duggan, the ruffian challenges him to a fistfight. But on the chosen day, Duggan is found shot to death and Macbeth is rumored to be the likely suspect. Macbeth must find the murderer, clear his name, and restore his Highland paradise to its usual tranquility.

Stand by Me Taylor & Francis

Film Studies From Hollywood to Bollywood, explore the fantastic world of film Whether you're preparing to study film at university or you simply have a passion for cinema, you're bound to enjoy this book. Here's where you'll learn how people communicate ideas in films, how the industry works and who's on the team, the impact of film on popular culture, the different genres and styles, film theory, the joys of animation and so much more. Explore far-reaching effects - examine the narrative, artistic, cultural, economic and political implications of cinema Compare and contrast film and reality - explore conceptual frameworks for a film's relationship to reality Find out just how they do it - discover how stories are developed in movies and how a storyline is related to broader issues in society Work out what it's all about - get to grips with avant-garde cinema and find out what such films really offer Take the incredible world tour - sample the unique styles of cinema in Europe, Japan, India and other countries Go larger than life - learn about greatness in the industry, venture into film analysis and look at the transitions into 21st century cinema Open the book and find: How people tell stories in film Ways film is used to explore current issues and attitudes Responsibilities of cinema to photographers and producers The mysteries of mise-en-scene All about digital-age animation Auteurs from the 1930s to today What poststructuralism and postmodernism really mean Ten must-watch movies [Signal Transduction in Stomatal Guard Cells](#) Pavilion

The Neandertal site of the Sima de las Palomas del Cabezo Gordo, located in Murcia in southeastern Spain, is unique in several respects. One of its most important contribution to the field of Anthropology, however, may be that it has yielded of the remains of at least 17 Neandertals, adding appreciable breadth to the available data for a greater understanding of

Neandertals. Further, its location in the southern Iberian Peninsula provides the potential for studying a population that may have been somewhat isolated from contemporaneous groups of early humans. This comprehensive analysis represents the first detailed description and analysis of the human fossil assemblage found at the Sima de las Palomas site. While scientific discussion continues regarding the precise impact of Neandertals upon modern human physiology and

biology, *The People of Palomas* adds significantly to our knowledge of the human fossil record of the Late Pleistocene.
