If you've been referred for a genetic test because you have cancer, the test will be done on a sample of the tumour that has already been removed as part of your treatment. The sample of blood, saliva or body tissue is sent to a genetic testing laboratory to be analysed. Genetic and genomic testing - NHS Molecular biology is the study of Biology at molecular level. It is mainly concerned with the interrelationships between DNA, RNA and protein synthesis. A molecular biologist studies the processes of replication, translation and transcription of genetic material on a wide scale.
