Many important questions regarding the creation and adoption of the United States Constitution remain unresolved. Did slaveholdings or financial holdings significantly influence our Founding Fathers' stance on particular clauses or rules contained in the Constitution? Was there a division of support for the Constitution related to religious beliefs or ethnicity? Were founders from less commercial areas more likely to oppose the Constitution? *To Form a More Perfect Union* successfully answers these questions and offers an economic explanation for the behavior of our Founding Fathers during the nation's constitutional founding. In 1913, American historian Charles A. Beard controversially argued in his book *An Economic Interpretation of the Constitution of the United States* that the framers and ratifiers of the Constitution were less interested in furthering democratic principles than in advancing specific economic and financial interests. Beard's thesis eventually emerged as the standard historical interpretation and remained so until the 1950s. Since then, many constitutional and historical scholars have questioned an economic interpretation of the Constitution as being too narrow or too calculating, believing the great principles and political philosophies that motivated the Founding Fathers to be worthier subjects of study. In this meticulously researched reexamination of the drafting and ratification of our nation's Constitution, Robert McGuire argues that Alexander Hamilton, James Madison, George Mason and the other Founding Fathers did act as much for economic motives as for abstract ideals. *To Form a More Perfect Union* offers compelling evidence showing that the economic, financial, and other interests of the founders can account for the specific design and adoption of our Constitution. This is the first book to provide modern evidence that substantiates many of the overall conclusions found in Charles Beard's *An Economic Interpretation* while challenging and overturning other of Beard's specific findings. *To Form a More Perfect Union* presents an entirely new approach to the study of the shaping of the U.S. Constitution. Through the application of economic thinking and rigorous statistical techniques, as well as the processing of vast amounts of data on the economic interests and personal characteristics of the Founding Fathers, McGuire convincingly demonstrates that an economic interpretation of the Constitution is valid. Radically challenging the prevailing views of most historians, political scientists, and legal scholars, *To Form a More Perfect Union* provides a wealth of new findings about the Founding Fathers' constitutional choices and sheds new light on the motivations behind the design and adoption of the United States Constitution.

The Articles of Confederation Rowman & Littlefield

America is at a pivotal crossroads. The soul of our nation is at stake and in peril. A new public narrative is needed to unite Americans around common values and to counter the increasing discord and acrimony in our politics and culture. The process of healing and creating a more perfect union in our nation must start now. The moral vision of Martin Luther King Jr.'s Beloved Community, which animated and galvanized the civil rights movement of the 1950s and 1960s, provides a hopeful way forward. In *A More Perfect Union*, Adam Russell Taylor, president of Sojourners, reimagines a contemporary version of the Beloved Community that will inspire and unite Americans across generations, geographic and class divides, racial and gender differences, faith traditions, and ideological leanings. In the Beloved Community, neither privilege nor punishment is tied to race, gender, religion, sexual orientation, or economic status, and everyone is able to realize their full potential and thrive. Building the Beloved Community requires living out a series of

commitments, such as true equality, radical welcome, transformational interdependence, E Pluribus Unum ("out of many, one"), environmental stewardship, nonviolence, and economic equity. By building the Beloved Community we unify the country around a shared moral vision that transcends ideology and partisanship, tapping into our most sacred civic and religious values, enabling our nation to live up to its best ideals and realize a more perfect union.

The Articles of Confederation and Perpetual Union, commonly referred to as the Articles of Confederation, was the first constitution of the thirteen United States of America. The Second Continental Congress appointed a committee to draft the 'Articles' in June 1776 and proposed the draft to the States for ratification in November 1777. The ratification process was completed in March 1781, legally federating the sovereign and independent states, allied under the Articles of Association, into a new federation styled the "United States of America". Under the Articles the states retained sovereignty over all governmental functions not specifically relinquished to the central government.

[The Five Thousand Year Leap](#) Gale, Cengage Learning

The United States of America has been blessed with the world's greatest political success formula. In a little over a century, this formula allowed a small segment of the human family—less than 6 percent—to become the richest nation on earth. It allowed them to create more than half of the world's total output in production and enjoy the highest standard of living in the history of the world. In this book, we learn how the Founding Fathers discovered this success formula. Much of this discovery is told in the words of the Founders themselves, so that the reader can feel the power of their minds sweeping away thousands of years of bad government and illogical laws to formulate a whole new society based on human freedom. By returning to the roots of the Founders' thinking, and contemplating the logic that they used in establishing the Constitution, we can better understand the challenges and solutions that confront us in today's political world. This eBook includes the original index, illustrations,

footnotes, table of contents and page numbering from the printed format.

"...to Form a More Perfect Union..." American Enterprise Institute

The Founding Fathers of the United States of America created the first free people in modern times. They wrote a new kind of Constitution which is now the oldest in existence. They built a new kind of commonwealth designed as a model for the whole human race. They believed it was thoroughly possible to create a new kind of civilization; giving freedom, equality, and justice to all. The Founders created a new cultural climate that gave wings to the human spirit. They built a free-enterprise culture to encourage industry and prosperity. They gave humanity the needed ingredients for a gigantic 5,000-year leap in which more progress has been made in the past 200 years than all of prior recorded human history. All of this came about because of 28 basic principles the Founders discovered, upon which all free nations must be built in order to succeed. This eBook includes the original index, footnotes, table of contents and page numbering from the printed format, and also new illustrations.

A Study Guide for Chang-Rae Lee's "Native Speaker" Emmaus Road Publishing

This book presents research on the emergence of the Bill of Rights from the constitutional ratification debates through to adoption of the first ten amendments of the Constitution. Its aim is to answer the following questions: when did Americans first see the need for a Bill of Rights? Who provided the inspiration for its enactment? What were the circumstances that led to the proposing of a Bill of Rights? And why is it important for us to understand how our Bill of Rights came into existence? This study begins in Europe in 1456 with the historical framework that traces the evolution of the Bill of Rights; it ends with the ratification of ten amendments to the new United States Constitution in December of 1791. Co-published with the Center for First Amendment Studies.
