 This course for young students is a success story all over the world, winning praise for its innovative approach that really

does work. The Teacher's Book is clear and comprehensive and includes an 'A-Z of Methodology' reference section. Videos and tests are also available for all levels of the course. Levels 1-4 contain around 80 hours of class work depending on the various options used. The Starter Level provides around 40-60 hours of class work.

 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions,

disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

This is an interdisciplinary volume that focuses on

the central topic of the representation of events, namely cross-cultural differences in representing time and space, as well as various aspects of the conceptualisation of space and time. It brings together research on space and time from a variety of angles, both theoretical and methodological. Crossing boundaries between and among disciplines such as linguistics, psychology, philosophy, or anthropology forms a creative platform in a bold attempt to reveal the complex interaction of language, culture, and cognition in the context of human communication and interaction. The authors address the nature of spatial and

temporal constructs from a number of perspectives, such as cultural specificity in determining time intervals in an Amazonian culture, distinct temporalities in a specific Mongolian hunter community, Russian-specific conceptualisation of temporal relations, Seri and Yucatec frames of spatial reference, memory of events in space and time, and metaphorical meaning stemming from perception and spatial artefacts, to name but a few themes. The topic of space and time in language and culture is also represented, from a different albeit related point of view, in the sister volume *Space and Time in Languages and Cultures: Linguistic Diversity* (HCP 36)

which focuses on the language-specific vis-à-vis universal aspects of linguistic representation of spatial and temporal reference.

A Novel American Bar Association

A survey of the influential—and prolific—modern philosopher In dozens of books, magazine articles, and essays, George Santayana infused his philosophy with exquisite language, wit, and subtle humor, prompting one authority to state that

he “writes philosophy more beautifully than any other thinker since Plato.” The Wisdom of George Santayana makes accessible both his ideas and his oft-quoted aphorisms on a variety of subjects including naturalism, creative imagination, and spirituality without dogma. Organized by books and essays, and highlighting key words and themes, this compilation is an excellent introduction to the man and his work.

London Past and Present

This fascinating topographical dictionary of London, published in 1891, provides a valuable record of many places now lost to development.
