GLOVER CRAWFORD

Mortal Fear Mulholland
Books

At a prestigious Florida medical center, brain cancer patients are treated with a one-hundred-percent success rate. Sean Murphy, a young medical student, finds it hard to believe. Is it a miracle cure? Or the biggest con job in the

history of medicine?
Pandemic Penguin
It should have been a routine childbirth. But somehow, the mother died in the delivery, the baby was born brain-damaged, and Jeffrey Rhodes, the anesthesiologist, is running for his life. Charged with malpractice, he is found guilty of harmful intent and reckless disregard for human life. To clear his name, Rhodes must follow

a fugitive trail into the heart of medical nightmare. A trail that, for some, may end in suicide-and for others, in the most shocking conspiracy of our time...

Charlatans Pan Macmillan
Invasion is a fast-paced thriller from New York Times bestselling author and master of the medical thriller Robin Cook. To anyone glancing upwards at the night sky, it would have seemed like a brilliant shooting star . .

but moments later electronic equipment of every kind began to spark and explode throughout the city. The following morning, college student Beau Stark is the first to pick up one of the countless strange black discs scattered far and wide. After an initial sharp pain like a bee-sting, he becomes gradually 'infested'. His flu-like symptoms signify the revival of an alien virus implanted millions of years in mankind's genetic code – and since then lying dormant until

the unwitting hosts are sufficiently developed to aid its relentless progress. Meanwhile, all over the nation, other human beings and animals succumb to the same virus and start to behave bizarrely and symbiotically – as if controlled by some outside influence. As Beau assumes leadership of this growing band of the 'infested', his college friends quickly realize that something truly horrifying is happening around them. Desperately struggling to piece

together the puzzle, they soon become hunted refugees in a desperate quest to save humanity – before the Gateway opens. 'Leave it to doctor-turned-novelist Robin Cook to scare us all to death' Los Angeles Times *Fever Penguin*
An ancestry database holds the key to catching a killer in this explosive medical thriller from New York Times bestselling author Robin Cook. When the body of social worker Kera Jacobsen shows up on Chief New York City Medical Examiner Laurie

Montgomery's autopsy table, it appears she was the victim of a drug overdose. But for Laurie and her new pathology resident, the brilliant Dr. Aria Nichols, little things aren't adding up. Kera's family and friends swear she never touched drugs. Administrators from the hospital where Kera worked insist the case be shrouded in silence. And although Kera was ten weeks pregnant, nobody knows who the father was--or what he might now about Kera's final moments alive. With

Laurie temporarily sidelined by a medical emergency, impulsive Aria turns to a controversial new technique: collaborating with experts at a start-up ancestry website to trace the fetus's DNA in the hopes of identifying the mystery father. But when Kera's fellow social worker is murdered, it becomes clear that someone doesn't want Kera's secrets to come to light . . . and if Aria gets any nearer to the truth, she and Laurie might find themselves a killer's next

targets.

The Year of the Intern
Penguin

With her son's illness in complete remission, New York City medical examiner Laurie Montgomery returns to work--and finds her first case back to be a dangerous puzzle of the highest order, involving organized crime and two start-up biotech companies caught in a zero-sum game...

Chromosome 6 Cell

In a novel as timely as it is terrifying, New York Times-best-selling author

Robin Cook explores the controversial clash of politics and biotechnology. When Dr. Daniel Lowell and his partner, Dr. Stephanie D'Agostino, discover a new cloning procedure that utilizes stem cells to treat otherwise incurable and degenerative diseases, they know they've hit the medical jackpot. But with their cutting-edge method pending approval, they run into a roadblock by the name of Senator Ashley Butler, who views their technique as an

attack on traditional American values. Then Butler is diagnosed with rapidly progressing Parkinson's disease, and he must make a Faustian pact with the very doctors whose groundbreaking technology he is trying to destroy: treatment in exchange for unwavering support. But the DNA transference procedure has never been tested before, and working under less than favorable conditions to keep the premature trial under wraps, the doctors place their careers—and their

patient's life—at risk, all in the name of scientific progress. Once they hit the point of no return, they feel invincible, but when Butler starts experiencing violent, horrifying seizures, they realize their luck may have run out...
Vital Signs Penguin
Future doctor Adam Schonberg loved his wife. That was why he took a job with the giant drug firm Arolen, for the money he needed for their coming baby. His wife, Jennifer, felt she would get the best of care at the

Julian Clinic as her pregnancy progressed. It seemed a happy coincidence that the Julian Clinic was owned by Arolen...until Adam Schonberg slowly began to suspect the terrifying truth about this connection...and about the hideous evil perpetrated on the wife he loved by the doctor she helplessly trusted...

Viral Penguin

A fast-spreading disease with no cure takes the United States by storm in Robin Cook's "most harrowing medical horror

story" (The New York Times). Murder and intrigue reach epidemic proportions when a devastating plague sweeps the country. Dr. Marissa Blumenthal of the Atlanta Centers for Disease Control investigates—and soon uncovers the medical world's deadliest secret...

Harmful Intent Penguin
An explosive novel from Robin Cook, New York Times-bestselling author and master of the medical thriller. Newly minted chief resident at Boston Memorial Hospital Noah

Rothausser is swamped in his new position, from managing the surgical schedules to dealing with the fallout from patient deaths. Known for its medical advances, the famed teaching hospital has fitted several ORs as "hybrid operating rooms of the future"--an improvement that seems positive until an anesthesia error during a routine procedure results in the death of an otherwise healthy man. Noah suspects Dr. William Mason, an egotistical, world-class surgeon, of an

error during the operation and for tampering with the patient's record afterward. But Mason is quick to blame anesthesiologist Dr. Ava London. When more anesthesia-related deaths start to occur, Noah is forced to question all of the residents on his staff, including Ava, and quickly realizes there's more to her than what he sees. A social media junkie, Ava has created multiple alternate personas for herself on the Internet. With his own job and credibility now in

jeopardy, Noah must decide which doctor is at fault and who he can believe--before any more lives are lost.

Brain Penguin

Cell is an unnervingly plausible medical thriller from the master of the genre, Robin Cook. George Wilson, M.D., a radiology resident in Los Angeles, is about to enter a profession on the brink of an enormous paradigm shift, foreshadowing a vastly different role for doctors everywhere. A new smartphone app, iDoc, is being developed

that is far more than a mere reference tool, rather it is a fully customizable personal physician capable of diagnosing and treating patients more efficiently than the real thing. George's initial collision with this incredible innovation is devastating. He awakens one morning to find his fiancée dead in bed alongside him, not long after she participated in an iDoc beta test. Then several of his patients die after undergoing imaging procedures. All of them had been part of the same

beta test. Is it possible that iDoc is being subverted by hackers – and that the US government is involved in a cover-up? Despite threats to both his career and his freedom, George relentlessly seeks the truth, knowing that if he's right, the consequences could be lethal.

Coma Boxtree

The blockbuster bestseller that kickstarted a new genre--the medical thriller--is now available in trade paperback for the first time. They called it "minor surgery," but

Nancy Greenly, Sean Berman and a dozen others--all admitted to Boston Memorial Hospital for routine procedures--were victims of the same inexplicable, hideous tragedy on the operating table. They never woke up. Susan Wheeler is a third-year medical student working as a trainee at Boston Memorial Hospital. Two patients during her residency mysteriously go into comas immediately after their operations due to complications from anesthesia. Susan begins to investigate the causes

behind both of these alarming comas and discovers the oxygen line in Operating Room 8 has been tampered with to induce carbon monoxide poisoning. Then Susan discovers the evil nature of the Jefferson Institute, an intensive care facility where patients are suspended from the ceiling and kept alive until they can be harvested for healthy organs. Is she a participant in--or a victim of--a large-scale black market dealing in human organs?
Cure Penguin

She discovers that the deaths might be

intentional—the work of a remarkably clever serial killer with a shocking motive. And then Laurie is hit with more devastating news: she might be carrying the genetic marker for breast cancer. As the need for answers becomes more urgent, Laurie is pulled into the nightmare as a potential victim herself. With time winding down, she and Jack must put aside the tensions between them in a race to connect the dots—and save Laurie's life...
Cell Penguin

Coma—reimagined for the twenty-first century from the undisputed king of medical thrillers. Lynn Peirce, a fourth-year medical student at South Carolina’s Mason-Dixon University, thinks she has her life figured out. But when her otherwise healthy boyfriend, Carl, enters the hospital for routine surgery, her neatly ordered life is thrown into total chaos. Carl fails to return to consciousness after the procedure, and an MRI confirms brain death. Devastated by Carl’s

condition, Lynn searches for answers. Convinced there’s more to the story than what the authorities are willing to reveal, Lynn uses all her resources at Mason-Dixon—including her initially reluctant lab partner, Michael Pender—to hunt down evidence of medical error or malpractice. What she uncovers, however, is far more disturbing. Hospitals associated with Middleton Healthcare, including the Mason-Dixon Medical Center, have unnervingly high rates of unexplained anesthetic complications

and patients contracting serious and terminal illness in the wake of routine hospital admissions. When Lynn and Michael begin to receive death threats, they know they’re into something bigger than either of them anticipated. They soon enter a desperate race against time for answers before shadowy forces behind Middleton Healthcare and their partner, Sidereal Pharmaceuticals, can put a stop to their efforts once and for all.

Terminal Penguin

Leaving their urban hospital for a modern medical facility in Bartlet,

Vermont, Doctors Angela and David Wilson begin to notice puzzling details in the deaths of several terminal patients there Fatal Cure Penguin New York Times- bestselling author Robin Cook takes on the cutting-edge world of gene-modification in this pulse-pounding new medical thriller. When an unidentified, seemingly healthy young woman collapses suddenly on the New York City subway and dies upon reaching the hospital, her case is an eerie reminder for veteran

medical examiner Jack Stapleton of the 1918 flu pandemic. Fearful of a repeat on the one hundredth anniversary of the nightmarish contagion, Jack autopsies the woman within hours of her demise and discovers some striking anomalies: first, that she has had a heart transplant, and second, that, against all odds, her DNA matches that of the transplanted heart. Although the facts don't add up to influenza, Jack must race against the clock to identify the

woman and determine what kind of virus could wreak such havoc--a task made more urgent when two other victims succumb to a similar rapid death. But nothing makes sense until his investigation leads him into the fascinating realm of CRISPR/CAS9, a gene-editing biotechnology that's captured the

imagination of the medical community. . . and the attention of its most unethical members. Drawn into the dark underbelly of the organ transplant market, Jack will come face-to-face with a megalomaniacal businessman willing to risk human lives in order to conquer a lucrative new frontier in medicine--and if Jack's not careful,

the next life lost might be his own.
