 Beyond Compare is a remarkable work that offers a commentary on spiritual learning for the twenty-first century rooted in two classic texts from the Hindu and Christian traditions: the *Essence of the Three Auspicious Mysteries* by Śrī Vedānta Deśika and *Treatise on the Love of God* by St. Francis de Sales. In his commentary, Clooney achieves multiple goals—the book is a contribution to Christian spiritual theology, highlighting for today the beautiful insights into love by St. Francis de Sales (1567-1623), Doctor of the Church. At the same time it points out how even in our world of many religious paths, we can recover and deepen the ancient tradition of loving surrender into God's hands by opening ourselves to the wisdom of India and one of Hindu India's most famous traditions of loving God, explained to us by the south Indian Hindu theologian Śrī Vedānta Deśika (1268-1369). Clooney goes further, offering a comparative study of these classic works in which he self-consciously writes about the process of reading the two works and the impact this approach has on the reader. The good advice found through this deep engagement with these texts offers a deeper insight into how we can most fruitfully and spiritually think about religious pluralism in the 21st century, remaining open in heart and mind while loyal still to our own tradition. Not merely a book about loving surrender to God, Beyond Compare offers us the opportunity to advance along that path ourselves, learning from the wisdom of St. Francis de Sales and Śrī Vedānta Deśika, meditating on their two paths together, deepening our own love and willingness to surrender in love to God.

Sparrows are as complicated as they are common. This is an essential guide to identifying 76 kinds, along with a fascinating history of human interactions with them. What, exactly, is a sparrow? All birders (and many non-birders) have essentially the same mental image of a pelican, a duck, or a flamingo, and a guide dedicated to waxwings or kingfishers would need nothing more than a sketch and a single sentence to satisfactorily identify its subject. Sparrows are harder to pin down. This book covers one family (Passerellidae), which includes towhees and juncos, and 76 members of the sparrow clan. Birds have a human history, too, beginning with their significance to native cultures and continuing through their discovery by science, their taxonomic fortunes and misfortunes, and their prospects for survival in a world with ever less space for wild creatures. This book includes not just facts and measurements, but stories—of how birds got their names and how they were discovered—of their entanglement with human history.

A presentation on the Tibetan Buddhist path to enlightenment, through the lens of an artist's eye and experience. The sacred arts play an essential, intrinsic role in Tibetan Buddhist practice. Here, one of the great practitioners and master artists of our time presents a guide to the Tibetan Buddhist path, from preliminary practices through enlightenment, from the artist's perspective. With profound wisdom, he shows how visual representations of the sacred in paintings, sculptures, mandalas, and stupas can be an essential support to practice throughout the path. This work, based on the author's landmark Tibetan text, *The Path to Liberation*, includes basic Buddhist teachings and practices, clearly pointing out the relevance of these for both the sacred artist and the practitioner, along with an overview of the history and iconography of Buddhist art.
