Not illustrated. 1917 edition. Excerpt: ... (6) Columns for Discount on Purchases and Discount on Notes on the same side of the Cash Book; (c) Columns for Discount on Sales and Cash Sales on the debit side of the Cash Book; (d) Departmental columns in the Sales Book and in the Purchase Book. Controlling Accounts.--The addition of special columns in books of original entry makes possible the keeping of Controlling Accounts. The most common examples of such accounts are Accounts Receivable account and Accounts Payable account. These summary accounts, respectively, displace individual customers' and creditors' accounts in the Ledger. The customers' accounts are then segregated in another book called the Sales Ledger or Customers' Ledger, while the creditors' accounts are kept in the Purchase or Creditors' Ledger. The original Ledger, now much reduced in size, is called the General Ledger. The Trial Balance now refers to the accounts in the General Ledger. It is evident that the task of taking a Trial Balance is greatly simplified because so many fewer accounts are involved. A Schedule of Accounts Receivable is then prepared,

consisting of the balances found in the Sales Ledger, and its total must agree with the balance of the Accounts Receivable account shown in the Trial Balance. A similar Schedule of Accounts Payable, made up of all the balances in the Purchase Ledger, is prepared, and it must agree with the balance of the Accounts Payable account of the General Ledger." The Balance Sheet.--In the more elementary part of the text, the student learned how to prepare a Statement of Assets and Liabilities for the purpose of disclosing the net capital of an enterprise. In the present chapter he was shown how to prepare a similar statement, the Balance Sheet. For all practical...

Finally revealing the family's indefatigable women among its legendary military figures, The Howe Dynasty recasts the British side of the American Revolution. In December 1774, Benjamin Franklin met Caroline Howe, the sister of British General Sir William Howe and Richard Admiral Lord Howe, in a London drawing room for "half a dozen Games of Chess." But as historian Julie Flavell reveals, these meetings were about much more than board games: they were cover for a last-ditch attempt to forestall the outbreak of the American War of Independence. Aware that the distinguished Howe family, both the men and the women, have been known solely for the military exploits of the brothers, Flavell investigated the letters of Caroline Howe, which have been blatantly overlooked since the nineteenth century. Using revelatory documents and this correspondence, The Howe Dynasty provides a groundbreaking reinterpretation of one of England's most famous military families across four wars. Contemporaries considered the Howes impenetrable and intensely private—or, as Horace Walpole called them, "brave and silent." Flavell traces their roots to modest beginnings at Langar

Hall in rural Nottinghamshire and highlights the Georgian phenomenon of the politically involved aristocratic woman. In fact, the early careers of the brothers—George, Richard, and William—can be credited not to the maneuverings of their father, Scrope Lord Howe, but to those of their aunt, the savvy Mary Herbert Countess Pembroke. When eldest sister Caroline came of age during the reign of King George III, she too used her intimacy with the royal inner circle to promote her brothers, moving smoothly between a straitlaced court and an increasingly scandalous London high life. With genuine suspense, Flavell skillfully recounts the most notable episodes of the brothers' military campaigns: how Richard, commanding the HMS Dunkirk in 1755, fired the first shot signaling the beginning of the Seven Years' War at sea; how George won the devotion of the American fighters he commanded at Fort Ticonderoga just three years later; and how youngest brother General William Howe, his sympathies torn, nonetheless commanded his troops to a bitter Pyrrhic victory in the Battle of Bunker Hill, only to be vilified for his failure as British commander-in-chief to subdue Washington's Continental Army. Britain's desperate battles to guard its most vaunted colonial possession are here told in tandem with London parlor-room intrigues, where Caroline bravely fought to protect the Howe reputation in a gossipy aristocratic milieu. A riveting narrative and long overdue reassessment of the entire family, *The Howe Dynasty* forces us to reimagine the Revolutionary War in ways that would have been previously inconceivable.

When Argentinian forces invaded the Falklands in April 1982, the British government responded by despatching a task force to the Atlantic to wrest back control of the islands. The resulting war saw modern weapon systems tested in combat for the first time, to tragic effect. In the aftermath, official documents were released, but many were heavily censored, and others withheld altogether, so that a full understanding of those events could not be gained. Drawing from recently declassified and previously unpublished reports from the official inquiry, Dr Paul Brown details the true story behind the dramatic events that led to the loss of six British ships – HMS *Antelope*, *Ardent*, *Coventry* and *Sheffield*, RFA *Sir Galahad* and SS *Atlantic Conveyor* – as well as the controversial sinking of the Argentinian cruiser ARA *General Belgrano* by HMS *Conqueror*.

Following the success of his #1 New York Times bestseller *Make Your Bed*, which has sold over one million copies, Admiral William H. McRaven is back with amazing stories of bravery and heroism during his career as a Navy SEAL and commander of America's Special Operations Forces. Admiral William H. McRaven is a part of American military history, having been involved in some of the most famous missions in recent memory, including the capture of Saddam Hussein, the rescue of Captain Richard Phillips, and the raid to kill Osama bin Laden. *Sea Stories* begins in 1963 at a French Officers' Club in France, where Allied officers and their wives gathered to have drinks and tell stories about their adventures during World War II—the place where a young Bill McRaven learned the value of a good story. *Sea Stories* is an unforgettable look back on one man's incredible life, from childhood days sneaking into high-security military sites to a day job of hunting terrorists and rescuing hostages. Action-packed, humorous, and full of valuable life lessons like those exemplified in McRaven's bestselling *Make Your Bed*, *Sea Stories* is a remarkable memoir from one of America's most accomplished leaders.

Less than five years after Naval Aviation had been in the forefront of the forces that defeated Imperial Japan, it found itself in serious trouble. The force had been slashed in people and numbers and growing national sentiment supported by no less than the Chairman of the Joint Chiefs argued that the new Air Force could do anything Naval Aviation might be required to do. Not helping matters was that the Naval Aviation accident rate was soaring. The very survival of Naval Aviation was at stake. One of the first steps to re-order priorities and save Naval Aviation was to solve the problem of increasing numbers of accidents. Over the next fifty years that problem was indeed solved to the extent that today, despite hot wars, cold wars, contingencies and peacetime operations in support of friends and allies the Navy/Marine accident rate is at least as good as that of the Air Force and approached that of commercial aviation. This book tells the story of how that was done. Despite the advent of new and more complicated aircraft including jets, the increasing demands of night and all-weather flying, an unsettled world and continual high operational tempo Naval Aviation is second to no other flying organization in readiness to answer the Nation's call, safely. The keys to how this was achieved lies with dedicated and professional leadership, a focus on lessons learned from mishaps and near-mishaps, a willingness to learn and adopt new leadership, training, management, maintenance and supply styles and procedures. All this and more is described in this book. Checkouts in new airplanes became more than, "Show me how to start it and I'll fly it." Leaders were assigned based on past performance, not on who somebody knew. Maintenance and supply got more scientific and responsive. Flight surgeons were made part of the team and made major contributions to aviation safety. The place of Human Factors was recognized and contributed significantly to the remarkable downtrend in the numbers of Naval Aviation mishaps. Simulator training became increasingly important as did the more recent disciplines of Operational Risk management and Crew Resource Management. From the 1950s to 2000 the number of Navy/Marine major mishaps fell from a high of 2,213 in 1954 to 29 in 2000. Even more impressive, the number went as low as eleven in 2010 and continues to fall. This book tells how all that came about and more. It's a recipe which might be followed by any high risk enterprise seeking to reduce accidents and improve readiness. That's exactly what Naval Aviation has done since 1950.

#1 NEW YORK TIMES BESTSELLER • From the National Book Award-winning author of *Stamped from the Beginning* comes a “groundbreaking” (Time) approach to understanding and uprooting racism and inequality in our society—and in ourselves. “The most courageous book to date on the problem of race in the Western mind.”—The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Time •

NPR • The Washington Post • Shelf Awareness • Library Journal • Publishers Weekly • Kirkus Reviews *Antiracism* is a transformative concept that reorients and reenergizes the conversation about racism—and, even more fundamentally, points us toward liberating new ways of thinking about ourselves and each other. At its core, racism is a powerful system that creates false hierarchies of human value; its warped logic extends beyond race, from the way we regard people of different ethnicities or skin colors to the way we treat people of different sexes, gender identities, and body types. Racism intersects with class and culture and geography and even changes the way we see and value ourselves. In *How to Be an Antiracist*, Kendi takes readers through a widening circle of antiracist ideas—from the most basic concepts to visionary possibilities—that will help readers see all forms of racism clearly, understand their poisonous consequences, and work to oppose them in our systems and in ourselves. Kendi weaves an electrifying combination of ethics, history, law, and science with his own personal story of awakening to antiracism. This is an essential work for anyone who wants to go beyond the awareness of racism to the next step: contributing to the formation of a just and equitable society. Praise for *How to Be an Antiracist* “Ibram X. Kendi’s new book, *How to Be an Antiracist*, couldn’t come at a better time. . . . Kendi has gifted us with a book that is not only an essential instruction manual but also a memoir of the author’s own path from anti-black racism to anti-white racism and, finally, to antiracism. . . . *How to Be an Antiracist* gives us a clear and compelling way to approach, as Kendi puts it in his introduction, ‘the basic struggle we’re all in, the struggle to be fully human and to see that others are fully human.’ ”—NPR “Kendi dissects why in a society where so few people consider themselves to be racist the divisions and inequalities of racism remain so prevalent. *How to Be an Antiracist* punctures the myths of a post-racial America, examining what racism really is—and what we should do about it.”—Time

Roger Keyes was the archetype of 19th to 20th century Royal Navy officers. A superb seaman, inspiring leader and fearless fighter he immediately caught the eye of senior figures in the naval establishment as well as the up and coming politician, Winston Churchill. The relationship between these two brave men survived disappointment, disagreement and eventually disillusion. Unlike some of his contemporaries, Keyes was unable to make the transition from sailor to politician and was inclined to embarrass his friends and allies by his intemperate language and total lack of political acumen. Always eager to lead from the front and hurl himself at the enemy his mind set tended to be that of a junior officer trying to prove himself, not that of a senior Admiral. Trained in some of the last of Britain's sailing warships, Keyes served in submarines in the North Sea, destroyers in China and as a senior staff officer in the disastrous Gallipoli campaign. As commander of the Dover Patrol he planned and led the highly controversial Zeebrugge Raid and successfully combated U-boats passing along the English Channel. In World War II he begged to be given a combat command but, in spite of their close personal friendship, Churchill realized that he was too old to be suitable for a front line role and his undisguised contempt for many senior Naval and Airforce officers made him extremely unpopular in official circles. To his credit, Churchill did not let his personal friendship and admiration of Keyes blind him to his temperamental and intellectual limitations. Both men were big enough not to let professional conflict destroy mutual personal admiration and friendship.

From one of the most distinguished admirals of our time and a former Supreme Allied Commander of NATO, a meditation on leadership and character refracted through the lives of ten of the most illustrious naval commanders in history In *Sailing True North*, Admiral Stavridis offers lessons of leadership and character from the lives and careers of history's most significant naval commanders. He also brings a lifetime of reflection to bear on the subjects of his study--naval history, the vocation of the admiral, and global geopolitics. Above all, this is a book that will help you navigate your own life's voyage: the voyage of leadership of course, but more important, the voyage of character. *Sailing True North* helps us find the right course to chart. Simply as epic lives, the tales of these ten admirals offer up a collection of the greatest imaginable sea stories. Moreover, spanning 2,500 years from ancient Greece to the twenty-first century, *Sailing True North* is a book that offers a history of the world through the prism of our greatest naval leaders. None of the admirals in this volume were perfect, and some were deeply flawed. But from Themistocles, Drake, and Nelson to Nimitz, Rickover, and Hopper, important themes emerge, not least that serving your reputation is a poor substitute for serving your character; and that taking time to read and reflect is not a luxury, it's a necessity. By putting us on personal terms with historic leaders in the maritime sphere he knows so well, James Stavridis gives us a compass that can help us navigate the story of our own lives, wherever that voyage takes us.

“Wonderful . . . a rousing dramatization of history’s greatest sea battle.” –James D. Hornfischer, author of *The Last Stand of the Tin Can Sailors* “I shall return” is General Douglas MacArthur’s promise to the Filipinos. It will take 165,000 troops and 700 ships in the bloody battle of Leyte Gulf to do it. Among them is the destroyer USS *Matthew* and her skipper, Commander Mike Donovan, a veteran haunted by earlier savage battles. What Donovan

doesn't know is that Vice Admiral Takao Kurita of Japan has laid an ingenious trap as the Matthew heads for the treacherous waters of Leyte Gulf. But Donovan faces something even deadlier than Kurita's battleships: Explosives secretly slipped on board American ships by saboteurs are set to detonate at any time. Now the Matthew's survival hinges on the ability of Donovan and his men to dismantle a bomb in the midst of the panic and the chaos of history's greatest naval battle. Admiral Stavridis, a leader in military, international affairs, and national security circles, shares his love of the sea and some of the sources of that affection. The Sailor's Bookshelf offers synopses of fifty books that illustrate the history, importance, lore, and lifestyle of the oceans and of those who "go down to the sea in ships." Stavridis colors those descriptions with glimpses of his own service—"sea stories" in popular parlance—that not only clarify his choices but show why he is held in such high esteem among his fellow sailors. Divided into four main categories—The Oceans, Explorers, Sailors in Fiction, and Sailors in Non-Fiction—Admiral Stavridis' choices will appeal to "old salts" and to those who have never known the sights of the ever-changing seascape nor breathed the tonic of an ocean breeze. The result is a navigational aid that guides readers through the realm of sea literature, covering a spectrum of topics that range from science to aesthetics, from history to modernity, from solo sailing to great battles. Among these eclectic choices are guides to shiphandling and navigation, classic fiction that pits man against the sea, ecological and strategic challenges, celebrations of great achievements and the lessons that come with failure, economic competition and its stepbrother combat, explorations of the deep, and poetry that beats with the pulse of the wave. Some of the included titles are familiar to many, while others, are likely less well-known but are welcome additions to this encompassing collection. Admiral Stavridis has chosen some books that are relatively recent, and he recommends other works which have been around much longer and deserve recognition.

From World War II through Operations Enduring Freedom and Iraqi Freedom, American Sailors and United States Marines at War and Peace: Navy Sea Stories and Marine Corps Legends tells exciting stories of a sailor's and a Marine's life at sea during war and peace. Compiled from the experiences of author Donald Johnson and other American sailors and United States Marines, the book delivers a fascinating glimpse into the everyday exploits of men at war and sea. Johnson includes riveting accounts of battles in the Pacific such as Wake Island and Battle of Bunker Hill in Korea. There are personal experiences from World War II, Korea, Vietnam, and the Middle East. Patriotic stories, stories about Navy Congressional Medal of Honor recipients, and tributes are also included. With such adventures as the aftermath of the Battle of Iwo Jima as seen through the eyes of a small boat operator and Operation Desert Storm as told to the author by his sister, who was a combat stevedore. American Sailors and United States Marines at War and Peace demonstrates the rigors of war as experienced by both sailors and Marines and the humor that goes on during war and during peacetime at sea.

"The Leader's Bookshelf" identifies the "Top 50" books that can help anyone become a better leader. The works selected were based on hundreds of interviews with the most senior active and retired four-star U.S. military leaders who identified books from which they gained the special insights which helped propel them to success in the most demanding leadership challenges. Each of those fifty works -- novels, memoirs, biographies, autobiographies, leadership works -- are concisely summarized and the key leadership lessons extracted and presented. Admiral Jim Stavridis and his co-author, R. Manning Ancell, have been surveying very senior military leaders for the past several years regarding their reading habits and favorite books. They have spoken to over 200 four-star officers, including those both currently on active duty and retired. Each of those admirals and generals was asked for a list of books that strongly influenced their leadership skills. Stavridis and Mancell then collated the data and analyzed which books were mentioned most frequently and which ones were most compelling in the leadership lessons offered the reader. The survey, while not scientific, was quite comprehensive. From it, Stavridis and Ancell built a powerful set of recommended readings. Whether individuals work their way through the entire top 50 list and read each book cover to cover, or read the summaries provided in "The Leader's Bookshelf" to determine which appeal to them most - this book will provide a roadmap to better leadership. "The Leader's Bookshelf" highlights the value of reading for leaders in a philosophical and practical sense, provides advice on how to build an extensive library, lists other books worth reading to improve leadership skills, and analyzes how leaders use what they read to achieve their goals. "The Leader's Bookshelf" is a book for anyone who wants to improve their ability to lead -- whether in their family life, their professional endeavors, or within our society and civic organizations.
