The goals of the FMP are to develop a cost effective, innovative approach to sustainable Spiny Lobster Fishery Management Plan - California The Fishery Management Plan for Spiny Lobster in the Gulf of Mexico and the South Atlantic manages spiny lobster from North Carolina to Texas. However, the commercial fishery for spiny lobster, and to a very large extent, the recreational fishery, occurs off South Florida and primarily in the Florida Keys. Spiny Lobster - South Atlantic Fish Management Council When approached by the California Department of Fish and Wildlife (the Department) to coordinate a review of their latest fishery management plan (FMP) for California spiny lobster, we saw it as an opportunity to strengthen the science that informs management of an ecologically and economically valuable natural resource for the state. Review of California Spiny Lobster Fishery

Management Plan ... "The spiny lobster is a prime candidate for an FMP," said Barsky. "With the implementation of new marine protected areas in Southern California on the first of the year, the FMP will evaluate integration of MPAs into the management of the lobster fisheries, along with the increasing popularity of hoop nets in the recreational fishery." Spiny Lobster Fishery Management Plan Under Way The California Spiny Lobster (CA lobster) is an important natural resource managed by the state of California for over 100 years. The species supports a valuable commercial fishery and a significant recreational fishery. CA lobsters also act as important keystone predators within the southern California nearshore ecosystem. CALIFORNIA SPINY LOBSTER FISHERY MANAGEMENT PLAN The California Fish and Game Commission (Commission) adopted the California Spiny Lobster Fishery Management Plan (FMP) in April 2016. The FMP requires California Department of Fish and Wildlife (Department) to monitor and assess the California lobster stock every year using
