This handbook examines evidence-based treatment of obsessive-compulsive and related disorders for a broad clinical audience. Focusing on both children and adults with these conditions, it discusses various manifestations of OCD (e.g., contamination, perfectionism), related conditions (e.g., hoarding, trichotillomania, and Tourette syndrome), and cases with complicating factors. Chapters describe case specifics, offer assessment guidelines, and illustrate evidence-based psychotherapy. Case examples depict real-life complexities of presentation, notably in terms of comorbid conditions and hard-to-treat subpopulations. Topical areas addressed in the Handbook include: Phenomenology, assessment, and treatment of multiple types of OCD in adults and children. Treating “not just right

experiences” in children with OCD. Treating obsessive compulsive disorder in very young children. Treatment of OCD comorbid with other disorders like depression and Autism Spectrum Disorder. Treatment of OCD when presenting with complicating factors like limited insight, extreme family accommodation, and poor motivation. The Clinical Handbook of Obsessive-Compulsive and Related Disorders is an essential resource for clinicians and professionals as well as researchers, and graduate students in clinical psychology, psychiatry, social work, counseling programs, pediatrics, public health, and related disciplines.

Have the Relationship You Want Elsevier

One of the most powerful, yet relatively unknown features available in HEC-RAS is the HECRASController.

TheHECRASController API has a wealth of procedures which allow a programmer to manipulate HEC-RAS externally by setting input data, retrieving input or output data, and performing common

functions such as opening and closing HEC-RAS, changing plans, running HEC-RAS, and plotting output. HECRASController applications are seemingly endless. Not only can the retrieval and post-processing of output be automated, but with the HECRASController, real-time modeling and probabilistic experiments like Monte Carlo are possible. If you have HEC-RAS on your computer, you already have the HECRASController! "Breaking the HEC-RAS Code" explains how the HECRASController works, provides example applications of the HECRASController, and catalogs the vast array of programming procedures (with explanations and examples on how to use them) embedded in the HECRASController. This is a "must-have" book for all HEC-RAS users. Professionals: Give yourself an edge for the next proposal and do something groundbreaking with HEC-RAS. Students: Make yourself marketable by adding the skills offered in this book.

Android Forensics Springer

"Android Forensics" covers an open source mobile device platform based on the Linux 2.6 kernel and managed by the Open Handset Alliance. This book provides a thorough review of the Android platform including supported hardware devices, the structure of the Android development project, and implementation of core services (wireless communication, data storage, and other low-level functions).

ECommerce in the Cloud GRIN Verlag

Now in its second edition, this is the only book on occupational therapy in oncology and palliative care. It has been thoroughly updated, contains new chapters, and like the first edition will appeal to a range of allied health professionals working with patients with a life-threatening illness. The book explores the

nature of cancer and challenges faced by occupational therapists in oncology and palliative care. It discusses the range of occupational therapy intervention in symptom control, anxiety management and relaxation, and the management of breathlessness and fatigue. The book is produced in an evidence-based, practical, workbook format with case studies. New chapters on creativity as a psychodynamic approach; outcome measures in occupational therapy in oncology and palliative care; HIV-related cancers and palliative care.

'Lord Sugar is a self-made man and one of Britain's finest business brains. His story so far is inspirational to the end' The Sun 'Sugar is unusual among celebrity memoirists in that he's a clever man who has done a lot with his life, and the tale of his rise from nothing, and nowhere is genuinely revealing' Private Eye From a Hackney council estate to the House of Lords, this is the extraordinary story of one of our greatest entrepreneurs. Alan Sugar was born in 1947 and brought up on a council estate in Clapton, in Hackney. As a kid he watched his dad struggle to support the family, never knowing from one week to the next if he'd have a job. It had a huge impact on him, fuelling a drive to succeed that was to earn him a sizeable personal fortune. Now he describes his amazing journey, from schoolboy enterprises like making and selling his own ginger beer to setting up his own company at nineteen; from Amstrad's groundbreaking ventures in hi-fi and computers, which made him the darling of the stock exchange, to the dark days when he nearly lost it all; from his pioneering deal with Rupert Murdoch to his boardroom battles at Tottenham Hotspur FC. In this compelling autobiography, he

takes us into the world of The Apprentice, and describes his appointment as advisor to the government and elevation to the peerage. Like the man himself, What You See Is What You Get is forthright, funny and sometimes controversial. 'I'm addicted to autobiographies and What You See Is What You Get is one of the best I've read. Love him or loathe him, Baron Sugar of Clapton is the walking, snarling embodiment of all the values he espouses on The Apprentice' Piers Morgan

Рассмотрены самые интересные, полезные и наиболее популярные среди отечественных пользователей Android-приложения. Даны советы, как превратить Android-устройство в пульт дистанционного управления компьютером, организовать видеосъемку, загружать торренты, избавиться от рекламы в приложениях, экономить трафик, продлить жизнь аккумулятора и многое другое. Некоторые приложения, описанные в книге, требуют полномочий root, получению которых посвящена отдельная глава. Особое внимание уделено созданию своих собственных Android-приложений без знания языков программирования и рассмотрен проект App Inventor, позволяющий создавать приложения исключительно визуальными средствами. Во втором издании описаны новинки последних версий Android и новые программы MX Player, Яндекс.Метро, ES Проводник, One Click Root, рассмотрена публикация видео на YouTube, печать на беспроводном принтере, активация безопасного режима, отладка приложений по USB и многое другое.

The Quaker City, Or, The Monks of Monk Hall John Wiley & Sons

Beginning Android 4 Games Development offers everything you need to join the ranks of successful Android game developers. You'll start with game design fundamentals and programming basics, and then progress toward creating your own basic game engine and playable game that works on Android 4.0 and earlier devices. This will give you everything you need to branch out and write your own Android games. The potential user base and the wide array of available high-performance devices makes Android

an attractive target for aspiring game developers. Do you have an awesome idea for the next break-through mobile gaming title? Beginning Android 4 Games Development will help you kick-start your project. The book will guide you through the process of making several example games for the Android platform, and involves a wide range of topics: The fundamentals of Android game development targeting Android 1.5-4.0+ devices The Android platform basics to apply those fundamentals in the context of making a game The design of 2D and 3D games and their successful implementation on the Android platform *Android Application Development For Dummies* Lulu.com This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g. in China, India, South Korea, Taiwan, Vietnam), are now becoming increasingly sophisticated and striving to become global brands, while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management and intercultural competence, and current branding

trends in Asia will provide a cutting-edge update on international business strategy for students and practitioners alike.

Critical Digital Studies БХВ-Петербург

Master's Thesis from the year 2011 in the subject Tourism - Miscellaneous, grade: 9,7 (of 10) - distinction, Bournemouth University (School of Tourism), course: European Tourism Management, language: English, abstract: In recent years, smartphone applications have appeared as a new tool helping travellers create experiences. Taking into consideration the potential impact of the smartphones and mobile applications, it is important to analyse the usage of smartphone applications in tourism. This dissertation analyses the already existing mobile applications on the tourism market, clarifies which type of consumers uses these applications during their travel process and predicts some future trends for these new mobile services. There are several different user groups who use smartphones in a variety of different ways, from business users to media junkies. The literature review shows that the main customers are young men, who use these applications especially to plan their travel during the information phase. But smartphone applications can not only support tourists' information processing activities such as connection and navigation in the tourism consumption stage, but also the activities in the pre-consumption and post-consumption stages. A survey in Madrid (Spain) and Nuremberg (Germany) was conducted for this dissertation showing the main differences and similarities in using smartphone applications for tourism activities. The usage of smartphones in Germany is still more frequent than in Spain and the main used device is the iPhone from Apple. Furthermore, German as well as Spanish

travellers focus their usage mainly on the information stage than on the booking process, as the majority of mobile applications are purely informative such as maps or tourist travel guides. The usage is also still challenged by expensive roaming charges and poor Internet connectivity. For a successful usage tourism companies should therefore focus on aspects like secure and e

Instilling brand loyalty among consumers is the key to long-term success, and requires focusing on meaningful differentiation: functional, emotional, or societal. Supported by data analyses, case studies and interviews, *The Meaningful Brand* explores the four components of a distinguished brand: purpose, delivery, resonance, and difference.

Multinational Management McFarland

Winning at competitive games requires a results-oriented mindset that many players are simply not willing to adopt. This book walks players through the entire process: how to choose a game and learn basic proficiency, how to break through the mental barriers that hold most players back, and how to handle the issues that top players face. It also includes a complete analysis of Sun Tzu's book *The Art of War* and its applications to games of today. These foundational concepts apply to virtually all competitive games, and even have some application to "real life." Trade paperback. 142 pages.
