Coated Metal John Wiley & Sons

Now in its second edition and still the only book of its kind, this is an authoritative treatment of all stages of the coating process -- from body

materials, paint shop design, and pre-treatment, through primer surfacers and top coats. New topics of interest covered are color control, specification and testing of coatings, as well as quality and supply concepts, while valuable information on capital and legislation aspects is given. Invaluable for engineers in the automotive and paints

and coatings industry as well as for students in the field.

**Reaching Out to the Future--.**

Springer Science & Business Media  
228 reviews of sailboat designs. Reviews include detailed specifications on hull, accommodations and sailplans along with the frank, expert opinions of Robert H. Perry. Perry pulls no punches in his reviews in telling what's right and wrong with designs. Volume includes reviews of Small Boats, Cruising Boats, Performance Cruising Boats, Racing Boats, and Multihulls. Indispensable reference.

*Outgassing Data for Selecting Spacecraft Materials*

This book can be viewed as a scientific investigation combined with methodological studies. For practical reasons each of the methods is described in the following general manner including: the uses and the scientific investigation tasks; methods of sampling; testing equipment; test preparation; tests; data processing; controversial issues and conclusions. Each of the 37 methods contains a range of 1 to 8 variants. As far as we know, the book is the first publication in the field.
