The Cambridge History of Judaism:
Volume 2, The Hellenistic Age Lars
Muller Publishers

A groundbreaking study of visionary artist Hilma af Klint. When Swedish artist Hilma af Klint died in 1944 at the age of 81, she left behind more than a thousand paintings and works on paper that she kept largely private during her lifetime. Believing the world was not yet ready for her art, she stipulated that it

should remain unseen for another 20 years. But only in recent decades has the public had a chance to reckon with af Klint's radically abstract painting practice - one which predates the work of Vasily Kandinsky and other artists widely considered trailblazers of modernist abstraction. Accompanying the first major survey exhibition of the artist's work in the United States, Hilma af Klint represents her groundbreaking painting series while expanding recent scholarship to present the fullest picture yet of the artist's life and work. Essays explore the social, intellectual, and

artistic milieu of af Klint's 1906 break with figuration and her subsequent development, placing her in the context of Swedish modernism and folk art traditions, contemporary scientific discoveries, and spiritualist and occult movements. A roundtable discussion among contemporary artists, scholars, and curators considers af Klint's sources and relevance to art in the 21st century. The volume also delves into her unrealized plans for a spiral-shaped temple in which to display her art - a wish that finds a fortuitous answer in the Guggenheim Museum's rotunda, the site of the forthcoming exhibition.

How did art escape the deadlock of the Situationists? anti-art refusal? Did the

relational artists, with their repetitions of Situationist slogans and techniques, outline a sustainable, micro-political alternative to Guy Debord's dream of surpassing art and realizing philosophy? Looking back at some of the Situationists' confrontations with the museum, this book traces a path beyond the tragedy of negativity and the litany of recuperation. At the center is the concept of play; originally adopted as the principle of reconciled life, it returns as the lever of instrumentalization. But in the extraterrestrial wasteland of the present, spaces of ludic coexistence and experimentation may remain possible, provided that pessimism can be adequately organized.

On the Unpredictability of the Past Hatje Cantz Pub

Media screens—film, video, and computer screens—have increasingly pervaded both artistic production and everyday life since the 1960s. Yet the nature of viewing artworks made from these media, along with their subjective effects, remains largely unexplored. Screens addresses this gap, offering a historical and theoretical framework for understanding screen-reliant installation art and the spectatorship it evokes. Examining a range of installations created over the past fifty years that investigate the rich terrain between the sculptural and the cinematic, including works by artists such as Eija-Liisa Ahtila, Doug Aitken, Peter Campus, Dan Graham, VALIE EXPORT, Bruce Nauman, and Michael Snow, Kate Mondloch traces the construction of screen spectatorship

in art from the seminal film and video installations of the 1960s and 1970s to the new media artworks of today's digital culture. Mondloch identifies a momentous shift in contemporary art that challenges key premises of spectatorship brought about by technological objects that literally and metaphorically filter the subject's field of vision. As a result she proposes that contemporary viewers are, quite literally, screen subjects and offers the unique critical leverage of art as an alternative way to understand media culture and contemporary visuality.

Where Are the Tiny Revolts? New York Review of Books

The last two centuries have witnessed a radical transformation of Jewish life. Marked by such profound events as the

Holocaust and the establishment of the state of Israel, Judaism's long journey through the modern age has been a complex and tumultuous one, leading many Jews to ask themselves not only where they have been and where they are going, but what it means to be a Jew in today's world. Tracing the Jewish experience in the modern period and illustrating the transformation of Jewish religion, culture, and identity from the 17th century to 1948, the updated edition of this critically acclaimed volume of primary materials remains the most complete sourcebook on modern Jewish history. Now expanded to supplement the most vital documents of the first edition, *The Jew in the Modern World* features hitherto unpublished and inaccessible sources concerning the

Jewish experience in Eastern Europe, women in Jewish history, American Jewish life, the Holocaust, and Zionism and the nascent Jewish community in Palestine on the eve of the establishment of the State of Israel. The documents are arranged chronologically in each of eleven chapters and are meticulously and extensively annotated and cross-referenced in order to provide the student with ready access to a wide variety of issues, key historical figures, and events. Complete with some twenty useful tables detailing Jewish demographic trends, this is a unique resource for any course in Jewish history, Zionism and Israel, the Holocaust, or European and American history.

"We Support Everything Since the Dawn of Time that Has Struggled and Still

Struggles" transcript Verlag

Addressed to students of the image—both art historians and students of visual studies—this book investigates the history and nature of time in a

variety of different environments and media as well as the temporal potential of objects. Essays will analyze such topics as the disparities of power that privilege certain forms of temporality above others, the nature of temporal duration in different cultures, the time of materials, the creation of pictorial narrative, and the recognition of anachrony as a form of historical interpretation.

In this pocket-sized book on the history of Lettrist Cinema, French historian and theorist Nicole Brenez elucidates the formal innovations of this unique art form that prefigured breakthroughs in film including the nouvelle vague and the experiments of expanded cinema in

the United States. Key figures and basic concepts such as the use of jarring dissonant and disassociated soundtracks, scratched and bleached celluloid and the place of Lettrist Cinema in avant-garde history are discussed and illustrated with black-and-white stills. Founded by Romanian-born French poet, film critic and artist Isidore Isou in Paris immediately after World War II, the Lettrist movement took its inspiration from Dada and Surrealism. The movement remains active to this day, having lost none of the aesthetic or ethical radicalism seeded by Isou in 1951 with his revolutionary film *Venom and Eternity*, which became the movement's visual manifesto, influencing such avant-garde filmmakers as Stan Brakage.

THE POSTHUMOUS MASTERWORK FROM "ONE OF THE GREATEST AND MOST INFLUENTIAL MODERN WRITERS" (JAMES WOOD, THE NEW YORK TIMES BOOK REVIEW) Composed in the last years of Roberto Bolaño's life, 2666 was greeted

across Europe and Latin America as his highest achievement, surpassing even his previous work in its strangeness, beauty, and scope. Its throng of unforgettable characters includes academics and convicts, an American sportswriter, an elusive German novelist, and a teenage student and her widowed, mentally unstable father. Their lives intersect in the urban sprawl of SantaTeresa—a fictional Juárez—on the U.S.-Mexico border, where hundreds of young factory workers, in the novel as in life, have disappeared.

The Roma: a Minority in Europe Central European University Press

One of the greatest challenges during the enlargement process of the European Union towards the east is how the issue of the Roma or Gypsies is

tackled. This ethnic minority group represents a much higher share by numbers, too, in some regions going above 20% of the population. This enormous social and political problem cannot be solved without proper historical studies like this book, the most comprehensive history of Gypsies in Romania. It is based on academic research, synthesizing the entire historical Romanian and foreign literature concerning this topic, and using lot of information from the archives. The main focus is laid on the events of the greatest consequence. Special attention is devoted to aspects linked to the long history of the Gypsies, such as slavery, the process of integration and assimilation into the majority population, as well as the

marginalization of Gypsies, which has historic roots. The process of emancipation of Gypsies in the mid-19th century receives due treatment. The deportation of Gypsies to Transnistria during the Antonescu regime, between 1942-1944, is reconstructed in a special chapter. The closing chapters elaborate on the policy toward Gypsies in the decades after the Second World War that explain for the latest developments and for the situation of this population in today's Romania.

Genocide not only annihilates people but also destroys and reorganizes social relations, using terror as a method. In *Genocide as Social Practice*, social scientist Daniel Feierstein looks at the policies of state-sponsored repression pursued by the Argentine military dictatorship against political opponents between 1976 and 1983 and those pursued by the Third Reich between 1933 and 1945. He finds similarities, not in the extent of the horror but in terms of the goals of the perpetrators. The Nazis resorted to ruthless methods in part to stifle dissent but even more importantly to reorganize German society into a *Volksgemeinschaft*, or people's community, in which racial

solidarity would supposedly replace class struggle. The situation in Argentina echoes this. After seizing power in 1976, the Argentine military described its own program of forced disappearances, torture, and murder as a “process of national reorganization” aimed at remodeling society on “Western and Christian” lines. For Feierstein, genocide can be considered a technology of power—a form of social engineering—that creates, destroys, or reorganizes relationships within a given society. It influences the ways in which different social groups construct their identity and the identity of others, thus shaping the way that groups interrelate. Feierstein establishes continuity between the “reorganizing genocide” first practiced by the Nazis in

concentration camps and the more complex version—complex in terms of the symbolic and material closure of social relationships—later applied in Argentina. In conclusion, he speculates on how to construct a political culture capable of confronting and resisting these trends. First published in Argentina, in Spanish, *Genocide as Social Practice* has since been translated into many languages, now including this English edition. The book provides a distinctive and valuable look at genocide through the lens of Latin America as well as Europe.

The American artist Paul Chan has gained international acclaim for his video work, drawings and installations

that blend a novel drafting aesthetic with philosophical reflections on politics, religion, sex and life. This beautifully produced monograph, published on the occasion of Chan's highly anticipated one-person exhibition at New York's recently unveiled New Museum of Contemporary Art, presents the first significant overview of his work. Spanning from the late 1990s through today, it is named for Chan's most recent project, *The 7 Lights* (2005-07), a series of large-scale digital projections and drawings that "hallucinate" the Seven Days of Creation. Paul Chan was born in Hong Kong in 1973 and raised in Nebraska. Currently based in New York, he is represented by Greene Naftali Gallery and has had solo museum exhibitions at The Fabric Workshop and

Museum, Philadelphia; the Blanton Museum of Art, Austin; the Institute of Contemporary Art, Boston; and the UCLA Hammer Museum, Los Angeles.

The Hospitality of Presence BRILL
 Texts and artistic contributions that respond to questions of feminism, authorship, sexuality, and empowerment. *Where are the tiny revolts?* is the first book in a new annual series published by CCA Wattis Institute, a contemporary art center and research institute in San Francisco. Each book in the series is driven by a central question: what are we learning from artists today? *Unconnected to an exhibition program, Where are the tiny revolts?* is rooted in the Wattis's artist-driven research institute. It is a place to explore and share some of the texts and

visual work that emerge over the course of an entire year of discussions and public programs. Instead of providing documentation of projects with artists, *Where are the tiny revolts?* offers other ideas, voices, and references generated by conversations with and about artists. The first book in the series, informed by themes related to the work of Dodie Bellamy, revolves around questions related to contemporary forms of feminism and sexualities, the rebirth of the author, and ways in which vulnerability, perversion, vulgarity, and self-exposure can be forms of empowerment. The texts cover a broad array of styles, including memoir, theoretical essay, art historical analysis, poetry, and fiction. The visual elements are equally diverse, ranging from

photographs to collage to drawing. *As a Weasel Sucks Eggs* Routledge
Seemingly immobile and durable, architecture remains a challenge in the modern world of collecting and exhibiting. From the late eighteenth century onward, divergent conventions of display have been conflated with urgent discussions of how material culture is handed down, distributed, appropriated, and evaluated. *Place and Displacement: Exhibiting Architecture* investigates historical and contemporary practices of displaying architecture, whether in full scale or as fragments, models, or two-dimensional representations. Exploring questions of circulation and temporality, issues of institution and canon, and the discourse and politics of architectural spaces on

exhibit, the book's essays discuss the ambiguous status of architecture as an object of display. Contributions from leading scholars in the new research field of architectural exhibitions reveal the centrality of the exhibition in defining and redefining the notion of architecture and its history.

The Constitutional Politics of State Formation MIT Press

In December 1894, Captain Alfred Dreyfus, a brilliant French artillery officer and a Jew of Alsatian descent, was court-martialed for selling secrets to the German military attache in Paris based on perjured testimony and trumped-up evidence. The sentence was military degradation and life imprisonment on Devil's Island, a hellhole off the coast of French Guiana. Five years later, the case was overturned, and eventually Dreyfus was completely exonerated. Meanwhile,

the Dreyfus Affair tore France apart, pitting Dreyfusards--committed to restoring freedom and honor to an innocent man convicted of a crime committed by another--against nationalists, anti-Semites, and militarists who preferred having an innocent man rot to exposing the crimes committed by ministers of war and the army's top brass in order to secure Dreyfus's conviction. Was the Dreyfus Affair merely another instance of the rise in France of a virulent form of anti-Semitism? In *Why the Dreyfus Affair Matters*, the acclaimed novelist draws upon his legal expertise to create a riveting account of the famously complex case, and to remind us of the interest each one of us has in the faithful execution of laws as the safeguard of our

liberties and honor.

Cindy Sherman HarperCollins UK
"An in-depth look at the disturbing and abject sides of the American photo artist's oeuvre. Throughout her career, Cindy Sherman (*1954 in Glen Ridge, New Jersey) has been interested in the derailed and deviant sides of human nature, noticeable both in her selection of subject matter (fairytale, disasters, sex, horror, and surrealism) and in her disquieting interpretations of well-established photographic genres, such as film stills, fashion photography, and society portraiture. This richly illustrated publication seeks to highlight and acknowledge these aspects of her work based on selected examples and accompanied by texts by well-known authors, filmmakers, and artists who

likewise deal with the grotesque, the uncanny, and the extraordinary in their artistic practice."--Publisher's website.
