GIs returning after World War II created an entirely new automotive market niche when they bought surplus Jeeps and began exploring the rugged backcountry of the American West. This burgeoning market segment, which eventually became known as sport utility vehicles (SUVs), numbered about 40,000 units per year with offerings from Jeep, Scout, Toyota, and Land Rover. In 1966, Ford entered the fray with its Bronco, offering increased refinement, more power, and an innovative coil-spring front suspension. The Bronco caught on quickly and soon established a reputation as a solid backcountry performer. In Baja, the legendary accomplishments of racers such as Parnelli Jones, Rod Hall, and Bill Stroppe further cemented the bobtail's reputation for toughness. Ford moved upstream with the introduction of the larger Bronco for 1978, witnessing a huge increase in sales for the second-generation trucks. The Twin Traction Beam front end was introduced in the third generation, and further refinements including more aerodynamic styling, greater luxury, and more powerful fuel-injected engines came on board in the generations that followed. Through it all, the Bronco retained its reputation as a tough, versatile, and comfortable rig, both on and off the paved road. With the reintroduction of the Bronco for 2020, Ford is producing a vehicle for a whole new generation of enthusiasts that looks to bring modern styling and performance to the market while building on the 30-year heritage of the first five generations of the Bronco so dearly loved by their owners. From the development process and details of the first trucks through the 1996 models, author Todd Zuercher shares technical details, rarely seen photos, and highlights of significant models along with the stories of those people whose lives have been intertwined with the Bronco for many years. This book will have new information for everyone and will be a must-have for longtime enthusiasts and new owners alike! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial; color: #000000}

A Romantic Tragicomedy of Faith, Family, and Folly Ross, twenty-three, isn't nearly as clever as he thinks he is. His brilliant idea to break up with his girlfriend, Lora Liamant, in an attempt to show her how terrible other men are and how empty life would be without him, has backfired spectacularly. Within weeks, he discovers she's moved on with the brother of a famous network TV actor. In the midst of his heartbreak, Ross's parents die tragically—in a helicopter crash at an all-inclusive resort in Turks and Caicos—leaving him with millions of dollars and custody over his teenage sister. Traumatized, ruminating, and rich, Ross plots scheme after scheme to show Lora he's changed into a responsible adult, even as she shows no indication of wanting that. Everything he does seems to make matters worse, as his misguided mission of self-transformation only leads to Lora's confusion and dismay. Let Me Try Again is an electric picaresque charting a young Jewish man's spiral of neurotic pride and self-improvement within a culture that only caters to his worst impulses. Brimming with vitality and crackling with wit, Matthew Davis's dynamic debut illuminates the

absurdities of twenty-first-century life with ecstatic flair.

DEXA 2004, the 15th International Conference on Database and Expert Systems Applications, was held August 30 - September 3, 2004, at the University of Zaragoza, Spain. The quickly growing spectrum of database applications has led to the establishment of more specialized discussion platforms (DaWaK Conference, EC-Web Conference, EGOVConference, Trustbus Conference and DEXA Workshop: Every DEXA event has its own conference proceedings), which were held in parallel with the DEXA Conference also in Zaragoza. In your hands are the results of much effort. The work begins with the preparation of the submitted papers, which then go through the reviewing process. The accepted papers are revised to final versions by their authors and are then arranged within the conference program. All culminates in the conference itself. For this conference 304 papers were submitted, and I want to thank to all who contributed to it; they are the real base of the conference. The program committee and the supporting reviewers produced altogether 942 referee reports, in average 3,1 reports per paper, and selected 92 papers for presentation. At this point we would like to say many thanks to all the institutions that actively supported this conference and made it possible. These were: • University of Zaragoza • FAW • DEXA Association • Austrian Computer Society

Don't consider yourself deviant? Well, that just may be a career breaker. Odds are the idea or product that will transform your business or industry tomorrow is out there right now, hiding in the shadows of the Fringe, raw, messy, untamed, and just waiting to be exploited. Trapping, taming, and marketing it is the key to burying your competition and staying ahead of your market. Deviance is nothing more than a marked separation from the norm and is the source of innovation, the kind of breakthrough thinking that creates new markets and tumbles traditional ones. Positive deviation is an inexhaustible font of new ideas, products, and services. It's the source of all creative thinking and dynamic new market development and ultimately the basis of all incremental profit. The Deviant's Advantage describes how deviance proceeds along a traceable trajectory from the Fringe, where it originates but has zero commercial potential; to the Edge, where word of mouth creates a limited audience; to the Realm of the Cool, where the buzz and market momentum really start to build; to the Next Big Thing, where demand is honed and intensifies; finally landing at Social Convention, the heart of the mass market. Ryan Mathews and Watts Wacker, two of America's most respected futurists, trace the "Path of the Devox" (the voice, spirit, or incarnation of deviant ideas, products, and individuals), using it as a way to explain how and why: \* Christian fundamentalism morphed from college Bible studies to Republican party king-making \* Reebok cares more about what's on the feet of kids in Detroit and Philadelphia than what the so-hip-it-hurts set is wearing in New York or on Rodeo Drive \* Napster exploded from an idea germinating inside a sixteen-year-old to a movement with 60 million subscribers that very nearly destroyed the music industry \* Hugh Hefner went from America's most public pornographer to a cultural icon with decidedly Puritan sensibilities Mathews and Wacker also look at what happens to formerly deviant products and ideas after they are replaced by the next wave from the Fringe—how they morph into Cliché (where their commercial potential may actually increase), become Icons or even Archetypes, or fade into Oblivion, and how you can profitably manage even a fading concept. Looking for the next big idea for your business? Then it's past time to quit staring at the Social Convention for inspiration and start scouring the Fringes of society. Tomorrow's breakthrough concept is lurking out there right now, in the mind of a deviant individual. Your choice is simple: find it and exploit it, or be buried by those who do. From the Hardcover edition.

Despite her words, being alone isn't a good thing for an suicidal cutter. Fear of the disease has kept her inside, frozen with indecision. Marketing visionary Martin Lindstrom has been on the front line of the branding for over twenty years. In Brandwashed, he turns the spotlight on his own industry, drawing on all he has witnessed behind closed doors, exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard-earned money. Lindstrom reveals eye opening details such as how advertisers and marketers target children at an alarmingly young age (starting when they are still in the womb), what heterosexual men really think about when they see sexually provocative advertising, how marketers and retailers stoke the flames of public panic and capitalize on paranoia over diseases, extreme weather events, and food contamination scares. It also presents the first ever evidence to prove how addicted we are to our smartphones, and how certain companies (like the maker of a very popular lip balm), purposely adjust their formulas in order to make their products chemically addictive, and much, much more. Brandwashed is a shocking insider's look at how today's global giants conspire to obscure the truth and manipulate our minds, all in service of persuading us to buy.

The first major study to explore the relationship between clothing made for survival in the most inhospitable environments on earth and beyond, and the high fashion it has inspired Today— from haute couture to ready- to- wear— parkas, puffer coats, and backpacks, as well as garments made of neoprene and Mylar are everywhere. But the roots of these ubiquitous items of dress and cutting-edge textiles are rarely acknowledged or understood. Inspired by the so-called “heroic era” of polar navigation (1890- 1922), extreme mountain climbing, deep sea exploration, and journeys to outer space, Expedition explores how garments made for the most inhospitable environments on earth and beyond have inspired more than sixty years of fantastical, otherworldly fashions. Lavishly illustrated, this publication features approximately 150 color photographs. The images include high fashion magazine editorials by Irving Penn, Richard Avedon, and others; museum objects from the permanent collections of The Museum at FIT and the American Museum of Natural History; and unpublished photographs of early expeditions in the archives of the Explorer's Club in New York.
