Redefining Airmanship offers the first concrete model of the abstract ideal of "airmanship," and gives the reader step-by-step guidance for self-appraisal and improvement in the areas of flight proficiency, teamwork, and good judgment in crisis situations. The author, Major Tony Kern, draws on his extensive flight and crew-training experience in the U.S. Air Force, but his model is invaluable for all pilots, whether military, recreational, or commercial. "Kern's work is a breakthrough, and a benchmark." --John J. Nance, author of *Blind Trust*

This book weaves all of these factors together to engage in and promote medical, biomedical and psychosocial interventions, including lifestyle changes, for healthier aging outcomes.

The text begins with an introduction to age-related changes that increase in disease and disability commonly associated with old age. Written by experts in healthy aging, the text approaches the principles of disease and disability prevention via specific health issues. Each chapter highlights the challenge of not just increasing life expectancy but also decreasing disease burden and disability in old age. The text then shifts into the whole-person implications for clinicians working with older patients, including the social and cultural considerations that are necessary for improved outcomes as Baby Boomers age and healthcare systems worldwide adjust. *Healthy Aging* is an important resource for those working with older patients, including geriatricians, family medicine physicians, nurses, gerontologists, students, public health administrators, and all other medical professionals.

*Flight Discipline* is the complete tool kit for any aviator, whether military, commercial, or recreational, to develop the crack discipline needed to be a safe and effective aviator. Major Tony Kern analyses the causes of poor flight

discipline, gives chilling case studies of the consequences, and lays out a plan for individual improvement. Key words are italicized and review questions included for each chapter. An unequalled guide to this mainspring of good piloting.

Stromatolites are the most intriguing geobiological structures of the entire earth history since the beginning of the fossil record in the Archaean. Stromatolites and microbialites are interpreted as biosedimentological remains of biofilms and microbial mats. These structures are important environmental and evolutionary archives which give us information about ancient habitats, biodiversity, and evolution of complex benthic ecosystems. However,

many geobiological aspects of these structures are still unknown or only poorly understood. The present proceedings highlight the new ideas and information on the formation and environmental setting of stromatolites presented at the occasion of the Kalkowsky Symposium 2008, held in Göttingen, Germany.

Nerves of Steel is the captivating true story of Tammie Jo Shults's remarkable life—from growing up the daughter of a humble rancher, to breaking through gender barriers as one of the Navy's first female F/A-18 Hornet pilots, to safely landing the severely crippled Southwest Airlines Flight 1380 and helping save the lives of 148 people. Tammie Jo Shults has spent her entire life loving the skies. Though the odds were against her, she became one of the few female fighter pilots in the Navy. In 1994, after serving her country honorably for eight years, Tammie Jo left the Navy and joined Southwest Airlines in the early 1990's. On April 17, 2018, Tammie Jo was called to service once again. Twenty minutes into a routine domestic flight, Captain Shults was faced with the unthinkable—a catastrophic engine failure in the Boeing

737 caused an explosion that severed hydraulic and fuel lines, tearing away sections of the plane, puncturing a window, and taking a woman's life. Captain Shults and her first officer, Darren Ellisor, struggled to stabilize the aircraft. Drawing deeply from her well of experience, Tammie Jo was able to wrestle the severely damaged 737 safely to the ground. Not originally scheduled for that flight, there is no doubt God had prepared her and placed her right where she needed to be that day.
