Military education was the lifeblood of the armies, navies, and air  
forces of the British Empire and an essential ingredient for

success in both war and peace. Military Education and the British  
Empire is the first major scholarly work to address the role of  
military education in maintaining the empire throughout the  
nineteenth and twentieth centuries. Bringing together the world's  
top scholars on the subject, this book places distinct national  
narratives – Canadian, Australian, South African, British, and  
Indian – within a comparative context. Ultimately, this book  
allows readers to consider the connections between education  
and empire from a transnational perspective.

This reproducible activities kit emphasises academic reading, writing and discussion skills. The target audience for these materials is adult or young-adult students in high school, college,

or college/university entrance courses. It has been devised to give students the chance to think, talk and write about real life topics. The book is structured in three units, each individual unit has four jigsaw parts, which are used first for reading and discussion and then, when they are thoroughly familiar to students, as examples for analysis and imitation in the process of improving writing skills. The book concentrates on realistic writing, not just exercises. There are drills and practice on specific language points, but only in preparation for much freer writing activities. The main thing is for students to develop their own arguments about subjects that matter. Includes an extensive Teacher's Notes on how to exploit the materials.
