The Wind Book for Rifle Shooters Krause Publications

Guns can be very effective tools, but they are each of limited utility. There is no one weapon that is perfect for every purpose. Private persons may own a number of guns that fulfill a variety of functions. Ballistics is important for soldiers, law enforcement, sportsmen, and anyone who seeks to protect their life, their home, their family, or their workplace. If you are among these, this book is for you. Not surprisingly, gun owners and firearms enthusiasts are often part of a "social gun culture" in which certain facts, trends, and fads circulate and evolve with time, some stirring intense loyalty among shooters even when the realities suggest otherwise. For the average gun user some very popular myths, misconceptions, and miscalculations concerning ballistics and the terminal effects of bullets are strongly held, and it is not the purpose of this discussion to demonstrate why they are or are not true, only to lay out the parameters of the debate so that the readers can make their own judgments with increased confidence. The origin of ballistics is in the study of the flight path of projectiles, but its domain has been expanded in modern times. Among the modern ballistic sciences are areas of interest concerning how ammunition and weapons operate.

Richard Jaffe's explosive second edition of *Quest for Justice: Defending the Damned* affirms the vital role criminal defense lawyers play in the balance between life and death, liberty and lockup. It is a compelling journey into the legal and human drama of life or death criminal cases that often reads more like hard to imagine fiction, yet these cases are real. *Quest for Justice* invites readers into the courtroom and into the field with Richard Jaffe, a powerhouse Alabama defense attorney with more than four decades of experience, who has successfully defended hundreds

of individuals accused of murder, including more than seventy cases where the defendant faced the death penalty, including the Olympic bomber Eric Robert Rudolph. According to the Equal Justice Initiative, in Alabama, nine people have been exonerated from death row-Jaffe represented four of them: James Willie "Bo" Cochran, Randal Padgett, Gary Drinkard, and Wesley Quick. Though every chapter reveals more alarming, gut-wrenching cases, and impediments to justice, Jaffe's unwavering determination, hope, and strategies in the courtroom yield many momentous victories for his clients and the cause of justice. In *Quest for Justice: Defending the Damned*, Richard Jaffe offers all audiences an accessible, page-turning perspective borne out of a life representing the damned in America's criminal justice system.

Learning how to reloading ammunition can be a daunting task. Technical manuals and books full of arcane data can make the subject mysterious and overwhelming. No more! The Practical Guide to Reloading Ammunition teaches the subject in a fun, easy-to-understand, and safe manner. Starting from the very beginning, The Practical Guide to Reloading Ammunition will help readers understand the gear they need - and what can wait. Chapter by chapter, the book explains the entire process from brass cleaning to final inspection. Loaded with pictures and illustrations, the process is made simple and clear. With this book, readers will be reloading their own cost-effective ammunition quickly and safely. The Practical Guide to Reloading ammunition focuses on the "how-to" aspects of reloading. Author Tom McHale explains. "Think of reloading manuals as sheet music. And this book as Mrs. Clutterbuck's piano lessons. If one develops a sudden urge to play Carnegie Hall, or even Bodean's Wet Whistle Bar and Bait Shop, they could just order sheet music from the Internet. But it probably wouldn't be the most direct path to ivory key success. Take some lessons first, then order the sheet music." Although the author believes reading this book will be a far more pleasant experience than weekly lessons in Mrs. Clutterbuck's den, the idea is the same. The guide will teach aspiring reloaders how to get started. Topics Include: * Why take up reloading? * Is reloading right for you? * What equipment do you need? * Cleaning and processing brass. * The reloading process: step by step. * Pistol caliber reloading. * Rifle caliber

reloading. * Buying reloading components. * Advanced equipment options - how gear can speed up the process. * Introduction to advanced topics.
