The adrenaline-fueled, high-octane world of Formula One has created some of the greatest moments in sporting history. From the intense rivalries between teams and drivers, such as Alain Prost and Arton Senns and 2015's Rosberg and Hamilton, to the infamous tracks that have created moments of tragedy and triumph -- F1's greatest moments read like a film script. The Cahier Archive has captured the drama from the 1950's to the present day including Lewis Hamilton's

2015 winning season. It is filled with stunning behind-the-scenes shots, from pit stops to personal moments, beautiful portraits of the drivers and atmospheric shots of the racing in action.

Structured around three sections: Drivers and Rivalries, Teams and Cars, and Tragedy and Triumph of the Circuits, Formula 1: The Pursuit of Speed captures the intensity and beauty of the sport. Each section is introduced with vivid essays by F1 correspondent Maurice Hamilton, and filled with the Cahier's beautiful and resonating photographs, many unpublished giving a behind-the-scenes look at the world of F1.

Peppa's Magical Creatures Little Library Peep-Through Books

From the New York Times bestselling author of *The Seven Husbands of Evelyn Hugo*, comes a breath taking novel about modern marriage, the depth of family ties, and the year that one remarkable heroine spends exploring both. When Lauren and Ryan's marriage reaches the breaking point, they come up with an unconventional plan. They decide to take a year off in the hopes of finding a way to fall in love again. One year apart, and only one rule: they cannot contact each other. Aside from that, anything goes. Lauren embarks on a journey of self-discovery, quickly finding that her friends and family have their own ideas about the meaning of marriage. These influences, as well as her own healing process and the challenges of living apart from Ryan, begin to change Lauren's ideas about monogamy and marriage. She starts to question: When you can have romance without loyalty and commitment without marriage, when love and lust are no longer tied together, what do you value? What are you willing to fight for? This is a love story about what happens when the love fades. It's about staying in love, seizing love, forsaking love, and committing to love with everything you've got. And above all, *After I Do* is the story of a couple caught up in an old game-and searching for a new road to happily ever after.

In 1880, forty-three women walked into the president's office at the University of Kentucky (UK) and signed the student register, becoming the first female students at a public college in the commonwealth. But gaining admittance was only the beginning. For the next sixty-five years—encompassing two world wars, an economic depression, and the ratification of the Nineteenth Amendment—generations of women at UK claimed and reclaimed their right to an equitable university experience. Their work remains unfinished. Drawing on yearbooks, photographs, and other private collections, *Our Rightful Place: A History of Women at the University of Kentucky, 1880-1945* examines the struggle for gender equity in higher education through the lens of one major institution. In the face of shifting resistance, pioneering women constructed opportunities for themselves. Terry L. Birdwhistell and Deirdre A. Scaggs highlight three women—Sarah Blanding, Frances Jewell McVey, and Sarah Bennett Holmes—who fought for access to basic facilities that were denied to UK women for decades, including housing and study spaces. By examining the trials and triumphs of UK's first female undergraduates, faculty, and

administrators, this book uncovers the lasting impact women had on higher learning in the early days of coeducation.

'Brilliant . . . Hall has shaped a richly imagined, tremendously moving fictional work. Its genius is not to explain but to embody the science and politics that shaped Oppenheimer's life . . . The resulting quantum portrait feels both true and dazzlingly unfamiliar' New York Times J. Robert Oppenheimer - the father of the atomic bomb - was a brilliant scientist, a champion of liberal causes, and a complex and often contradictory character. In Louisa Hall's kaleidoscopic novel, seven fictional characters bear witness to his life. From a secret service agent who tailed him in San Francisco, to the young lover of a colleague in Los Alamos, to a woman fleeing McCarthyism who knew him on St. John, as these men and women fall into the orbit of a brilliant but mercurial mind at work, all consider his complicated legacy while also uncovering deep and often unsettling truths about their own lives. In *Trinity*, Louisa Hall has crafted an explosive story about what it means to truly know someone, and about the secrets we keep from the world and from ourselves. *The Art of Gears 5* Firefly Books

Though plastic has numerous benefits, our reliance on this sturdy, light and flexible material, paired with its longevity and our changing consumer habits means we've created a real plastic problem. More than 8 million tons of plastic waste escapes into our oceans every year, and plastic litter can be found on virtually every coastline. Scientists have even found microplastics embedded in Arctic ice. Your Plastic Footprint educates readers about the origins and scope of the plastic problem, helps them measure the scale of the problem on an individual level and then offers solutions on how to rethink and reduce plastic use. Bursting with informative infographics and photos, this book illuminates each individual's impact on this global issue. Here are just a couple of facts you'll find in this book: Plastic's effect on the environment begins at its very origins, as fossil fuels in the ground. Over 3 million barrels of oil are used each day in the production of plastic, and plastic will account for over 56 gigatons (billion tons) of emissions between now and 2050. An average American will generate 786 kilograms (1,732.8 pounds) of plastic waste just from clothing in their lifetime. That's equivalent to 5,249 polyester T-shirts or 19,650 2-liter soda bottles. An average American shopper uses at least one plastic shopping bag per day. Over a lifetime, that shopper will generate 128 kilograms (282.2 pounds) of plastic waste from bags alone. This problem, like plastic, is not going away, and it is up to governments, corporations and individuals to make changes. Your Plastic Footprint is a must-read for every conscious consumer who is worried about the future of our planet and looking to reduce their plastic footprint.

Secrets are like pennies. Everybody's got one, even the poorest among us. For generations, the Jensens have raised their families in the small Montana town of Moose Creek, where gossip spreads faster than the wind. Yet some secrets need to be told. When twenty-one-year-old Bea discovers she's pregnant on the heels of her husband losing his job, she's forced to admit she needs help and asks her dad for a place to stay. But past resentments keep her from telling him all that's going on. Mitch Jensen is thrilled to have a full house again, though he's unimpressed with Bea's decisions: dropping out of college, marrying so young--and to an idealistic city kid, of all things. Mitch hopes to convince Bea to return to the path he's always envisioned for her, but she's changed since her mom died. And he refuses to admit how much he's changed, too, especially now that he might be losing his mother as well. Grandma June is good at spinning stories, but there's one she's never told. Now that her mind is starting to fade, her time to tell it is running out. But if she reveals the truth before her memories are gone forever, the Jensen family will never be the same.
