Elements Design Manual is a manual on the practical design of structural elements that comprise a building structure, namely, timber, concrete, masonry, and steel. Practical guidance on the design of structural elements is provided in accordance with the appropriate British Standard or Code of Practice. Structural Elements Design Manual | ScienceDirect Two Princeton researchers, architect Stefana Parascho and engineer Sigrid Adriaenssens, dreamed of using robots to simplify construction, even when building complex forms. "We want to use robots to build beautiful architecture more sustainably," said Adriaenssens, an associate professor of civil and environmental engineering and the director of the Form Finding Lab.
