however, -when not among the unsuccessful and disgruntled, -will, with but few exceptions, be found to have had but little practice themselves in court, or else to belong to that ever growing class in our profession who have relinquished their court practice and are building up fortunes such as were never dreamed of in the legal profession a decade ago, by becoming what may be styled business lawyers-men who are learned in the law as a profession, but who through opportunity, combined with rare commercial ability, have come to apply their learning-especially their knowledge of corporate law-to great commercial enterprises, combinations, organizations, and reorganizations, and have thus come to practise law as a business. ...The counsel who has a pleasant personality; who speaks with apparent frankness; who appears to be an earnest searcher after truth; who is courteous to those who testify against him; who avoids delaying constantly the progress of the trial by innumerable objections and exceptions to perhaps incompetent but harmless evidence; who seems to know what he is about and sits down when he has accomplished it, exhibiting a spirit of fair play on all occasions-he it is who creates an atmosphere in favor of the side which he represents, a powerful though unconscious influence with the jury in arriving at their verdict. ...There he sat, calm, contemplative; in the midst of occasional noise and confusion

solemnly unruffled; always making some little headway either with the jury, the court, or the witness; never doing a single thing which could by possibility lose him favor, ever doing some little thing to win it; smiling benignantly upon the counsel when a good thing was said; smiling sympathizingly upon the jury when any juryman laughed or made an inquiry; wooing them all the time with his magnetic glances as a lover might woo his mistress; seeming to preside over the whole scene with an air of easy superiority; exercising from the very first moment an indefinable sway and influence upon the minds of all before and around him.

The Art of Cross-Examination Cross-Examination and Interrogation By Francis L. Wellman The Art of Cross-Examination is a classic text for trial attorneys and law students on how to cross-examine witnesses. Written by American attorney Francis L. Wellman, the book was first published in 1903 by The Macmillan Company, and was still in print more than 100 years later. The book gives colorful, interesting facts on the trial participants; provides insights into various claims, disputes, marriage scandals; etc. The New York Times contrasted it with other, boring legal texts, and recommended it to both trial lawyers and non-lawyers for its entertainment value. It is filled with

suspense regarding the outcomes of the compelling trials within the book. Equally suspenseful are the legal outcomes from the attempts of the attorneys to sway the juries with their erudition, wit, and charm. In offering this book to the legal profession I do not intend to arrogate to myself any superior knowledge upon the subject, excepting in so far as it may have been gleaned from actual experience. Nor have I attempted to treat the subject in any scientific, elaborate, or exhaustive way; but merely to make some suggestions upon the art of cross-examination, which have been gathered as a result of twenty-five years' court practice, during which time I have examined and cross-examined about fifteen thousand witnesses, drawn from all classes of the community. *With the Cross-Examinations of Important Witnesses in Some Celebrated Cases* Createspace Independent Publishing Platform

The Art of Cross-Examination - Witness Interrogation Techniques - By Francis L. Wellman - Legal Education Cross-examination is considered an essential component of a jury trial because of the impact it has on the opinions of the judge and jury. Few lawyers practice trial law or complex litigation and typically refer such cases to those who have the time, resources and experience to handle a complex trial and the commitment involved to complete a trial successfully. Few attorneys get the practice necessary to develop the techniques needed to do an effective job cross-examining a witness. It is sometimes referred to as an art form, because of the need for an attorney to know precisely how to elicit the testimony from the opposing witness that will help, not hinder, their client's case. Typically a cross-examiner must not only be effective at getting the witness to reveal the truth, but in most cases to reveal confusion as to the facts such as time, dates, people, places, wording etc. More often than not a cross-examiner will also attempt to undermine the credibility of a witness if he or she will not be perceived to be a bully (such as discrediting a very elderly person or young child). The cross-examiner often needs to discredit a potentially biased or damaging witness in the eyes of the jury without appearing to be doing so in an unfair way. Typically the cross-examiner must appear friendly, talk softly and sincerely to relax the guarded witness. Or on other occasions they may start by being more confrontational, unsettling an already disturbed witness. They typically begin repeating similar basic questions in a variety of different ways to get different responses, which will then be used against the witness as misstatements of fact later when the attorney wants to make their point. If it is too obvious the questions are too clearly repetitive and making the witness nervous, the other attorney may accuse the cross examiner of badgering the witness. There is a fine line between badgering and getting the witness to restate facts differently that is typically pursued. In offering this book to the legal profession I do not intend to arrogate to myself any superior knowledge upon the subject, excepting in so far as it may have been gleaned from actual experience. Nor have I attempted to treat the subject in any scientific, elaborate, or exhaustive way; but merely to make some suggestions upon the art of cross-examination, which have been gathered as a result of twenty-five years' court practice, during which time I have examined and cross-examined about fifteen thousand witnesses, drawn from all classes of the community. If what is here written affords anything of instruction to the younger members of my profession, or of interest or entertainment to the public, it will amply justify the time taken from my summer vacation to put in readable form some points from my experience upon this most difficult subject.

Written by today's leading arbitrators and counsel, this remarkably candid guide provides insight into the practitioner's approach, conduct, style, and techniques that have proven most effective. While the facts and the law are fundamental, a successful outcome is the product of painstaking document review, witness interviews, legal research, strategizing and focusing the case, and developing compelling written and oral presentations. How to properly perform these tasks is the subject of this book. And where the first edition focused mainly on the cultural differences in advocacy performed in various regions of the world, this new edition expands on this theme by addressing each functional aspect of an international arbitration and the techniques that have been developed for good written and oral advocacy. Intended to assist both the novice in learning the techniques of advocacy, and the experienced advocate in improving his skills, this is an essential reference.

Learn the Secretive Art of Cross-Examination. Tricks and Traps. The Art of Cross-Examination. Golden Rules for Examination of Witnesses by Francis L. Wellman. With the 'Cross-Examinations' of Important Witnesses in Some Celebrated Cases. If all witnesses had the honesty and intelligence to come forward and scrupulously follow the letter as well as the spirit of the oath, "to tell the truth, the whole truth, and nothing but the truth," and if all advocates on either side had the necessary experience, combined with honesty and intelligence, and were similarly sworn to develop the whole truth and nothing but the truth, of course there would be no occasion for cross-examination, and the occupation of the cross-examiner would be gone. But as yet no substitute has ever been found for cross-examination as a means of separating truth from falsehood, and of reducing exaggerated statements to their true dimensions. The system is as old as the history of nations. Indeed, to this day, the account given by Plato of Socrates's cross-examination of his accuser, Miletus, while defending himself against the capital charge of corrupting the youth of Athens, may be quoted as a masterpiece in the art of cross-questioning. Cross-examination is generally considered to be the most difficult branch of the multifarious duties of the advocate. Success in the art, as some one has said, comes more often to the happy possessor of a genius for it. Great lawyers have often failed lamentably in it, while marvellous success has crowned the efforts of those who might otherwise have been regarded as of a mediocre grade in the profession. Yet personal experience and the emulation of others trained in the art, are the surest means of obtaining proficiency in this all-important prerequisite of a competent trial lawyer.

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 edition. Excerpt: ... CHAPTER XII THE CROSS-EXAMINATION OF MISS MARTINEZ BY HON. JOSEPH H. CHOATE IN THE CELEBRATED BREACH OF PROMISE CASE, MARTINEZ V. DEL VALLE The modern method of studying any subject, or acquiring any art, is the inductive method. This is illustrated in our law schools, where to a large extent actual cases are studied in order to get at the principles of law instead of acquiring those principles solely through the a priori method of the study of text-books. As already indicated, this method is also the only way to become a master of the art of cross-examination. In addition to actual personal experience, however, it is important to study the methods of great cross-examiners, or those whose extended experience makes them safe guides to follow. Hence, the writer believes, it would be decidedly helpful to the students of the art of cross-examination to have placed before them in a convenient and somewhat condensed form, some good illustrations of the methods of well-known cross-examiners, as exhibited in actual practice, in the cross-examination of important witnesses in famous trials. For these reasons, and the further one that such examples are interesting as a study of human nature, I have in the following pages introduced the cross-examination of some important witnesses in several

remarkable trials. Often when it is necessary to demonstrate the fact that a witness has given colored or false testimony, it is not some effective point that is the true test of a great cross-examination, but the general effect which is produced upon a jury by a long review of all the witness has said, bringing out inconsistencies, contradictions, and improbable situations which result finally in the breakdown of the witness's story. The brief extracts from...
