Birkerts "examines the changes that he has observed in himself and others [since allowing a degree of everyday digital technology into his life]: the distraction induced by reading on the screen; the loss of personal agency through reliance on GPS and one-stop information resources; an increasing acceptance of 'hive' behaviors. 'An unprecedented shift is underway,' he argues, and 'this transformation is dramatically accelerated and more psychologically formative than any previous technological innovation.' He finds solace in engagement with art, particularly literature, and contemplates the countering energies available to us through acts of sustained attention, even as he worries that our increasingly mediated existences are a threat to creativity"--Page 4 of cover

This remarkable story begins in the years following the Civil War, when reformers—emboldened by the egalitarian rhetoric of the post-Civil War era—pressed New York City's oldest institution of higher learning to admit women in the 1870s. Their effort failed, but within twenty years Barnard College was founded, creating a refuge for women scholars at Columbia, as well as an academic beachhead "from which women would make incursions into the larger university." By 1950, Columbia was granting more advanced degrees to women and hiring more female faculty than any other university in the country.

In *Changing the Subject*, Rosalind Rosenberg shows how this century-long struggle transcended its local origins and contributed to the rise of modern feminism, furthered the cause of political reform, and enlivened the intellectual life of America's most cosmopolitan city. Surmounting a series of social and institutional obstacles to gain access to Columbia University, women played a key role in its evolution from a small, Protestant, male-dominated school into a renowned research university. At the same time, their struggles challenged prevailing ideas about masculinity, femininity, and sexual identity; questioned accepted views about ethnicity, race, and rights; and thereby laid the foundation for what we now know as gender. From Lillie Devereux Blake, Annie Nathan Meyer, and Virginia Crocheron Gildersleeve in the first generation, through Ruth Benedict, Margaret Mead, and Zora Neale Hurston in the second, to Kate Millett, Gerda Lerner, and Ruth Bader Ginsburg in the third, the women of Columbia shook the world.

Changing the Game is intended to provide the do-it-yourself sportsman with detailed guidance and proven, time-tested techniques that will optimize the enjoyment of his or her harvest, taking it from field to fork, and for home cooks who are hunting for new ways to up their food game. Author Craig Tomsy grew up in a traditional Italian household in Northern New Jersey, where he was accustomed to good food—really good food. He has coupled his uncompromising love of such fare with his passion for hunting for more than 30 years, and has identified key factors that

will reduce and, in most cases, eliminate the undesirable "gamey" flavors that all too often result from inadequately processed and prepared game. He has also developed and refined with his personal flair many recipes from family and friends over the years to not only complement each game's most desirable flavors, but to help you truly transform your game meat into delicious finished dishes. Changing the Game is a total playbook that takes the reader from caring for the game after the harvest through Craig's "keys to changing the game"-specific techniques used during the butchering and preservation processes that will positively impact the flavor and tenderness of the meat. It also lays out a roadmap and recommends equipment the reader can use to expediently and efficiently process various types of game meat. Explanations that support the findings and preparation techniques are provided in relatable layman's terms via anecdotes that are sprinkled throughout the book. Changing the Game finishes with a multitude of delicious recipes--some new, many traditional--that reflect the many cultures that make up this great country of ours. They have been enhanced by game meat as well as Craig's selection and use of complementary ingredients to achieve complex yet delicate flavor profiles for each dish. Changing the Game also contains recipes for side dishes and desserts, along with wine pairing recommendations, to provide the reader with a complete game plan for an enjoyable evening that will leave your dinner guests asking, "Is this really wild game?"

"I could change, you see, and take things

as all sorts of odd characters. If I was spotted and followed, I'd try to duck in an alley or a doorway and change again. The clothes are extra. Sometimes I could hide clothes in a lot. Most of the time, though, I'd have to change into something new. A bird, a cat. Then I'd carry what I had stolen in my beak or around my neck. Once I copped an umbrella and changed into a big dog and went off with it in my mouth."

Alcorn (English and humanities, George Washington U.) argues that the gradual shift in the teaching of composition from a curriculum that looked at literature as an attempt to represent reality to one that stresses the subjectivity of the student in decoding texts has incorporated an insufficiently complex understanding of subjectivity. The current cultural studies programs stress political ideas over expressive writing, but Alcorn argues that political ideas will never be right unless there is attention to self-expression. Basing his work in the conceptual world of psychoanalytic theory, he outlines a cultural-studies practice that develops anti-ideological identity. "A history of philosophy in twelve

thinkers...The whole performance combines polyglot philological rigor with supple intellectual sympathy, and it is all presented...in a spirit of fun...This bracing and approachable book [shows] that there is life in philosophy yet."

—Times Literary Supplement

"Exceptionally engaging...Geuss has a remarkable knack for putting even familiar thinkers in a new light." —Notre Dame Philosophical Reviews "Geuss is something like the consummate teacher, his analyses navigable and crystal, his guidance on point." —Doug Phillips, Key Reporter Raymond Geuss explores the ideas of twelve philosophers who broke dramatically with prevailing wisdom, from Socrates and Plato in the ancient world to Nietzsche, Wittgenstein, and Adorno. The result is a striking account of some of the most innovative thinkers in Western history and an indirect manifesto for how to pursue philosophy today. Geuss cautions that philosophers' attempts to break from convention do not necessarily make the world a better place. Montaigne's ideas may have been benign, but the fate of those of Hobbes, Hegel, and Nietzsche has been more varied. Yet in the act of provoking people to think differently, philosophers remind us that we are not fated to live within the systems of thought we inherit.

Changing the Subject is a classic critique of traditional psychology in which the foundations of critical and feminist psychology are laid down. Pioneering and foundational, it is still the groundbreaking text crucial to furthering the new psychology in both teaching and research. Now reissued with a new foreword describing the changes which have taken place over the last few years, Changing the Subject will continue to

have a significant impact on thinking about psychology and social theory.

Wittgenstein, one of the most influential, and yet widely misunderstood, philosophers of our age, confronted his readers with aporias—linguistic puzzles—as a means of countering modern philosophical confusions over the nature of language without replicating the same confusions in his own writings. In *Ethics as Grammar*, Brad Kallenberg uses the writings of theological ethicist Stanley Hauerwas as a foil for demonstrating how Wittgenstein's method can become concrete within the Christian tradition. Kallenberg shows that the aesthetic, political, and grammatical strands epitomizing Hauerwas's thought are the result of his learning to do Christian ethics by thinking through Wittgenstein. Kallenberg argues that Wittgenstein's

pedagogical strategy cultivates certain skills of judgment in his readers by making them struggle to move past the aporias and acquire the fluency of language's deeper grammar.

Theologians, says Kallenberg, are well suited to this task of "going on" because the gift of Christianity supplies them with the requisite resources for reading Wittgenstein. Kallenberg uses Hauerwas to make this case—showing that Wittgenstein's aporetic philosophy has engaged Hauerwas in a lifelong conversation that has cured him of many philosophical confusions. Yet, because Hauerwas comes to the conversation as a Christian believer, he is able to surmount Wittgenstein's aporias with the assistance of theological convictions that he possesses through grace. *Ethics as Grammar* reveals that Wittgenstein's intention to cultivate concrete skill in real people was akin to Aristotle's emphasis on the close relationship of practical reason and ethics. In this thought-provoking book, Kallenberg demonstrates that Wittgenstein does more than simply offer a vantage point for reassessing Aristotle, he paves the way for ethics to become a distinctively Christian discipline, as exemplified by Stanley Hauerwas.

Herman Cappelen investigates ways in which language (and other representational devices) can be defective, and how they can be improved. In all parts of philosophy there are philosophers who criticize the concepts we have and propose ways to improve them. Once one notices this about philosophy, it's easy to see that revisionist projects occur in a range of other intellectual disciplines and in ordinary life. That fact gives rise to a cluster of questions: How does the

process of conceptual amelioration work? What are the limits of revision? (How much revision is too much?) How does the process of revision fit into an overall theory of language and communication? *Fixing Language* aims to answer those questions. In so doing, it aims also to draw attention to a tradition in 20th- and 21st-century philosophy that isn't sufficiently recognized. There's a straight intellectual line from Frege and Carnap to a cluster of contemporary work that isn't typically seen as closely related: much work on gender and race, revisionism about truth, revisionism about moral language, and revisionism in metaphysics and philosophy of mind. These views all have common core commitments: revision is both possible and important. They also face common challenges about the methods, assumptions, and limits of revision.

Prayer is a central aspect of religion. Even amongst those who have abandoned organized religion levels of prayer remain high. Yet the most basic questions remain unaddressed: What exactly is prayer? How does it vary? Why do people pray and in what situations and settings? Does prayer imply a god, and if so, what sort? *A Sociology of Prayer* addresses these fundamental questions and opens up important new debates. Drawing from religion, sociology of religion, anthropology, and historical perspectives, the contributors

focus on prayer as a social as well as a personal matter and situate prayer in the conditions of complex late modern societies worldwide. Presenting fresh empirical data in relation to original theorising, the volume also examines the material aspects of prayer, including the objects, bodies, symbols, and spaces with which it may be integrally connected.

Changing the Subject Routledge

This original and ambitious book aims to change how we think about good lives. The perennial debates about good lives--the disagreements caused by conflicts between scientific, religious, moral, historical, aesthetic, and subjective modes of reflection--typically end in an impasse. This leaves the underlying problems of the meaning of life, the possibility of free action, the place of morality in good lives, the art of life, and human self-understanding as intractable as they have ever been. The way out of this impasse, argues Kekes, is to abandon the assumption shared by the contending parties that the solutions of these problems can be rational only if they apply universally to all lives in all contexts. He believes that solutions may vary with lives and contexts and still be rational. Kekes defends a pluralistic alternative to absolutism and relativism that will, he holds, take philosophy in a new and more productive direction.

Lady Mary Wroth (c. 1587-1653) wrote the first sonnet sequence in English by a woman, one of the first plays by a woman, and the first published work of fiction by an Englishwoman. Yet, despite her status as a member of the distinguished Sidney family, Wroth met with disgrace at court for her authorship of a prose romance, which was adjudged an inappropriate endeavor for a woman

and was forcibly withdrawn from publication. Only recently has recognition of Wroth's historical and literary importance been signaled by the publication of the first modern edition of her romance, *The Countess of Mountgomerie's Urania*. Naomi Miller offers an illuminating study of this significant early modern woman writer. Using multiple critical/theoretical perspectives, including French feminism, new historicism, and cultural materialism, she examines gender in Wroth's time. Moving beyond the emphasis on victimization that shaped many previous studies, she considers the range of strategies devised by women writers of the period to establish voices for themselves. Where previous critics have viewed Wroth primarily in relation to her male literary predecessors in the Sidney family, Miller explores Wroth's engagement with a variety of discourses, reading her in relation to a broad range of English and continental authors, both male and female, from Sidney, Spenser, and Shakespeare to Aemilia Lanier, Elizabeth Cary, and Marguerite de Navarre. She also contextualizes Wroth's writing in relation to a variety of nonliterary texts of the period, both political and domestic. Thanks to Miller's sensitive readings, Wroth's writings provide a lens through which to view gender relations in the early modern period.

First Published in 1994. How do women in the academy survive? How can women empower themselves? How can we develop feminist strategies in teaching, learning and research in Higher Education? *Changing the Subject: Women in Higher Education* explores these fundamental questions and

presents strategies for changing and challenging the mainstream curriculum in Higher Education. Drawing on experience, research and theory, the contributors explore the contradictions that have to be managed by women in academia. The chapters analyse the interrelationship between women's roles and status as workers in higher education, their experiences as teachers and students, their representation within the curriculum, and the tensions between life in and out of the academy. Differences and inequalities between women are confronted: what it is to be an 'ebony woman' in the 'ivory tower', for example, or to be 'caught between two worlds' as a mother and academic. This diverse collection brings together everyday issues which women teaching and learning in higher education have themselves identified as important. It provides an opportunity to share the successes, struggles and practical strategies of women who are trying to change the 'subject' of higher education. This volume will be of relevance and interest to all those concerned with women's equality and wider educational issues on a personal and professional Level.

Fiction. Stephen-Paul Martin has been called "one of our great deadpan humorists," by Eric Basso and "North America's foremost master of the short story" by Vernon Frazer. Marjorie Perloff has described his writing as "wildly comic," and Fanny Howe has called his stories "magnificent and entertaining." In *CHANGING THE SUBJECT* Martin once again deforms traditional notions of the story, giving us beautifully digressive revenge-fantasies, hysterical moral tales, and his singular, uncanny brand of

the shaggy dog yarn. Kirpal Gordon writes, "What's so transformative in CHANGING THE SUBJECT is [the] range of knowledge--quantum mechanics, semiotics, literary theory, psychology & meditation practice--delivered in a voice unpretentious yet outrageous, scary yet funny, reader-friendly yet beyond category."

Changing the Educational Landscape is a collection of the best-known and best-loved essays by the renowned feminist philosopher of education, Jane Roland Martin. Trained as an analytic

philosopher at a time before women or feminist ideas were welcome in the field, Martin brought a philosopher's detachment to her earliest efforts at revolutionizing the curriculum. Her later essays on women and gender further showcase the tremendous intellectual energy she brought to the field of feminist educational theory. Martin explores the challenges and contradictions posed by the very concept of women's education, and also recognizes how the presence of women necessitates the rearticulation of not only the curriculum but also the standard ideologies in education.
