Conditional Cash Transfer (CCT) programs aim to reduce poverty by making welfare programs conditional upon the receivers' actions. That is, the government only transfers the money to persons who meet certain criteria. These criteria may include enrolling children into public schools, getting regular check-ups at the doctor's office, receiving vaccinations, or the like. They

have been hailed as a way of reducing inequality and helping households break out of a vicious cycle whereby poverty is transmitted from one generation to another. Do these and other claims make sense? Are they supported by the available empirical evidence? This volume seeks to answer these and other related questions. Specifically, it lays out a conceptual framework for thinking about the economic rationale for CCTs; it reviews the very rich evidence that has accumulated on CCTs; it discusses how the conceptual framework and the evidence on impacts should inform the

design of CCT programs in practice; and it discusses how CCTs fit in the context of broader social policies. The authors show that there is considerable evidence that CCTs have improved the lives of poor people and argue that conditional cash transfers have been an effective way of redistributing income to the poor. They also recognize that even the best-designed and managed CCT cannot fulfill all of the needs of a comprehensive social protection system. They therefore need to be complemented with other interventions, such as workfare or employment programs, and social pensions.

There is no peace with hunger. Only promises and promises and no

fulfillment. If there is no job, there is no peace. If there is nothing to cook in the pot, there is no peace. - Oscar, a 57-year-old man, El Gorri n, Colombia They want to construct their houses near the road, and they cannot do that if they do not have peace with their enemies. So peace and the road have developed a symbiotic relation. One cannot live without the other. . . . - A community leader from a conflict-affected community on the island of Mindanao, Philippines Most conflict studies focus on the national level, but this volume focuses on the community level. It explores how communities experience and recover from violent conflict, and the surprising opportunities that can emerge for poor people to move out of poverty in these harsh contexts. 'Rising

from the Ashes of Conflict' reveals how poor people's mobility is shaped by local democracy, people's associations, aid strategies, and the local economic environment in over 100 communities in seven conflict-affected countries, including Afghanistan. The findings suggest the need to rethink postconflict development assistance. This is the fourth volume in a series derived from the Moving Out of Poverty study, which explores mobility from the perspectives of poor people in more than 500 communities across 15 countries.

This book focuses on central themes related to the conservation of bats. It details their response to land-use change and management practices, intensified urbanization and roost disturbance and loss. Increasing interactions between humans and bats as a result of hunting, disease

relationships, occupation of human dwellings, and conflict over fruit crops are explored in depth. Finally, contributors highlight the roles that taxonomy, conservation networks and conservation psychology have to play in conserving this imperilled but vital taxon. With over 1300 species, bats are the second largest order of mammals, yet as the Anthropocene dawns, bat populations around the world are in decline. Greater understanding of the anthropogenic drivers of this decline and exploration of possible mitigation measures are urgently needed if we are to retain global bat diversity in the coming decades. This book brings together teams of international experts to provide a global review of current understanding and recommend

directions for future research and mitigation.

Conditional Cash Transfers MIT Press

A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In *Data Feminism*, Catherine D'Ignazio and Lauren Klein

present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data never, ever “speak for themselves.” Data Feminism offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who

want to focus their efforts on the growing field of data science. But Data Feminism is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.

Handbook of Sports and Lottery Markets Graphic Communications Group

This volume provides a unique and valuable contribution to our understanding of the impact of stressful life events and mass trauma on the person, the culture and society in the course of the life span. It provides a comprehensive look at our psychological state of affairs at the beginning of the twenty-first century. There are several volumes that address some or most of

these areas individually but this volume is unique in that it has brought together theoreticians, researchers and clinicians who address critical challenges in our lives. But we are now several months into the global financial crisis requiring a transition, not only for the western world but for the third world. How on earth do families in trauma zones – from Sri Lanka to Afghanistan, New Orleans to Gaza – cope with similar declining older relatives, with added traumas and zero medical resources attempt to survive? In news reports, politicians and financiers denying the inevitable and struggling for solutions that cannot be relevant to the new reality that they have yet to discover.

Africa Today Elsevier

Sustainability covers environmental, social and economic dimensions, and requires a multi-disciplinary approach in order to examine, explore and critically engage with issues and advances in its related areas. As we are aware, climate change is a certainty and it affects many economic sectors, including agriculture, particularly production of crop and livestock enterprises. Vast regional differences in these impacts are expected for various parts of the world, culminating in changes in trade patterns, and perhaps eventually even threatening the food security in certain

parts of the world. Agricultural sustainability may be especially threatened by climate extremes, such as heat waves, droughts, and floods. However, not all changes induced by climate change would be negative; some may even be positive. Undoubtedly, there would be winners and losers within a nation, as well as among countries. Achieving sustainability would require changes in the way we manage agriculture. Equally important in this discourse is to find solutions to achieve sustainability in the wake of climate change, one of the major threats to sustainability. This book is devoted to various aspect of sustainable agriculture and climate change and their interplay.

The 3M Story Penguin
As the United Nations Decade on

Biodiversity 2011–2020 comes to a close and countries prepare to adopt a post-2020 global biodiversity framework, this edition of *The State of the World's Forests (SOFO)* examines the contributions of forests, and of the people who use and manage them, to the conservation and sustainable use of biodiversity. Forests cover just over 30 percent of the global land area, yet they provide habitat for the vast majority of the terrestrial plant and animal species known to science. Unfortunately, forests and the biodiversity they contain continue to be under threat from actions to convert the land to agriculture or unsustainable levels of exploitation, much of it illegal. *The State of the World's Forests 2020* assesses progress to date in meeting global targets and

goals related to forest biodiversity and examines the effectiveness of policies, actions and approaches, in terms of both conservation and sustainable development outcomes. A series of case studies provide examples of innovative practices that combine conservation and sustainable use of forest biodiversity to create balanced solutions for both people and the planet.

Taxation in Ghana Graphic

Communications Group

Based on long-term medical anthropological research in northern Ghana, the author analyses issues of health and healing, of gender, and of the control and use of money in a changing rural African setting. He describes the culture of medical pluralism, so typical for neo-colonial states, and people's

choices of "traditional" (local) medicine (plants and sacrifices), Islamic medicine (charms and various written solutions) and "modern" therapy (biomedicine, in particular western pharmaceuticals). He concludes that the rural-urban divide is a fiction, that demarcations between these areas are frequently blurred, linked by a postcolonial, capitalist discourse of local markets, regional economies and national structures, which frequently emerge in local African settings but often originate in global and multinational markets.

This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order. By connecting the past, present, and future in a continuum that shows the paradox of existence for over one billion people, the book underlines the centrality of the African continent to global knowledge production, the global economy, global security, and global creativity. Bringing together perspectives from top Africa scholars, it actively dispels myths of the continent as just a passive recipient of external influences, presenting instead an image of an active global agent that astutely projects soft power. Unlike

previous handbooks, this book offers an eclectic mix of historical, contemporary, and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world.

Data Feminism MacMillan Education, Limited

The book follows a first edition published in 1989, which focused on the severe economic crisis Ghana faced during the late 1970s and the early 1980s. In this second edition, the authors extend the review up to the mid-2010s, covering the entire period since independence, with a special focus on shifts in economic policy, starting with the adoption of the Economic Recovery Programme in 1983. Huq and Tribe provide systematic coverage of Ghanaian economic

development since its independence, reviewing the two main modes of development that have been practiced; and offer an updated, rich data bank. By analyzing the wider macroeconomy of Ghana; its individual sectors; money, banking and trade; infrastructure and environmental policies; and Ghana's poverty, welfare and income distribution, the authors are able to draw vital lessons from the country's economic development.

A Century of Innovation World Bank Publications

Picking Winning Lottery Numbers can be hard. Many people have complicated mathematical systems that use historical data (maybe a birthday, or what they are lucky numbers). Some people use the same numbers every time they play.

Others just let the system spit out random numbers. Very often the results are disappointing or totally random. This book goes back to the grand tradition of fusing our own dreams and modern numerology—coding this dream imagery into usable, meaningful numbers. For instance, are you dreaming of Pizza every other night? Well this could mean something (apart from waking up hungry every morning!). Why not use this in your choice of number? The tables in this Modern Lottery Dream Book will give you something usable from that dream to actually use in the Lottery of your choice. The number to choose for Pizza would be 65 if you are playing Power Ball. In this book, you will Learn how to remember your dreams Learn how to Transcode Proper Nouns Create

complete sets of Lottery Numbers from your Dreams Over 1000 common items included - all with their own numbers ** While no Winning is Guaranteed, this book can make the numbers directly connect with your dreams. Tables and descriptions valid for Mega Millions (US), Powerball (US), UK National Lottery (UK), Euro Jackpot (EU) and Euro Millions (EU).

Springer

One of the world's top experts in behavioral finance offers innovative strategies for improving 401(k) plans. Half of Americans do not have access to a retirement saving plan at their workplace. Of those who do about a third fail to join. And those who do join tend to save too little and often make unwise investment decisions. In short, the

401(k) world is in crisis, and workers need help. Save More Tomorrow provides that help by focusing on the behavioral challenges that led to this crisis inertia, limited self-control, loss aversion, and myopia—and transforms them into behavioral solutions. These solutions, or tools, are based on cutting edge behavioral finance research and they can dramatically improve outcomes by, for example, helping employees: - Save, even if they aren't ready to do so now, by using future enrollment. -Save more by showing them images of their future selves. -Save smarter by reshuffling the order of funds on the investment menu. Save More Tomorrow is the first comprehensive application of behavioral finance to improve retirement outcomes. It also makes it easy for plan

sponsors and their advisers to apply these behavioral tools using its innovative Behavioral Audit process. *Sustainable Agriculture and Climate Change* Unesco

Its basic empirical research and investigation of pure theories of investment in the sports and lottery markets make this volume a winner. These markets are simpler to study than traditional financial markets, and their expected values and outcomes are uncomplicated. By means of new overviews of scholarship on the industry side of racetrack and other betting markets to betting exchanges and market efficiencies, contributors consider a variety of sports in countries around the world. The result is not only superior information about market

forecasting, but macro- and micro-analyses that are relevant to other markets. * Easily studied sports markets reveal features relevant for more complex traditional financial markets * Significant coverage of sports from racing to jai alai * New studies of betting exchanges and Internet wagering markets

World Bank Publications

Let's face it: very few people have studied how to solve problems. Problems knock us down like a tsunami and we don't know what to do about it. We lie awake at night worrying about it and spend our days stressing out over a situation that only seems to get worse. It doesn't have to be that way. Roger Dawson has taught hundreds of

thousands of people how to negotiate, persuade, and make decisions, with his lectures, audio programs and books, and now he has turned his attention to something that everyone needs: a way to solve life's problems. *Secrets of Power Problem Solving* provides proven techniques and sure-fire strategies for solving everything the world throws at you. You'll enjoy greater success as you learn how to: Treat every problem as a golden opportunity. Make your intuition work for you. Evaluate your available choices. Create options when you see no solution. Avoid problems in the first place. And much, much more!
