NATHANAEL GAIGE

Persian Letters OUP Oxford
 The "beautiful and haunting" (San Francisco Chronicle) tale of an orphan's search for love, for his unknown father, and for the key to the elusive riddle of his fate, from the author of the forthcoming *4 3 2 1: A Novel* Marco Stanley Fogg is an orphan, a child of the sixties, a quester tirelessly seeking the key to his past, the answers to the ultimate riddle of his fate. As Marco journeys from the canyons of Manhattan to the deserts of Utah, he encounters a gallery of characters and a series of events as rich and surprising as any in modern fiction. Beginning during the summer that men first walked on the moon, and moving backward and forward in time to span three generations, Moon

Palace is propelled by coincidence and memory, and illuminated by marvelous flights of lyricism and wit. Here is the most entertaining and moving novel yet from an author well known for his breathtaking imagination. From New York Times-bestselling author Paul Auster (The New York Trilogy).

Translated into twenty-two languages. Toby Lolness may be just one and a half millimeters tall, but he's the most wanted person in his world -- the world of the great oak Tree. Toby's father has made a groundbreaking discovery: the Tree itself is alive, lowing with vital energy, and there may even be a world beyond it. Greedy developers itch to exploit this forbidden knowledge, risking permanent damage to their natural world. But Toby's father has refused to reveal his findings, causing the family to be exiled to the lower branches. Only Toby has managed to escape -- but for how long? And how can he bear to leave his parents to their terrible fate?

Merry Christmas, Splat Storybook Greetings

Science Education Now Library of Alexandria

Perhaps the most illustrious women of her era, Marie Curie is well-known for her Nobel Prize-winning research in physics and chemistry and for her discovery with husband Pierre of polonium and radium. Less familiar is the complex character of this renowned woman. While grounding her work in a historical context, the author provides a fresh human perspective on the life of this famous yet enigmatic precursor of today's atomic scientists.

The Light Years Artège Editions

Far from teleological historiography, the pan-European perspective on Early Modern drama offered in this volume provides answers to why, how, where and when the given phenomena of theatre appear in history. Using theories of circulation and other concepts of exchange, transfer and movement, the authors analyze the development and differentiation of European secular and religious drama, within the disciplinary framework of comparative literature and the history of literature and concepts. Within this frame, aspects of major interest are the relationship between tradition and innovation, the status of genre, the proportion of autonomous and heteronomous creational dispositions within the artefacts or genres they belong to, as well as strategies of functionalization in the context of a given part of the cultural net. Contributions cover a broad range of topics, including poetics of Early Modern Drama; political, institutional and social practices; history of themes and motifs (Stoffgeschichte); history of genres/cross-fertilization between genres; textual traditions and distribution of texts; questions of originality and authorship; theories of

circulation and net structures in Drama Studies.

L'enfant n'est pas seulement un cerveau avec un cartable, l'enfant ne se réduit pas à une boîte à savoirs. Fort de cette conviction, tout parent désire l'épanouissement de son enfant dans toutes ses dimensions. C'est le pari de l'éducation intégrale. À une époque où les repères s'effacent et les structures éducatives sont à la peine, seule une vision moderne de l'éducation fondée sur l'humanisme chrétien est en mesure de répondre aux défis contemporains. Dans cette perspective, l'enfant est considéré non seulement pour lui-même, mais aussi en vue d'une participation effective au bien de la société. Nourri d'une irremplaçable expérience de terrain dans le monde scolaire, l'auteur développe une approche innovante et accessible à tout parent comme à tout enseignant. Principes théoriques et applications pratiques sont ainsi parfaitement mariés pour donner naissance à un ouvrage qui, pour la première fois, synthétise avec grand talent l'éducation intégrale dans toutes ses composantes. François-Xavier Clément est père de famille, philosophe de formation. Enseignant, puis chef d'établissements scolaires du second degré, il a été directeur de l'enseignement catholique de la Loire. Il est également auditeur de l'Institut des hautes études de la Défense nationale (IHEDN). Sa dernière expérience a été celle de chef d'établissement coordonnateur du groupe scolaire Saint-Jean-de-Passy à Paris durant cinq ans.

Galileo Galilei's *Sidereus Nuncius* is arguably the most dramatic scientific book ever published. It announced new and unexpected phenomena in the heavens, "unheard of through the ages," revealed by a mysterious new instrument. Galileo had ingeniously improved the rudimentary "spyglasses" that appeared in Europe in 1608, and in the autumn of 1609 he pointed his new instrument at the sky, revealing astonishing sights: mountains on the moon, fixed stars invisible to the naked eye, individual stars in the Milky Way, and four moons around the planet Jupiter. These discoveries changed the terms of the debate between geocentric and heliocentric cosmology and helped ensure the eventual acceptance of the Copernican planetary system. Albert Van Helden's beautifully rendered and eminently readable translation is based on

the Venice 1610 edition's original Latin text. An introduction, conclusion, and copious notes place the book in its historical and intellectual context, and a new preface, written by Van Helden, highlights recent discoveries in the field, including the detection of a forged copy of *Sidereus Nuncius*, and new understandings about the political complexities of Galileo's work.

Is protest broken? Micah White, co-creator of Occupy Wall Street, thinks so. Disruptive tactics have failed to halt the rise of Donald Trump. Movements ranging from Black Lives Matter to environmentalism are leaving activists frustrated. Meanwhile, recent years have witnessed the largest protests in human history. Yet these mass mobilizations no longer change society. Now activism is at a crossroads: innovation or irrelevance. In *The End of Protest* Micah White heralds the future of activism. Drawing on his unique experience with Occupy Wall Street, a contagious protest that spread to eighty-two countries, White articulates a

unified theory of revolution and eight principles of tactical innovation that are destined to catalyze the next generation of social movements. Despite global challenges—catastrophic climate change, economic collapse and the decline of democracy—White finds reason for optimism: the end of protest inaugurates a new era of social change. On the horizon are increasingly sophisticated movements that will emerge in a bid to challenge elections, govern cities and reorient the way we live. Activists will reshape society by forming a global political party capable of winning elections worldwide. In this provocative playbook, White offers three bold, revolutionary scenarios for harnessing the creativity of people from across the political spectrum. He also shows how social movements are created and how they spread, how materialism limits contemporary activism, and why we must re-conceive protest in timelines of centuries, not days. Rigorous, original and compelling, *The End of Protest* is an exhilarating vision of an all-encompassing revolution of revolution.
