HUFFMAN BLAZE

H2O and the Waters of Forgetfulness House of Anansi

Education has become synonymous with schooling, but it doesn't have to be. As schooling becomes increasingly standardized and test driven, occupying more of childhood than ever before, parents and educators are questioning the role of schooling in society. Many are now exploring and creating alternatives. In a compelling narrative that introduces historical and contemporary research on self-directed education, *Unschooled* also spotlights how a diverse group of individuals and organizations are evolving an old schooling model of education. These innovators challenge the myth that children need to be taught in order to learn. They are parents who saw firsthand how schooling can dull children's natural curiosity and exuberance and others who decided early on to enable their children to learn without school. Educators who left public school classrooms discuss launching self-directed learning centers to allow young people's innate learning instincts to flourish, and entrepreneurs explore their disillusionment with the teach-and-test approach of traditional schooling.

Deschooling Society Cambridge University Press

Schools during lockdown -- Parental engagement and the experience of learning at home --

Economics, education and inequalities -- Breadth, balance, the curriculum and its assessment --

Making the grade : the class of 2020 -- Catching up on 'lost' learning -- Pupil wellbeing and emotional

recovery -- Leadership and governance -- Inspection, research and system performance -- Recasting

the learning blend : technology and pedagogy -- Next steps.

Bloomsbury Publishing

Presents a collection of essays that focus on the topic of critical pedagogy and its response to the moral, economic, and social issues in the world.

Tools for Conviviality Marion Boyars Publishers

In the eighteen years since Ivan Illich's death, David Cayley has been reflecting on the meaning of his friend and teacher's life and work. Now, in *Ivan Illich: An Intellectual Journey*, he presents Illich's body of thought, locating it in its own time and retrieving its relevance for ours. Ivan Illich (1926–2002) was a revolutionary figure in the Roman Catholic Church and in the wider field of cultural criticism that began to take shape in the 1960s. His advocacy of a new, de-clericalized church and his opposition to American missionary programs in Latin America, which he saw as reactionary and imperialist, brought him into conflict with the Vatican and led him to withdraw from direct service to the church in 1969. His institutional critiques of the 1970s, from *Deschooling Society* to *Medical Nemesis*, promoted what he called institutional or cultural revolution. The last twenty years of his life were occupied with developing his theory of modernity as an extension of church history. Ranging over every phase of Illich's career and meditating on each of his books, Cayley finds Illich to be as relevant today as ever and more likely to be understood, now that the many convergent crises he foresaw are in full public view and the church that rejected him is paralyzed in its "folkloric" shell. Not a conventional biography, though attentive to how Illich lived,

Cayley's book is "continuing a conversation" with Illich that will engage anyone who is interested in theology, philosophy, history, and the Catholic Church.

A Commentary to Hugh's Didascalicon Marion Boyars

A classic in the philosophy of education, considering the fundamental purpose and function of schools, translated into English for the first time. This classic 1971 work on the fundamental purpose and function of schools belongs on the same shelf as other landmark works of the era, including Ivan Illich's *Deschooling Society*, Paulo Freire's *Pedagogy of the Oppressed*, and John Holt's *How Children Fail*. Nils Christie's *If School Didn't Exist*, translated into English for the first time, departs from these works by not considering schooling (and deschooling) as much as schools and their specific community and social contexts. Christie argues that schools should be proving grounds for how to live together in society rather than assembly lines producing future citizens and employees.

Elements of a Science of Education Marion Boyars

Schr. betoogt dat energieverbruik boven een zeker maximum niet leidt tot meer welvaart, maar tot onrechtvaardige maatschappelijke verhoudingen.

Ivan Illich's Deschooling Society Peter Lang

Arguing against the "tougher standards" rhetoric that marks the current education debate, the author of *No Contest* and *Punished by Rewards* writes that such tactics squeeze the pleasure out of learning. Reprint.

Confronting 21st Century Philistinism Marion Boyars

"Each of the four essays printed here was written for a specific occasion and together comprise only the smallest selection from a larger corpus questioning commodity and energy-intensive economies. The essays are presented thematically instead of chronologically to offer a better view of the sweep of Illich's argument. In the first two, "War against Subsistence" and "Shadow Work," Illich reveals both the ruins on which the economy is built and the blindness of economics which cannot but fail to see it. The second two essays, "Energy and Equity" and "The Social Construction of Energy," unearth the nineteenth century invention and subsequent consequences of 'energy' thought of as the unseen cause of all 'work' whether done by steam engines, humans, or trees. The science of ecology relies on this assumption and, as Illich explained, unwittingly fuels the addiction to energy. The close dance of energy consumption and economic growth is characteristic of not just industrially geared societies. After all, energy consumption steadily increases even in so-called post-industrial societies, fueling the fortunes of Google and Apple no less than Wal-Mart"--

The Schools Our Children Deserve Crossway

For more than fifteen years, iconoclastic thinker Ivan Illich refused to be interviewed. Finally, in 1988, CBC's David Cayley persuaded Illich to record a conversation. This first interview led to additional sessions that continued until 1992 and are now gathered in *Ivan Illich in Conversation*. In these fascinating conversations, which range over a wide selection of the celebrated thinker's published work and public career, Illich's brilliant mind alights on topics of great contemporary interest, including education, history, language, politics, and the church.

Toward a History of Needs House of Anansi

In this urgent and passionate book, Frank Furedi explains the essential contribution of intellectuals both to culture and to democracy - and why we need to recreate a public sphere in which intellectuals and the general public can talk to each other again.

The Curriculum Marion Boyars Publishers

Ivan Illich argues for individual personal control over life, the tools and energy we use. A work of seminal importance. The conviviality for which noted social philosopher Ivan Illich is arguing is one in which the individual's personal energies are under direct personal control and in which the use of tools is responsibly limited. A work of seminal importance, this book claims our attention for the urgency of its appeal, the stunning clarity of its logic and the overwhelmingly human note that it sounds.

Ivan Illich in Conversation Deschooling Society

Deschooling Society Marion Boyars Publishers

DESCHOOLING SOCIETY. Broadway Books

In this postscript to *Tools for Creativity*, Illich calls for the right to useful unemployment: a positive, constructive, and even optimistic concept dealing with that activity by which people are useful to themselves and others outside the production of commodities for the market. Unfettered by managing professionals, unmeasured and unmeasurable by economists, these activities truly generate satisfaction, creativity, and freedom.

Moving Beyond Traditional Classrooms and "tougher Standards" Marion Boyars

Fully updated and revised, the second edition of *New Learning* explores the contemporary debates and challenges in education and considers how schools can prepare their students for the future.

New Learning, Second Edition is an inspiring and comprehensive resource for pre-service and in-service teachers alike.

School is Dead New York : Pantheon Books

A collection of 12 articles dealing with institutional authority and its inadequacies.

A Foucauldian Analysis of an Intellectual Repression Orient Blackswan

This collection of essays is the third revised edition of Dr Krishna Kumar's UGC national lectures. It updates several issues in the context of recent concerns such as globalisation and external funding for education. Some of the issues discussed are the textbook, culture, learning by rote, failure of village primary schools, the merits of Gandhian ideas of education, and the interpretation of history.

A Philosophical Analysis of Ivan Illich's Construct "Deschooling Society" and Related

Terms University of Chicago Press

The text of Ivan Illich's article on deschooling prefaces the critical response of active educators. Bibliogs

Tools for Conviviality New Society Publishers

In a work with profound implications for the electronic age, Ivan Illich explores how revolutions in technology affect the way we read and understand text. Examining the Didascalicon of Hugh of St. Victor, Illich celebrates the culture of the book from the twelfth century to the present. Hugh's work, at once an encyclopedia and guide to the art of reading, reveals a twelfth-century revolution as sweeping as that brought about by the invention of the printing press and equal in magnitude only to the changes of the computer age—the transition from reading as a vocal activity done in the monastery to reading as a predominantly silent activity performed by and for individuals.

Where Have All the Intellectuals Gone? Houghton Mifflin Harcourt

Illich suggests radical reforms for the education system to stop its headlong rush towards frustrated expectations and inequalities.

A Study of the Literature Marion Boyars Publishers

The medical establishment has become a major threat to health, says Ivan Illich. He outlines the causes of iatrogenic diseases.
